

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SUPERINTENDING ENGINEER (DRILLING) [POST CODE - (DR01)]**

✓ **Drilling Fluids**

Basic Functions of a Drilling Fluid; Types of Drilling Fluids; Fluid Rheology

✓ **Fluid Mechanics for Drilling**

✓ **Well Control**

Procedures and Principles

✓ **Roller-Cone and Polycrystalline Diamond Drill Bits**

Different bit types, Cutting structure for soft and hard formations, Roller-Cone Bit Components (Bearing, Seal, and Lubrication Systems), bit hydraulics, IADC bit classification system, bit nomenclature, Matrix-body PDC bits, PDC Cutters, Basic PDC Bit Design Principles, IADC Dull Grading System, Bit Selection and Operating Practices.

✓ **Directional Drilling**

Applications; Directional-Well Profiles; directional-drilling tools; rotary-steerable systems

(RSS); Directional Survey; Survey Instruments; BHA Design for Directional Control

✓ **Casing Design**

Design Objectives; Design Methods; Casing Setting Depth Selection;

✓ **Wellhead Systems**

✓ **Cementing**

Methods and Hardware e.g. Floating equipment, cementing plugs, stage tools, centralizers, and scratchers.

✓ **Drilling Problems and Solutions**

Pipe Sticking; Differential-Pressure Pipe Sticking; Mechanical Pipe Sticking (Drilled Cuttings accumulation; Borehole Instability; Key Seating).

Loss circulation; Loss circulation zones (total loss/ partial loss) and causes; Prevention of Lost Circulation; Remedial Measures.

Drill pipe Failures; Twist off; Parting; failure as a result of Collapse and Burst; Fatigue; Pipe Failure Prevention.

Borehole Instability; Definition and Causes; Types and Associated Problems: Hole Closure, Hole Enlargement, Fracturing, Borehole collapse. Principles of Borehole Instability, Borehole Instability Prevention.

✓ **Well Planning**

Objectives (Safety; Minimum Cost; Usable Holes); Well-Type Classification; Flow path for well planning; cost per foot analysis; well completions.

✓ **Emerging Drilling Technologies**

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
MANAGER (ACCOUNTS) / MANAGER (INTERNAL AUDIT) [POST CODE - (AC 02)]**

1. FINANCIAL ACCOUNTING & REPORTING

- Accounting Standards- Introduction and Overview, Carve outs/ins in Ind ASs vis-à-vis International Financial Reporting Standards (IFRSs), Preparation of Financial statements of Company viz. Cash flow Statement (Profit and Loss Account, Balance Sheet and Cash Flow Statement)- Profit/Loss prior to incorporation as per Schedule II of Companies Act.
- SEBI Regulations only related to financial matters excluding Secretarial issues.

2. COST AND MANAGING ACCOUNTING

- Introduction to Cost Accounting, Materials, Labor, Overheads, Non-Integrated Accounts, Methods, Job and Batch, Contract, Operating, Process and Operation, Standard Cost, Marginal Costing, Budget and Budgetary Control.
- Cost Management, Cost Volume Profit Analysis, Pricing Decisions, Budgets and Budgetary Control, Standing Costing and Variance Analysis, Transfer Pricing, Cost Management in Service Sector and Financial Decision Modelling, Employee Stock Option and buy back of securities.

3. COMPANY LAW AND ALLIED LAWS

Company Law 2013, Insolvency and Bankruptcy Code 2016, The Indian Contract Act, 1872; The Negotiable Instrument ACT, 1881, The Payment of Bonus Act 1965, The Foreign Exchange Management Act, 1999.

4. DIRECT TAX LAWS

The Income Tax Act, 1961 and Rules thereunder.

5. INDIRECT TAX LAWS INCLUDING GOODS AND SERVICES TAX & CUSTOMS & FOREIGN TRADE POLICY

Goods and Services Tax (GST) Law as contained in the Central Goods and Services Tax (CGST) Act, 2017 and Integrated Goods and Services Tax (IGST) Act, 2017, Customs Law as contained in the Customs Act, 1962 and the Customs Tariff Act, 1975 and Foreign Trade Policy to the extent relevant to the indirect tax laws.

6. AUDITING AND ASSURANCE

- Auditing Concepts, Auditing and Assurance Standards, Preparation for an Audit, Internal Control, Vouching, Verification of Assets and Liabilities, Company Audit, Audit Report, Special Audit.
- Cost Audit and Record Rules.

**SYLLABUS FOR WRITTEN EXAMINATION FOR THE POST OF
SUPERINTENDING MEDICAL OFFICER (ENT) [POST CODE (MD03)]**

1. EAR:

- Surgical anatomy of Ear (External Ear, Middle Ear, Inner Ear and Facial nerve)
- Physiology of Ear
- Physical and Functional Examination of Ear
- Diseases of External Ear, Middle Ear, Inner Ear, Vestibular labyrinth
- Surgery of Ear: Myringotomy, Grommet insertion, Tympanoplasty, Radical Mastoidectomy, Modified Radical Mastoidectomy, Pre auricular sinus excision
- Pure tone Audiometry

2. NOSE AND PARANASAL SINUSES:

- Surgical anatomy of Nose and Para-nasal Sinuses
- Physiology of Nose and Para-nasal Sinuses
- Examination of Nose
- Diseases of Nose and Para-nasal Sinuses
- Surgery of Nose and Para Nasal Sinuses: Anterior Nasal Packing, Posterior Nasal Packing, Foreign body removal, SMR, Septoplasty, Polypectomy, Functional Sinus Surgery of Nose

3. THROAT AND NECK:

- Anatomy of Oral cavity and pharynx
- Anatomy of Larynx
- Physiology of swallowing and Voice production
- Surgery: Tonsillectomy, Adenoidectomy, Peritonsillar abscess, benign tumor of oral cavity, Foreign body removal, Thyroidectomy, Parotidectomy

Recent Advance:

Coblation in ENT surgery

Skull Base Surgery

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SUPERINTENDING MEDICAL OFFICER (PATHOLOGY) [POST CODE – (MD 04)]**

- Basic Sciences :
- Cell Structure anatomy & histology of various Cells, tissues and organs.
- General pathology
- Recent advances in understanding of process of inflammation and repair
- Basis of genetic diseases immune disorder etc.
- Systemic Pathology
- Cardiovascular: Disorder due to infection inflammation, degeneration and neoplastic influence.
- Respiratory tract: Infection, inflammation, immunological and neoplastic disorders.
- Genital Tract: Disorder of development, influence of hormones etc.
- Hepatobiliary system: Disorder due to development, inflammation immunity metabolic etc.
- Breast, Tumors
- Bones and joints: metabolic and inflammatory disorders.
- Soft tissue
- Hematology:
- Development morphology of blood cells, bone marrow
- Anaemia-deficiency
- Disorder of homeostasis and Coagulation paraproteinemia and plasma cell disorder
- Flow cytometry
- Transfusion medicine :
- Essential of Blood Bank serology and transfusion medicine
- Cytology
- Clinical Pathology
- Microbiology :
- Essential of disinfection and sterility
- Immunology and serology
- Chemical Pathology
- Essential principle of immunochemistry molecular biology, flow cytometry
- Medical Audit
- Recent advances

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SUPERINTENDING MEDICAL OFFICER (OPHTHALMOLOGY)
[POST CODE - (MD 05)]**

- 1) Microsurgery procedures-
 - a). Phaco surgery,
 - b). SICS , e.t.c
- 2) Comprehensive eye checkup (Refraction, slitlamp examination, funduscopy(DO&IDO), A scan, B scan, Glaucoma testing e.t.c)
- 3) Minor OT procedure- Chalazion, Pterygium, Cyst, Foreign body removal, DCT, DCR e.t.c
- 4) Knowledge of investigative procedures and their intervention like OCT, RNFL, FFA e.t.c

SYLLABUS FOR WRITTEN EXAM FOR THE POST OF SUPERINTENDING MEDICAL OFFICER (ORTHOPEDIC SURGEON) [POST CODE – (MD 06)]

- Sports medicine and sports injury.
- Spinal injury assessment and management
- Upper limb and Lower limb – pathologies, assessment and management
- Musculoskeletal tumors
- Paediatric Orthopedics
- Recent advances
- ATLS

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SUPERINTENDING MEDICAL OFFICER (RADIOLOGY) [POST CODE – (MD 07)]**

- Radiation Physics
- Ultrasound Physics
- MRI Physics
- Clinical applications of MRI
- Radiologic anatomy of the whole body
- Radiologic features of different diseases pertaining to various organs of the body
- Radiologic interventions
- Recent advances in Radiology

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SUPERINTENDING MEDICAL OFFICER (PHYSICIAN) [POST CODE - (MD 08)]**

Diseases in General Medicine:

A) Hematology:

- I. Red cell disorders: Approach to a patient with anemia, nutritional, iron deficiency, aplastic, megaloblastic, haemolytic anemia, (special emphasis on thalassemia & sickle cell anemia), hereditary spherocytosis, and anemia of chronic disease, autoimmune hemolytic anemia, paroxysmal nocturnal hemoglobinuria, myelodysplastic syndromes, iron overload, and sideroblastic anaemias.
- II. White cell disorders: Eosinophilia, febrile neutropenia, approach to a patient with splenomegaly & lymphadenopathy, lymphomas, multiple myeloma & related plasma cell disorders, leukemias, hairy cell leukemia.
- III. Bleeding & coagulation disorders: Approach and investigations in patients with bleeding disorders, hemophilia, von willebrand's disease, immune thrombocytopenic purpura, vascular purpuras, henchschonlein purpura, thrombotic thrombocytopenic purpura, disseminated intravascular coagulation, anticoagulant and anti-platelet therapy.
- IV. Miscellaneous: Approach to a patient with thrombosis, blood groups, transfusion related diseases, blood transfusion reactions, blood component therapy, hematological manifestations of systemic diseases, drug induced hematological disorders, hypersplenism, chemotherapy, bone marrow transplantation, thrombophilias, platelet function disorders, estimation of hemoglobin/ total and differential white cell count/ erythrocyte sedimentation rate, preparation and staining of blood smears.

B) Endocrine:

- I. Disorders of glucose metabolism: Glucose metabolism, physiology of insulin & glucagon secretion, glucose tolerance test, diabetes mellitus, insulin preparations, hypoglycemia, glycosuria of causes other than diabetes mellitus, glucagon secreting tumors.
- II. Thyroid gland & its disorders: Iodine metabolism, anatomy & physiology of thyroid gland, thyroid function tests, goiter, hypothyroidism and hyperthyroidism, myxedema, cretinism, thyroid carcinoma, other rare syndromes of thyroid dysfunction.
- III. Disorders of anterior pituitary: Anatomy & physiology of various hormones & their regulation, acromegaly, gigantism, sheehan's syndrome.

- IV. Disorders of posterior pituitary: Anatomy and physiology, diabetes insipidus, syndrome of inappropriate anti-diuretic hormone (SIADH) secretion, obesity.
- V. Disorders of adrenal cortex Regulation of secretion of glucocorticoids, mineralocorticoids & adrenal sex hormones, adrenal insufficiency, Cushing's syndrome, pheochromocytoma.
- VI. Miscellaneous Dwarfism, Frohlich's syndrome, Lawrence Moon Biedel syndrome, anorexia nervosa & bulimia, hypothalamus in health & disease, Conn's disease, gynaecomastia, non-puerperal galactorrhoea, multiple endocrine neoplasia syndromes, hirsutism, adreno-genital syndromes, disorders of sexual differentiation.

C) **Cardio—Vascular System:**

ECG & its interpretation, diagnosis of arrhythmias & their management, Ischaemic heart disease, hypertension, rheumatic fever & rheumatic heart disease, congenital heart diseases, heart failure, pericardial diseases, peripheral vascular diseases, deep vein thrombosis, cardiomyopathies, principles of echocardiography & abnormalities in common disorders, pacemakers, nuclear medicine in cardio-vascular disorders, tumors of the heart, aneurysm & dissection of the aorta, thoracic outlet syndrome.

D) **Respiratory System:**

Approach to a patient of respiratory system involvement, pulmonary function tests, arterial blood gases, bronchoscopy, imaging studies, pulmonary angiography, therapeutic interventions: pulmonary artery embolisation/ video assisted thoracic surgery/ thoracotomy/ mediastinoscopy, diseases of the upper airway including avian influenza, bronchial asthma, occupational lung diseases, pneumoconioses, organic dusts & environmental carcinogens, pneumonia, bronchiectasis, obstructive airways diseases, interstitial lung diseases, diseases of the pleura: effusion/ pneumothorax/ empyema/ haemothorax, air pollution, respiratory failure, adult respiratory distress syndrome, severe acute respiratory syndrome (SARS), mechanical ventilation, mediastinal diseases, infections including tuberculosis, tumors, primary and 3 metastatic carcinomas, hypersensitivity pneumonitis, eosinophilic pneumonias, pulmonary hypertension, sleep apnea, pulmonary thromboembolism, lung transplant.

E) **Nervous System:**

Investigations: lumbar puncture/ cerebrospinal fluid examination/ electroencephalography/ nerve conduction studies.
Epilepsy, cerebrovascular diseases, sub-arachnoid haemorrhage, dementia, extra pyramidal disorders, Parkinson's disease, motor

neurone disease, disorders of cranial nerves, meniers syndrome, benign positional vertigo, diseases of the spinal cord, cranio-vertebral anomalies, tumors of the nervous system, demyelinating diseases, meningitis, infections of nervous system, nutritional and metabolic disorders, central pontine myelinolysis, Wernicke's encephalopathy, alcoholic cerebral degeneration, pellagra, subacute combined degeneration, polyneuropathies, acute and chronic inflammatory demyelinating polyneuropathies, diabetic neuropathies, mononeuritis multiplex, mononeuropathy, leprosy, neuromuscular junction disorders including myasthenia gravis, myopathies (hereditary/ endocrine/ metabolic/ thyroid diseases/ parathyroid diseases/ diabetes mellitis), periodic paralysis, approach to a patient - paralysis, dizziness & vertigo, diplopia, syncope and transient loss of consciousness, involuntary movements, delerium, ataxia, parasthesias & sensory loss, unconsciousness, bowel & bladder abnormalities, progressive supranuclear palsy, dystonia, spinocerebeller ataxia, drug induced movement disorders, inherited ataxia, traumatic injuries, subdural & epidural hematoma, radiation & chemotherapy in treatment of nervous system tumours, subdural empyema, progressive multifocal leucoencephalopathy, subacute sclerosing pan encephalitis, progressive rubella, panencephalitis, kuru, molecular treatment of neurological disorders, disorders of the autonomic nervous system, details of traumatic injuries to skull & spine, hereditary & metabolic disorders of late onset, mitochondrial myopathies, lipid storage disorders.

F) **Infectious Diseases:**

Sepsis syndromes, pyrexia of unknown origin, COVID, infective endocarditis, acute infectious diarrhoeal diseases & food poisoning, infections of the urinary tract, infections of skin/ muscle/ soft tissues, infections in intravenous drug abusers, hospital acquired infections, infection control in hospital, bacterial infections, specific infections: pneumococcal/ staphylococcal/ tetanus/ streptococcal/ diphtheria/ botulism/ gas gangrene/ meningococcal/ gonococcal/ salmonella/ shigella/ vibrio cholera/ brucella/ plague/ syphilis/ mycobacteria/ leptospira/ mycoplasma/ pseudomonas/ helicobacter pylori, viruses: herpes/ varicella/ ebstein barr virus/ cytomegalo virus/ rabies/ respiratory viruses/ influenza/ measles/ mumps/ rubella/ arboviruses, fungal: candidiasis/ aspergillosis/ mucormycosis, parasites: ameobiasis/ giardiasis/ pneumocystis carinii/ malaria/ leishniasis/ cryptosporidium/ microsporidium/ isospora/ filariasis/ neurocysticercosis/ worm infestations, tropical diseases, pancreatitis, osteomyelitis, infections due to bites/ scratches/ burns, tularemia, pertussis, bartonellosis, arenaviruses, moraxella, legionella, nocardia, actinomycetes, borellia, chlamydiae, rickettsia, newer emerging infections: avian influenza, chikungunya, others. HIV/AIDS: Aetiology & pathogenesis, clinical presentations, modes of transmission, universal precautions, opportunistic

infections, management and treatment of the disease, opportunistic infections, complications, antiretroviral therapy, prophylaxis: post exposure and of opportunistic infections, recent advances, historical record.

G) **Hepato-Biliary System:**

Liver function tests, jaundice, hepatitis, cirrhosis of liver, portal hypertension, hepatic encephalopathy, hematemesis, amoebic hepatitis, granulomatous hepatitis, hydatid cyst, primary and metastatic carcinomas, liver transplant, gall bladder diseases: cholelithiasis/ cholecystitis/ diseases of bile-duct/ cholangiocarcinoma.

H) **Gastrointestinal Tract:**

Peptic ulcer disease, gastrointestinal bleeding, gastritis, endoscopy, radiological procedures, infections, inflammatory bowel disease, functional gut disorders, motility disorders, malabsorption syndromes, pancreatitis, cystic fibrosis, malignancy.

I) **Kidney:**

Renal failure, renal replacement therapies, hematuria, proteinuria, polyuria, oliguria, anuria, contrast nephropathy, urinary tract infections, glomerulonephritis, nephritic syndromes, tubulo-interstitial diseases, kidney in systemic diseases, tumours of the urinary tract, renal calculous disease, barter's syndrome, fabry's disease, malignancy.

J) **Geriatric Medicine:**

Theories of ageing, demographic patterns (world / Asia / India) and their significance to health care system, physiological changes in the elderly, diseases in elderly, pharmacotherapy in the elderly, rehabilitation, physiotherapy, occupational therapy, psychotherapy, legal aspects (elderly abuse), psychiatric illnesses in elderly population, geriatric assessment, geriatric emergencies.

K) **Granulomatous Diseases:**

Tuberculosis, leprosy, syphilis, sarcoidosis, Wegener's granulomatosis, histoplasmosis, coccidioidomycosis, mucocutaneous leishmaniasis, midline granuloma, lymphomatous granuloma, pseudotumor of the orbit.

- L) **Ethical & Legal Issues in Medicine**
Importance and procedures of informed consent, emergency & life saving intervention & treatment, information to be given to patient & relatives, rights of patients including confidentiality, withdrawing life support systems, organ transplant from cadaver, euthanasia, consumers protection act, clinical decisions for a patient who lacks decision of signing of will, ethics committee & its role in medical research, procedures (medico legal) followed in cases of poisoning, suspected rape, adverse reaction to drugs and interventions, absconded patients, inhospital injuries and suicide, treatment of pregnant patients with drug and interventions likely to cause fetal harm, cloning, stem cells usage and preservation, crimes performed by addicts.
- M) **Poisonings**
Diagnosis and management of specific and unknown poisonings, universal & specific antidotes, acids and alkalis, kerosene, petroleum products, organophosphates and carbamates, household disinfectants, mosquito repellants, aluminium phosphide, zinc phosphide, yellow phosphorus, heavy metals, paracetamol, barbiturates, snake and scorpion bites, botulism, drug 5 overdoses, international classification of poisonous chemicals, environmental hazards and poisonings, industrial toxicology, toxidromes, nuclear, biological, chemical warfare.
- N) **Pregnancy Medicine**
Maternal & foetal physiology, principles of maternal morbidity & fetal outcome, medical disorders during pregnancy, infections in pregnancy, metabolic disorders, hyponatremia, thyroid disorder, hypertension and eclampsia, renal failure, disseminated intravascular coagulation, diabetes, valvular heart disease, bronchial asthma, cardiomyopathies, jaundice, HIV/AIDS, hypercoagulable state and its sequelae and complications, cortical venous sinus thrombosis in pregnancy, postpartum sepsis, amniotic fluid embolisation, Epilepsy, drugs in pregnancy, poisonings in pregnancy, smoking, alcoholism, surgery and pregnancy, psychiatric diseases in pregnancy, medical disorders and infertility, genetic disorders & genetic counseling, ethical issues in pregnancy (brain death).
- O) **Radiology**
Roengenograms of chest/ abdomen/ spine/ skull/ paranasal sinuses/ bones and joints, computerized tomography (CT) and magnetic resonance (MR) imagings, imaging techniques for hepatobiliary system, barium studies, ultrasound, color doppler, developing and newer imaging techniques.

P)

Disorders Bone & Mineral Metabolism

Calcium and phosphorous homeostasis, parathyroid gland disorders, vitamin-D in health & disease, metabolic bone disease, osteoporosis, osteomalacia, endocrine hormonal influences on bone metabolism, phosphorus metabolism, hypophosphatemia, hyperphosphatemia, disorders of magnesium metabolism, Pāget's disease of bone, osteomyelitis, bone dysplasias, osteoarthritis, spondylosis, bone in systemic diseases.

Q)

Immunology

Normal immune system and its functions, hypersensitivity reactions, T-cell mediated diseases, mechanism of tissue damage, cytokine mediated injury, cytokine inhibitors, interaction of T and B cells, complement system, apoptosis, immunotherapy, immunomodulators, immunosuppressive agents, monoclonal antibodies, stem cell transplant in immune disorders, HLA system, primary immune deficiency diseases, amyloidosis, disorders of immediate type hypersensitivity, biological response modifiers, immunologically mediated skin disorders.

R)

Rheumatology

Pathophysiology of inflammation, autoantibody relevance in disease processes, rheumatoid arthritis including extra articular manifestations, glucocorticoid therapy in connective tissue diseases, systemic lupus erythematosus (SLE), organ targeted therapy, vasculitides, ankylosing spondylitis, reactive arthritis, undifferentiated spondyloarthropathy, polyarteritis nodosa, Wegener's granulomatosis, Churg Strauss disease, Takayasu's arteritis, cutaneous 6 vasculitis, imaging techniques in systemic vasculitis, approach to acute and chronic monoarthritis & polyarthritis, diagnostic imaging in joint disease, crystal arthropathies, gout, infectious arthritis, infections in patients with connective tissue diseases, antiphospholipid antibody syndrome (APLA), drug induced rheumatic diseases, scleroderma, sarcoidosis, fibromyalgias, haemophilic arthropathy, dermatomyositis, polymyositis, overlap syndromes, sjogrens syndrome, calcium oxalate deposition disease, psoriatic arthritis, neuropathic joint disease, osteoarthritis.

S)

Fluid & Electrolytes

Choice of intravenous fluids, plasma expanders, potassium/ calcium/ sodium/ magnesium/ phosphate disorders, acid base balance and disorders.

T)

Critical Care

Cardio-pulmonary resuscitation, non-invasive and invasive cardiovascular monitoring, circulatory failure, heart failure, acute myocardial infarction, pulmonary embolism, respiratory failure, pulmonary aspiration, nosocomial pneumonia, mechanical ventilation, toxicology, renal failure, status epilepticus, Guillian Barre syndrome, myaesthesia, use of blood products, intravenous immunoglobulins, plasmapheresis, hyperthermia, hypothermia, diabetic ketoacidosis, addisonian crisis, myxedema coma, endotracheal intubation, pacemakers, strokes, subarachnoid haemorrhage, near-drowning, circulatory and ventilatory support in adult respiratory distress syndrome (ARDS), asthma, obstructive airways disease, renal replacement therapy.

U)

Emergency Medicine

Basic and advanced life support, disaster management, use and maintenance of equipment used in life support, acute severe asthma, status epilepticus, poisonings, heart failure, shock, acute myocardial infarction, angina, arrhythmias, hypertensive emergencies, medical emergencies in pregnancy, gastro-intestinal bleeding, hepatic encephalopathy, acute gastroenteritis, hemoptyses, obstructive airways disease, tension pneumothorax, adult respiratory distress syndrome (ARDS), respiratory failure, corpulmonale, stroke, subarachnoid haemorrhage, oliguria/ anuria, coma, pneumonia, meningitis, infections, sepsis syndromes, multi-organ failure, bleeding manifestations, endocrine emergencies, electric shock, poisonings, snakebite, scorpion stings, anaphylaxis, nuclear/ biological/ chemical exposures, toxidromes, rabies, burns, strangulation, interventions and procedures: mechanical ventilation/ temporary cardiac pacing.

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR MEDICAL OFFICER [POST CODE – (MD 09)]**

MEDICINE

1. Nutritional and Metabolic disorders
2. Water, Electrolyte and Acid-Base imbalance
3. Critical Care Medicine: Shock, Respiratory failure, Renal failure, Coma, Sepsis, DIC
4. Poisoning: Chemicals and Pesticides, Snake bite and envenomation, bites by scorpion/ spider
5. Specific Occupational and Environmental Hazards
6. Infectious Diseases
7. Cardiovascular System: Chest pain, Atrial Fibrillation, CCF, Rheumatic Heart Disease, Ischaemic Heart Disease, Hypertension , Atherosclerosis.
8. Respiratory Diseases: Cough, Dyspnoea, Haemoptysis, Respiratory Failure, RTI, Br. Asthma, COPD, Pulmonary Tuberculosis, Suppurative Lung Diseases
9. Occupational Lung Diseases
10. Nephrology: UTI, Haematuria, ARF, CRF, Glomerulonephritides
11. GIT: Diseases of the mouth, esophagus (Eg. GERD), stomach (Eg. Gastritis, PUD, Tumors) and duodenum, small intestine, colon and rectum
12. Pancreas: Acute and Chronic Pancreatitis
13. Liver and Biliary Tract disease: Jaundice, PHF, Portal HTN and ascites, Hepatic Encephalopathy, Hepatorenal failure, Liver abscess, Viral Hepatitis, Alcoholic Liver Disease
14. Endocrinology and Metabolism : Type 2 Diabetes mellitus, Thyroid Disorders
15. Haematology: Anaemias, Myeloproliferative Disorders, Blood products and transfusion , Haematological Malignancies
16. Disorders of Immune system, Connective Tissue and Joints: HIV, AIDS, Osteoarthritis, Sarcoidosis, Amyloidosis, Systematic Connective Tissue disorders like SLE, RA
17. Neurology: Headache, CVA, Seizure disorders, Meningitis, Viral Encephalitis, Peripheral Neuropathy, Parkinsons' Disease

SURGERY

1. SKIN: Ulcers and Wounds, Burns, Skin infections (Boils, Carbuncles, abscess), cysts, skin tumours
2. ESOPHAGUS: Dysphagia, reflux, Hiatus Hernia, Tumours
3. BREAST: Fibroadenoma, Breast abscess, Carcinoma breast
4. STOMACH AND DUDENUM: Peptic Ulcer, Carcinoms stomach, gastritis
5. SMALL INTESTINE: Small bowel obstruction, Intestinal Tuberculosis
6. Acute appendicitis
7. ANUS: Haemorrhoids, Fissure-in-ano, Anorectal abscess
8. Biliary tract: Gall stone Disease
9. Pancreas: Acute Pancreatitis
10. Acute abdomen
11. Hernia
12. Common urological disorders; Calculi, Hydrocoele, Epididymo-orchitis

OBSTETRICS AND GYNAECOLOGY

1. Physiology of pregnancy
2. Diagnosis of pregnancy
3. Routine antenatal care
4. Management of common symptoms of pregnancy
5. Hypertensive disorders of pregnancy
6. Anaemia of pregnancy
7. Ante partum haemorrhage
8. IUGR
9. Rh -ve pregnancy
10. Puerperium and its complications
11. Menstrual cycle and common menstrual disorders
12. Fibroid uterus
13. Precancerous lesions of the female genital tract
14. Carcinoma cervix, endometrium and ovary
15. Contraception
16. Menopause and related problems

PAEDIATRICS AND NEONATOLOGY

1. Care of the newborn
2. Neonatal resuscitation
3. Detection of neonatal malformations
4. Neonatal sepsis
5. Neonatal Hyperbilirubinaemia
6. Management of common neonatal problems
7. Immunization
8. Growth and Development
9. Nutrition

GENERAL KNOWLEDGE AND CURRENT AFFAIRS

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (ELECTRICAL) [POST CODE – (EE 11)]**

Sl. No	Topic	Description
1	Circuits And Networks	Circuits and Networks, Two port network, Magnetically coupled circuit, Graph Theory, Application of Laplace Transform, Frequency Response, Fourier Analysis, Filter Circuits, Toport Network
2	Electromagnetic Field Theory	Vector Analysis, Electrostatics, Magnetostatics, Electromagnetic field, Materials and fields, Electromagnetic waves
3	Analog Electronics	Review of PN junction diode, Linear Wave Shaping, Bipolar Junction Transistor, MOSFET, BJT configuration, Multi-stage Transistor Amplifiers, Operational Amplifiers, Introduction to Feedback Amplifiers,
4	Electrical Measurement And Measuring Instruments	Introduction, Galvanometers and dynamics, Magnetic measurements, Bridges for measurements, Potentiometers, Measurement of power, power factor and energy,
5	Power System-I	Introduction to Power Plants, Economics of Power Systems, Transmission Systems, Distribution Systems, Line Constants, Mechanical Design, Underground Cables
6	Signals And Systems	Introduction to signals and systems, Introduction to system, Representation of signals, Statistical Signal Analysis,
7	Electrical Machines-I	Constructional features, Electric circuit, Insulation system, Cooling circuit, Supporting structure, Magneto-motive force, Electromotive Force, DC Generators, DC Motors, Transformer, Polyphase Induction Motor, Linear Induction Motors
8	Digital Electronics	Logic Families and Logic Gates, Number Systems and Codes, Sequential Logic Circuits, Combinational Logics, Semiconductor Memories, Introduction to ADCs
9	Electrical Machines -II	Synchronous Machines, Synchronous motors, Solid state slip power recovery schemes for induction motor, Single phase commutator motors, Single phase Induction Motors, Stepper Motor
10	Control System - I	Motivation, Models and physical systems, Time domain analysis, Root locus analysis, Frequency domain analysis, Controller/ Compensator Design, Compensator design
11	Power System-II	Performance of overhead transmission lines, Power system stability, Control of active and reactive power, Economic operation of steam Power plant, Elements of Hydrothermal co-ordination, Transients in power systems
12	Microprocessor And Microcontroller	Introduction, Microprocessor architecture, Programming microprocessors, Memory interfacing, Data transfer techniques and their implementation, Microcontrollers, Common peripherals and their interfacing, Important features of some advanced microprocessor, Applications of Microprocessors
13	Control System-II	Introduction to Digital Control, State Space Representation of Continuous Time and Discrete time systems, Introduction to nonlinear feedback control systems

14	Power Electronics	Introduction, Device characteristics, protection and operation, Phase controlled rectifiers, Choppers, Inverters, AC Voltage Controller, Cyclo converters, Applications
15	Switchgear And Industrial Protection	Symmetrical Fault Analysis, Symmetrical components and Unsymmetrical Fault Analysis, Neutral Grounding, Circuit Breakers, Protective Relays, Sub-Station, Lightning Arrester
16	Programming And Data Structure	Introduction to Programming, Linear Data Structures, Recursion, Non-linear Data Structure, Hashing, Sorting and Searching Algorithms, File Structures
17	Instrumentation	Introduction, Analytical Instrumentation, Transducers & sensors, Non-destructive testing equipment, Data transmission & telemetry, Fiber optical instrumentation, Related topics
18	Digital Signal Processing	Discrete-Time Signals & Systems, Transforms, Sampling, Transform Analysis of LTI System, Structures for Discrete-time Systems, Filter Design Techniques, Discrete Fourier Transforms, Efficient Computation of DFT, Multi-rate signal processing, VLSI implementation, Applications of Signal Processing
19	Industrial Drives	Introduction, Dynamics of Electrical Drives, Selection of Motor Power Rating, Starting, Electric Braking, Control of Electrical Drives, Control of DC Drives, Control of Induction Motor Drives, Industrial Applications
20	Analog & Digital Communications	Introduction, Representation of signals and systems, Continuous Wave modulation, Random Variables and Stochastic Process, Sampling and Pulse modulation, Digital Communication, Introduction to Information Theory
21	High Voltage AC/DC	Breakdown mechanism of gases, Liquid and solid materials, Electrical properties of high vacuum, Over voltage phenomenon & Insulation co-ordination, High voltage generation, Measurement of High voltage & currents, High voltage Equipment, High voltage Testing and testing techniques, Design, planning and layout of high voltage laboratory, Introduction to EHV. System & EHV lines
22	Flexible AC Transmission System	Concepts of reactive power support and voltage stability, compensation at a bus and over a line. Synchronous condenser, static var compensation, static phase shifter, thyristor controlled switched capacitor, STATCONs and DVRs, Unified Power Flow Controller, Inter-line Power Flow Controller. Reactive power balance over a network and optimization.
23	High Power Semiconductor Devices	Power semiconductor devices, Converter operation, D.C. line commutation, Frequency conversion
24	Higher Control System	Optimal Control, Adaptive Control, Self-tuning control, Model Reference adaptive systems (MRAS), Real Time System Design, Fault Detection and Diagnosis of Dynamical System, Hardware Redundancy, Analytical Redundancy, Design of Detector, Electronic Instrumentation System Design,
25	Electrical Engineering Materials	Dielectrics, Behaviour of dielectrics in alternating fields, Magnetic Properties of materials, Conductors, Properties of Semiconductors, Conducting materials, Insulating materials.
26	Smart Grid	Basic Power Systems, Renewable Generation, Power System Economics, Smart Grid, Smart Grid Communications, Demand Side Management, Wide Area Measurement, Security and Privacy

27	Industrial Management	Industrial Engineering, Project management, Management, Organization, Material management, Production planning and control, Quality Control, Plant maintenance, Human Resource management
28	Computer Applications In Power System	Elementary linear graph theory, Different methods of solution of Linear and non-linear algebraic equations: Central Computer Control and Protection
29	Intelligent Algorithms For Power Systems	Introduction to Artificial Neural Networks (ANNs), multilayer feed-forward networks, back-propagation training algorithm, radial basis function and recurrent networks. ANN based algorithms for load flow analysis, economic load dispatch, load forecasting, transient stability, and power system stabilizers. Introduction to genetic algorithms, Application of genetic algorithms for power system optimization.
30	Advanced Power Electronics And Devices	Resonant DC – DC converters: operation, characteristics, design equations, control techniques and application; SMPS: Forward, fly back, push pull operation, characteristics, design and control techniques; Current controlled PWM; Voltage source inverters – Bang-bang, SPWM and space vector modulation techniques; Resonant DC link voltage source inverters – operation characteristics, design and control; Non drive applications of power electronic inverters: UPS, induction heating, metal cutting, active power line conditioning; Drive application of inverters: Vector controlled and slip power controlled induction motor drive, self-controlled synchronous motor drive – constant power factor and constant margin angle control; Permanent magnet synchronous motor drive, stepper motor drive and switched reluctance motor drive; Application of microprocessor, PC and DSP in machine drives – example with DC motor drive.
31	Power Electronic Control Of AC Drives	AC Machines for Drives, Control and Estimation of Induction Motor Drives, Vector or Field Oriented Control of Induction motor drives, Control and Estimation of synchronous motor drives, Brushless DC motor drives
32	Advanced Engineering Mathematics	Linear Algebra, Complex variable, Calculus, Vector Analysis, Linear Programming, Transform Calculus, PDE
33	Integrated Circuits And VLSI Design	MOS transistor (enhancement and depletion). Basic inverter in NMOS and CMOS technology, E/D logic. Gates in NMOS and CMOS technology. Pass transistor. Introduction to NMOS and CMOS design methodology. Design rules, stick diagrams, poly-cell and gate array approaches. Examples of cell design. Software tools for design. Circuit and logic simulation. Layout generation and verification.
34	Restructured Electrical Power System	Overview of key issues in electric utilities restructuring, Open Access Same Time Information System, Tagging Electricity Transactions, Electric energy trading, Hedging tools for managing risk in electricity markets
35	Electric Power Utilisation And Traction	Traction System, Power Supply System for Track Electrification, Power Supply Arrangement, Overhead Equipment, Traction Mechanics and its applications, Electric Heating, Illumination,
36	Smart Sensors	Smart sensors fundamentals, Smart sensors, Sensor networks

		architectures, Communication protocols, Energy management, Security, reliability and fault-tolerance, Sensor networks standards; platforms and tools
37	Opto-Electronics And Fiber Optics	Elements of Light And Solid State Physics, Display Devices and Lasers, Optical Detection Devices, Optoelectronic Modulator, Optoelectronic Integrated Circuits, Optical Fibers
38	Renewable Energy Sources And Management	Introduction, Solar Radiation, Low Temperature collectors, Applications of solar energy, Bioconversion, Wind energy, Other energy sources, Energy Management & Conservation
39	Distribution System Planning And Automation	Configuration of distribution systems, load characteristics, distribution transformers, distribution substation design, feeder design, voltage regulation, protection in distribution systems, SCADA, distribution automation.
40	Demand Side Management	The concepts of demand-side management (DSM) for electric utilities, DSM alternatives and goals. End-use equipment and control, utility equipment control, energy storage, dispersed generation, customer DSM promotions. Performance improvement equipment and system benefit/cost analysis of DSM alternatives: issues in forecasting DSM programme impacts. Implementation of DSM programme: pricing and incentives.
41	Advance Electrical Machines	Elements of Generalized Theory, Linear Transformation in Machines, D.C. Machines - Transient & Dynamic Performance, Transfer & Function, Poly-phase Synchronous Machines, Poly-phase Induction Machines, Fractional Kilowatt Motors
42	Modelling And Simulation	System Models and Role of Simulation, Statistical Tool, Discrete Event Simulation, Modelling and Performance Evaluation of Computer Systems, Continuous System Simulation, Virtual Reality Modelling, Verification and Validation of Simulation Models
43	Illumination Technology	Radiation, colour, eye & vision; Different entities of illuminating systems; Light sources; incandescent, electric discharge, fluorescent, arc lamps and lasers; Luminaries and light guides, control of light, control circuitry and computer based lighting control. Laws of illumination; illumination from point, line and surface sources. Photometry and spectrophotometry; Photocells. Environment and glare. General illumination design. Interior lighting-industrial, residential, office departmental stores, indoor stadium, theatre and hospitals. Exterior lighting - flood street, aviation and transport lighting, lighting for displays and signalling-neon signs, LED-LCD displays beacons and lighting for surveillance.
44	Power Qualities	Overview and definition of power quality (PQ). Sources of pollution. International power quality standards, and regulations, Power quality problems: rapid voltage fluctuations, voltage unbalance, voltage and voltage swells, short duration outages. Power system harmonics: harmonic analysis, harmonic sources – static converters, transformer magnetization and non-linearities, rotating machines, arc furnaces, fluorescent lighting. Harmonic effects within the power system, interference with communication. Harmonic measurements. Harmonic elimination

		- harmonic filters.
45	Reliability And Maintainability Engineering	Basic reliability model, Constant failure rate model, Time dependent failure models, Reliability of systems, State-Dependent Systems, Physical reliability models, Design of reliability, Maintainability, Design of Maintainability, Availability
46	Foundation In Optimization Methods	Introduction, Classical Optimization Techniques, Linear Programming, Non linear Programming, Constrained Optimization, Integer Programming. Non traditional Optimization Algorithm
47	Biomedical Engineering	Introduction to Biomedical Instrumentation, Cardio-vascular System and Electrocardiography, Biomedical recorders, Implantable Bio-electric devices, Patient Care and monitoring, Biotelemetry, Medical Imaging, Computers in Biomedical Instrumentation, Related topics
48	Hydro-Electric Engineering	<p>Essential Features of Hydro-Electric Power Plant. Classification of Hydro-Electric Power Plants. Hydrology, Hydrologic Cycle, Hydrograph, Flow duration curve.</p> <p>Size of plant and choice of units. Types of Turbine and their characteristics. Design of Main Dimensions of turbines. Draft tubes, types, setting and preliminary dimensions.</p> <p>Pumped storage schemes. Mini and Micro Hydro Power Plants. Selection of turbine and pump capacities, Pumping schedule. Operation and efficiency of Pumped storage schemes.</p> <p>Cost evaluation of hydro-electric plant. Co-ordination of different types of Power Plant in power system. Economic loading of hydro-power plants. Hydro-thermal mix. Types of Underground Power Plants. Largest Underground Power Plant. Elementary idea of the use of computers in power stations. Load dispatching. Power system security. Load forecasting. Generation allocation control. Generation system reliability</p>
49	Soft Computing Techniques And Applications.	<p>Introduction to soft computing, intelligent decision system, overview of soft computing techniques.</p> <p>Introduction to genetic algorithm, genetic operators and parameters, genetic algorithms in problem solving, theoretical foundations of genetic algorithms, evolutionary programming, particle swarm optimization, differential evolution; implementation issues and applications.</p> <p>Neural model and network architectures, perceptron learning, supervised hebbian learning, backpropagation, associative learning, competitive networks, hopfield network, computing with neural nets and applications of neural network. case-based reasoning (CBR), applications of CBR.</p> <p>Introduction to fuzzy sets, operations on fuzzy sets, fuzzy relations, fuzzy measures, applications of fuzzy set theory to different branches of science and engineering.</p>
50	Database Management System	Introduction, Entity-Relationship Model, Relational Model, SQL and Integrity Constraints, Relational Database Design, Internals of RDBMS, File Organization & Index Structures

51	EHV Transmission	Introduction to EHV AC Transmission, Calculation of line & Ground parameters, Voltage gradient of conductors, Corona Effect – 1, Corona effect - 2 (Radio interference), Electrostatic field of EHV lines, DC Power Transmission Technology, Thyristor Valves, Analysis of HVDC converters, Converter & HVDC System Control
52	Computer Organisation And Architecture	Introduction, Processor Design, Controller Design, Memory Organization, Input – Output Processing, Peripheral System, Introduction to Operating System
53	Intelligent And Knowledge Based Systems	Problem solving: state space representation, problem reduction, constraint satisfaction networks. Heuristics. Knowledge Representation, Predicate calculus, resolution-refutation, Prolog. Rule based systems: forward and backward chaining. Handling of uncertainty: probabilistic techniques, fuzzy logic. Reasoning with incomplete information: non-monotonic reasoning. Elements of temporal logic. Diagnostic reasoning. Structured Knowledge Representation Schemes: Semantic networks, Frames, Inheritance and default reasoning. Expert Systems: Architecture of the expert systems. Expert system shells. Knowledge acquisition. Consistency of the knowledge base. Case studies. Distributed AI and agent based systems.
54	Renewable Energy	Introduction to Non-conventional energy sources, Solar Energy, Photovoltaic Energy Conversion, Wind Energy, Fuel Cell, Energy from bio-mass, Geo thermal Energy, Energy from the ocean, Magneto Hydro Dynamic Generation ,Combined Operation utilizing more than one source, composite systems
55	Utilization & Conservation of Electrical Energy	Electric Heating, Electric Welding, Electric traction, Energy Storage, Electrical Losses & Energy Conversion
56	Digital Image Processing	Human Visual System and Image perception, Image Transforms, Image enhancement, Spatial filtering, Image Restoration, Image Compression, Image Segmentation, Representation and Description, Applications of Digital Image Processing
57	Reliability Engineering	Introduction to Reliability Engineering, Reliability Mathematics, Concepts of Reliability, System Reliability Evaluation, Availability Analysis, Maintained Systems, Economics of Reliability Engineering

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (HR) [POST CODE – (HR 12)]**

Unit - I

Principles and Practices of Management: Development of management Thought, Contributions of Taylor, Fayol, Mayo, Mary Parker Follett and C.I. Barnard. Behavioural Approach, Systems Approach, Quantitative Approach and Contingency Approach. Function of Management: Planning and Decision Making, Organising, Staffing, Directing, Controlling, Coordinating.

Unit - II

Human Resource Management: Conceptual framework, Human Resource Planning, Job Analysis, Recruitment, Selection, Placement, Induction, Training and Development, Performance Management, Job Evaluation, Compensation Management, Employee Benefits and Incentives, Managing Career. New Trends in HRM: Changing environment of HRM and contemporary challenges, Emerging HRM Concepts.

Unit - III

Human Resource Development (HRD): Concepts, Assumptions, Values, HRD Mechanisms, Action – research Model, HRD Culture and Climate, HRD Interventions, HR Accounting and Audit, Consultant – client relationship, Knowledge Management, Human Resource Information System. International Human Resource Management (IHRM): Organisational context of IHRM, IHRM and Sustainable Business, Functions of IHRM, Cross – Cultural Studies, Cultural Diversity, Transnational Organisations, IHRM models.

Unit - IV

Organisational Behaviour: Concept, Scope, Nature of human behavior, Personality, Perception, Learning, Attitude, Motivation, Interpersonal Behaviour, Group Dynamics, Leadership, Communication, Power and Authority, Stress, Organisational Change and Development.

Unit - V

Industrial Relations: Concept, Scope, Evolution, Approaches, Actors and Models, Conflict and cooperation, Bi-partitism, Tri-partitism, Collective Bargaining, Workers' Participation in Management, Grievance Handling and Disciplinary Action, Code of Conduct, Industrial Relations in changing scenario, Employers' organisations. Trade Unions: Concepts, Evolution, Problems of trade unions in India, Recognition, The Trade Unions Act, 1926. Emerging role of trade unions in India.

Unit - VI

Industrial Disputes: Factors, Forms, Trends, Prevention and Settlement, Role of State and Central Labour Administration, Strikes and Lockouts. The Industrial Employment (Standing Orders) Act, 1946. The Industrial Disputes Act, 1947.

Unit - VII

Labour Legislation: Objectives, Principles, Classification and Evolution. International Labour Organisation, Social Justice and Labour Legislation, Indian Constitution and Labour Laws. • The Factories Act, 1948. • The Mines Act, 1952. • The Inter-state Migrant Workmen (Regulation of employment and conditions of service) Act, 1979. • The Contract Labour (Regulation and Abolition) Act, 1970. • The Building and other Construction workers (Regulation of employment and conditions of service) Act, 1996. • The Child Labour (Prohibition and Regulation) Act, 1986.

Unit - VIII

Wages: Concept, Types, Factors influencing wages, Wage Theories and Wage Differentials • The Minimum Wages Act, 1948. • The Payment of Wages Act, 1936. • The Payment of Bonus Act, 1965. • The Equal Remuneration Act, 1976. • The Payment of Gratuity Act, 1972. • The Employees' Provident Fund and Miscellaneous Provisions Act, 1952.

Unit - IX

Labour Welfare: Concept, Scope, Types, Theories and Principles, Industrial Health and Hygiene, Industrial Accidents and safety, Occupational Diseases Social Security: Concept and Scope, Social Assistance and Social assurance.

Unit - X

Labour Market: Features, Demand and Supply of Labour, Nature and Composition of Indian Labour Force, Unemployment and Underemployment, Types of Labour Market, Characteristics of Indian Labour Market, New Dynamics of Labour Market in India, Economic Systems and Labor Market, Problems of Labour in India.

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (LEGAL) [POST CODE - LL (13)]**

Sl No.	Subjects
1	Constitution Of India
2	Indian Penal Code, 1860
3	Labour And Industrial Laws
4	Land Laws of the State of Assam
5	The Arbitration and Conciliation Act, 1996
6	The Code of Civil Procedure, 1908
7	The Code of Criminal Procedure, 1973
8	The Companies Act, 2013
9	The Indian Contract Act, 1872
10	The Indian Evidence Act, 1872
11	The Indian Partnership Act, 1932
12	Environmental Laws
13	The Right to Information Act, 2005
14	Transfer to Property Act, 1882

SYLLABUS FOR WRITTEN EXAM FOR THE POST OF SENIOR OFFICER
(MECHANICAL) [POST CODE – (ME 14)]

- **Theory of Machines:**

Displacement, velocity and acceleration analysis of plane mechanisms; dynamic analysis of linkages; cams; gears and gear trains; flywheels and governors; balancing of reciprocating and rotating masses; gyroscope'.

- **Machine Design:**

Design for static and dynamic loading; failure theories; fatigue strength and the S-N diagram; principles of the design of machine elements such as bolted' riveted and welded joints; shafts, gears, rolling and sliding contact bearings' brakes and clutches' springs.

- **Vibrations:**

Free and forced vibration of single degree of freedom systems' effect of damping; vibration isolation; resonance; critical speeds of shafts'.

- **Engineering Mechanics:**

Free-body diagrams and equilibrium; trusses and frames; virtual work; kinematics and dynamics of particles and of rigid bodies in plane motion; impulse and momentum (linear and angular) and energy formulations, collisions.

Mechanics of Materials: Stress and strain, elastic constants, Poisson's ratio; Mohr's circle for plane stress and plane strain, thin cylinders; shear force and bending moment diagrams; bending and shear stresses; deflection of beams; torsion of circular shafts; Euler's theory of columns; energy methods; thermal stresses; strain gauges and rosettes; testing of materials with universal testing machine; testing of hardness and impact strength.

- **Engineering Materials:**

Structure and properties of engineering materials, phase diagrams, heat treatment, stress-strain diagrams for engineering materials.

Casting, Forming and Joining Processes: Different types of castings, design of patterns, moulds and cores; solidification and cooling; riser and gating design. Plastic deformation and yield criteria; fundamentals of hot and cold working processes; load estimation for bulk (forging, rolling, extrusion, drawing) and sheet (shearing, deep drawing, bending) metal forming processes; principles of powder metallurgy. Principles of welding, brazing, soldering and adhesive bonding.

- **Machining and Machine Tool Operations:**

Mechanics of machining; basic machine tools; single and multipoint cutting tools, tool geometry and materials, tool life and wear; economics of machining; principles of non-traditional machining processes; principles of work holding, design of jigs and fixtures.

- **Metrology and Inspection:** Limits, fits and tolerances; linear and angular measurements; comparators; gauge design; interferometry; form and finish measurement; alignment and testing methods; tolerance analysis in manufacturing and assembly.
- **Production Planning and Control:** production planning, scheduling, materials requirement planning.
- **Fluid Mechanics:** Fluid properties; fluid statics, manometry, buoyancy, forces on submerged bodies, stability of floating bodies; control-volume analysis of mass' momentum and energy; fluid acceleration; differential equations of continuity and momentum; Bernoulli's equation; dimensional analysis; viscous flow of incompressible fluids, boundary layer, elementary turbulent flow, flow through pipes' head losses in pipes, bends and fittings, Different types of pumps.
- **Thermodynamics:** Thermodynamic systems and processes; properties of pure substances, behavior of ideal and real gases zeroth law, and first laws of thermodynamics' calculation of work and heat in various processes; second law of thermodynamics; thermodynamic property charts and tables, availability and irreversibility; thermodynamic relations'.
- **Power Engineering:** Air and gas compressors; vapour and gas power cycles, concepts of regeneration and reheat and I.C Engines: Air-standard Otto' Diesel and dual cycle, refrigeration and air conditioning: Vapour and gas refrigeration and heat pump properties of moist air, basic psychrometric processes'
- **Turbo machinery:** Impulse and reaction principles' velocity diagrams' Pelton-wheel' Francis and Kaplan turbines.

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (INSTRUMENTATION) [POST CODE – (INS 15)]**

1. MEASUREMENT

- a) Basic measurement concept — Accuracy, linearity, repeatability, hysteresis, dead band, backlash, error.
- b) Classification of Transducers: Resistive, Capacitive, Inductive transducers, Hall Effect sensors, magneto elastic transducers, solid state sensors, eddy current transducers, PiezoElectric transducers, photo electric transducers.
- c) Applications of Diaphragms, Bellows, Bourdon Tubes, Springs
- d) Semiconductor sensors, sources and detectors, LED, laser, Photo-diode, photo-resistor and their characteristics, load cells, LVDT, gas sensors, density, viscosity, moisture and humidity measurements
- e) Electrical and Electronics Measurements: Bridges and potentiometers, measurement of R, L and C. Measurements of voltage, current, power, power factor and energy. A.C & D.C current probes. Extension of instrument ranges. Q-meter and waveform analyzer. Serial and parallel communication. Shielding and grounding.

2. INDUSTRIAL INSTRUMENTS

- a) Temperature measurement: Thermocouple, Resistance Temperature Detector, Thermistor and its measuring circuits, Radiation pyrometers and thermal imaging.
- b) Pressure measurement: Transmitter definition types, Mechanical, Electro-mechanical and electronic pressure measuring instruments. Manometers, Elastic types, Bell gauges, Bellows; Bourdon tubes; Vacuum measurement. Differential Pressure transmitters, Dead weight Pressure gauges. Low Pressure Measurement.
- c) I/P and P/I Converters
- d) Level measurement: Differential pressure level detectors, Displacement type Level Detectors, Capacitance level sensor, Ultrasonic level detectors and Radar level transmitters and gauges.
- e) Flow measurement: Classification of flow meters, Head Type (Orifice), differential pressure and variable area flow meters, anemometers, Positive displacement flow meters, Electro Magnetic flow meters, Ultrasonic flow meters, vortex flow meters.
- f) Measurement of mass flowrate - Radiation, angular momentum, impeller, turbine, constant torque hysteresis clutch, twin turbine, Coriolis, gyroscopic. Target flowmeters, V-cone flowmeters, Multiphase flow measurement
- g) Pneumatic Instrumentation - Air filter, Pressure regulator, Servo valve, Relay, Amplifier, Controller
- h) Recorders: Different types of recorders; Construction, working principle and circuit diagrams of Strip-chart & X-Y recorders

- i) Miscellaneous measurement: Ammeter, Voltmeter, Digital Multimeter, Ohmmeter, Cathode Ray Oscilloscope, Vibration meters, pH meters, Dew Point Meters, Viscosity, Humidity & Density.
- j) Different chromatography techniques — Gas chromatography — Detectors — Liquid chromatographs — Applications
- k) Calibration of Instruments
- l) Concept of live zero (4-20 mA and 3-15 psi)

3. CONTROL SYSTEM AND PROCESS CONTROL

- a) Process & process control systems; Objectives & requirements; Classification & selection of process variables; Sources & nature of disturbances; Response of first and second order systems due to load change at arbitrary points with P, I, P-I and P-I-D controllers
- b) On-off, cascade, P, I, P-I, P-ID, feed forward and derivative controller, Fuzzy controllers
- c) Multi loop control systems: Cascade control, override control, split-range control, feedforward control and ratio control systems.
- d) Controller tuning- Process reaction curve method, Ziegler Nichols method, Damped oscillation method, Two-point method, Multiloop Control-Feed forward, Ratio, Cascade, Inferential, Split range control, Internal Model Controller, Dead time Compensator.
- e) Feedback principles. Signal flow graphs. Transient Response, steady-state errors. Routh and Nyquist criteria. Bode plot, root loci. Time delay systems. Phase and gain margin. State space representation of systems.
- f) Mechanical, hydraulic and pneumatic system components.
- g) Control valve: Construction and working principle, valve sizing, valve plug, valve characteristics, valve positioners.

4. ANALOG ELECTRONICS

- a) Characteristics of diode, BJT, JFET and MOSFET.
- b) Diode circuits. Transistors at low and high frequencies, Amplifiers, single and multi-stage. Feedback amplifiers.
- c) Rectifier Circuits: Single-phase half wave, 2-phase half wave, Single-phase bridge uncontrolled, fully control & half-controlled rectifiers; Transformer rating; Rectification with R-L & R-C loads; Power factor improvement.
- d) Operational amplifiers, characteristics and circuit configurations. Instrumentation amplifier. Precision rectifier. V-to-I and I-to-V converter. Op-Amp based active filters.
Oscillators and signal generators.

5. DIGITAL ELECTRONICS

- a) Combinational logic circuits, minimization of Boolean functions. IC families, TTL, MOS and CMOS.
- b) Boolean Algebra & Logic Functions; Boolean algebra; Boolean expressions; Truth table representation, AND, OR, NOT, NAND, NOR, XOR & XNOR gates and their truth tables;
Implementation of Boolean functions using logic gates
- c) Arithmetic circuits. Comparators, Sequential circuits, flip-flops, counters, shift registers.
Multiplexer. Analog-to-Digital and Digital-to-Analog converters.
- d) Basics of number system. General definitions of mini computers, microprocessors, micro controllers and digital signal processors, Microprocessor applications, memory and input/output interfacing. Microcontrollers.
- e) Performance metrics of logic families, Binary codes, Multiplexers, De-multiplexers, Encoders, Decoders, Comparators, Parity generators and checker. Latches, flip-flops,
Synchronous and Asynchronous circuits - Counters, Shift registers.

6. POWER SYSTEMS

- a) Principle of operation of inverter; voltage driven inverter; current driven inverter.
- b) A.C Voltage controller, ON-OFF control; Phase angle control; Single phase bi-directional controller.
- c) Power supplies: D.C. power supply; Switching Mode Power Supply (SMPS), Bi-directional power supplies; A.C. power supplies; Uninterrupted Power Supply (UPS), Power factor conditioning.
- d) Instrument Transformers: Uses of instrument transformers; Theory and Testing of Current Transformers & Potential Transformers.
- e) Semiconductor power devices: Characteristics of power devices- Diode, Power transistor, Thyristor and TRIAC; Firing circuit for Thyristor & TRIAC; Rating, Cooling & mounting of Thyristor; Series & parallel connection of Thyristor; Protection of Thyristor; Gate trigger & commutation circuits; Gate Turn-Off Thyristor (GTO); power MOSFET; IJGT; DIAC & IGBT.

7. DATA TRANSMISSION AND COMMUNICATION

- a) Communication engineering: Electromagnetic radiation, Need for modulation- AM, FM,
- b) Noise in electronic circuits; capacitive & inductive coupling; shielding; co-axial & twisted pair cable; grounding.
- c) Instrumentation Standard Protocols: HART Protocol structure and programming, Advantages and Limitations. Foundation Fieldbus structure, programming, Benefits, Advantages and Limitations, other fieldbus standards including Device Net, Profibus,
ControlNet, CAN, Industrial Ethernet etc.
- d) Wireless Communication protocols and Standards

8. INDUSTRIAL ADVANCED PROCESS CONTROL

- a) Programmable logic controllers (PLC): Architecture, Discrete state process control, relay diagram, ladder diagram, ladder diagram examples, relay sequencers, timers/counters, PLC design, Study of industrial PLC. PLC Installation, troubleshooting and maintenance.
Design of alarm and interlocks, networking of PLC.
- b) Distributed Control Systems: Functions, advantages and limitations, DCS Architecture, specifications, configuration and programming, functions including database management, reporting, alarm management, communication, third party interface, control, display etc. Enhanced functions viz. Advance Process Control, Batch application,
Historical Data Management, OPC support, Security and Access Control etc.
- c) Interfacing Smart field devices (wired and wireless) with PLC and DCS.
- d) SCADA architecture and uses, PLC interface to SCADA/DCS using communication links
(RS232, RS485) and protocols (Modbus ASCII/RTU).
- e) Principles & working of Gas turbine plants; Safety aspect in Power Plants.
- f) Control for—boiler, condenser, steam heater, pumps, compressor, generator cooling system.
- g) Turbine supervisory system for monitoring of Mechanical parameters--- speed, vibration, eccentricity etc; Turbine trip condition

9. INDUSTRIAL STANDARDS, SAFETY AND PROJECTS

- a) Design: Functional requirements & specifications; NEMA, DIN, BSI, ANSI standards; Guidelines of enclosure design, cable design. Standards used in instrumentation project:
ISA S5.1, S5.3, S5.4, S5.5 and I.20, ANSI, & NFPA.
- b) Selection and Application: Selection and application of temperature, pressure, flow and level measuring instruments.
- c) Standards and Calibration: Calibration of temperature, pressure and flow measuring devices. Introduction to ISO, IEC and API standards pertaining to temperature, pressure and flow instrumentation.
- d) EMI and EMC: Interference coupling mechanism, basics of circuit layout and grounding, concepts of interfaces, filtering and shielding.
- e) Safety: Introduction, electrical hazards, hazardous areas and classification, nonhazardous areas, enclosures-NEMA types, fuses and circuit breakers. Protection methods: Purging, explosion proofing and intrinsic safety. ESD protection in equipment and Plants.
- f) Specifications: Specification of instruments, preparation of project documentation, process flow sheet, instrument index sheet, instrument specifications sheet, panel drawing and specifications, instrument specifications.
- g) Definition of project purpose—scope, time, quality, organizational structure; Basic & detailed engineering; Project S curves; Types of projects & Types of contracts. Project procedure, schedules, vendor drawing, tender documentation, selection of measurement method and control panels.
- h) Program evaluation and review techniques (PERT) and Critical path method (CPM), Scurve concept and crash time concepts, software used in project management; software features, classification, evaluation and implementation.

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (GEOPHYSICS) [POST CODE – GP 16]**

Part A: Basic Geology (25% weightage)

Earth and Planetary system - size, shape, internal structure and composition of the earth; concept of isostasy; continental drift; plate tectonics – relationship with earthquakes, volcanism and mountain building; continental and oceanic crust – composition, structure and thickness. Weathering and soil formation; landforms created by river, wind, glacier, ocean and volcanoes. Basic structural geology - stress, strain and material response; brittle and ductile deformation; nomenclature and classification of folds and faults. Mechanism of rock deformation; primary and secondary structures; geometry and genesis of folds, faults, joints and unconformities. Petrology – mineralogy and classification of common igneous, sedimentary and metamorphic rocks, concept of porosity and permeability. Geological time scale - geochronology and absolute time. Principles of Stratigraphy and concepts of correlation. Stratigraphic principles; major stratigraphic divisions of India. Sedimentary Basins in India and their types, Geological and geographical distribution of petroleum resources of India. Petroleum Geology and Petroleum system- source rocks, reservoir rocks, reservoir traps, migration paths, seals.

Part B: Geophysics (75% weightage)

The earth as a planet; different motions of the earth; gravity field of the earth; geomagnetic field, paleo-magnetism; Geothermics and heat flow, elements of seismology – body and surface waves, propagation of body waves in the earth's interior; variation of density, velocity, pressure, temperature, electrical and magnetic properties of the earth; earthquakes-causes and measurements, magnitude and intensity, focal mechanisms & beach ball diagrams, earthquake quantification, source characteristics, seismo-tectonics and seismic hazards; digital seismographs. Scalar and vector potential fields; Laplace, Maxwell and Helmholtz equations for solution of different types of boundary value problems in Cartesian, cylindrical and spherical polar coordinates; Green's theorem; Image theory; integral equations in potential theory; Eikonal equation and Ray theory.

Absolute and relative gravity measurements; Gravimeters, Land, airborne, shipborne and bore-hole gravity surveys; various corrections for gravity data reduction – free air, Bouguer and isostatic anomalies; density estimates of rocks; regional and residual gravity separation; principle of equivalent stratum; data enhancement techniques, upward and downward continuation; derivative maps, wavelength filtering; preparation and analysis of gravity maps; gravity anomalies and their interpretation – anomalies due to geometrical and irregular shaped bodies, depth rules, calculation of mass.

Elements of Earth's magnetic field, units of measurement, magnetic susceptibility of rocks and measurements, magnetometers, Land, airborne and marine magnetic surveys, Various corrections applied to magnetic data, IGRF, Reduction to Pole transformation, Poisson's relation of gravity and magnetic potential field, preparation of magnetic maps, upward and downward continuation, magnetic anomalies- geometrical shaped bodies, depth estimates, Image processing concepts in processing of magnetic anomaly maps; Interpretation of processed magnetic anomaly data. Applications of gravity and magnetic methods for oil exploration.

Conduction of electricity through rocks, electrical conductivities of metals, non-metals, rock forming minerals and different rocks, concepts of D.C. resistivity measurement, various electrode configurations for resistivity sounding and profiling,

application of filter theory, Type-curves over multi-layered structures, Dar-Zarrouck parameters, reduction of layers, coefficient of anisotropy, interpretation of resistivity field data, equivalence and suppression, self-potential and its origin, field measurement, Induced polarization, time and frequency domain IP measurements; interpretation and applications of IP, ground-water exploration, mineral exploration, environmental and engineering applications.

Basic concept of EM induction in the earth, Skin-depth, elliptic polarization, in phase and quadrature components, Various EM methods, measurements in different source-receiver configurations. Earth's natural electromagnetic field, tellurics, magneto-tellurics; geomagnetic depth sounding principles, electromagnetic profiling, Time domain EM method, EM scale modeling, processing of EM data and interpretation. Geological applications in hydrocarbon exploration.

Seismic methods of prospecting- Elastic properties of earth materials; Reflection, refraction and CDP surveys; land and marine seismic sources, generation and propagation of elastic waves, velocity – depth models, geophones, hydrophones, recording instruments, digital formats, field layouts, seismic noises and noise profile analysis, optimum geophone grouping, noise cancellation by shot and geophone arrays, 2D and 3D seismic data acquisition, processing and interpretation; CDP stacking charts, binning, filtering, dip-moveout, static and dynamic corrections, Digital seismic data processing, seismic deconvolution and migration methods, attribute analysis, bright and dim spots, seismic stratigraphy, high resolution seismic, VSP, AVO. Basic Reservoir geophysics.

Geophysical signal processing, sampling theorem, aliasing, Nyquist frequency, Fourier series, periodic waveform, Fourier and Hilbert transform, Z-transform and wavelet transform; power spectrum, delta function, auto correlation, cross correlation, convolution, deconvolution, principles of digital filters, windows, poles and zeros.

Principles and techniques of geophysical well-logging, SP, resistivity, induction, gamma ray, neutron, density, sonic, temperature, dip meter, calliper, nuclear magnetic, cement bond logging, micro-logs. Quantitative evaluation of formations from well logs; application of borehole geophysics in oil exploration.

Radioactive methods of prospecting and assaying of mineral (radioactive and non-radioactive) deposits, half-life, decay constant, radioactive equilibrium, G M counter, scintillation detector.

Basic concepts of forward and inverse problems, ill-posed of inverse problems, condition number, non-uniqueness and stability of solutions; L1, L2 and Lp norms, overdetermined, underdetermined and mixed determined inverse problems, quasi-linear and non-linear methods including Tikhonov's regularization method, Singular Value Decomposition (SVD), Non-linear inverse problems, Gauss Newton method, steepest descent (gradient) method, Backus-Gilbert method, simulated annealing, genetic algorithms and artificial neural network.

Basic principles of remote sensing – energy sources and radiation principles, atmospheric absorption, interaction of energy with earth's surface, aerial-photo interpretation, multispectral remote sensing in visible, infrared, thermal IR and microwave regions, digital processing of satellite images. GIS – basic concepts, raster and vector mode operations.

**SYLLABUS FOR WRITTEN EXAM FOR THE POST OF
SENIOR OFFICER (RESERVOIR) [POST CODE – (RE 17)]**

Petroleum Engineering

Linear Algebra: Matrix algebra, Systems of linear equations, Eigen values and eigenvectors.

Calculus: Functions of single variable, Limit, continuity and differentiability, Taylor series, Mean value theorems, Evaluation of definite and improper integrals, Partial derivatives, Total derivative, Maxima and minima, Gradient, Divergence and Curl, Vector identities, Directional derivatives, Line, Surface and Volume integrals, Stokes, Gauss and Green's theorems.

Differential equations: First order equations (linear and nonlinear), Higher order linear differential equations with constant coefficients, Cauchy's and Euler's equations, Initial and boundary value problems, Laplace transforms, Solutions of one dimensional heat and wave equations and Laplace equation.

Complex variables: Complex number, polar form of complex number, triangle inequality.

Probability and Statistics: Definitions of probability and sampling theorems, Conditional probability, Mean, median, mode and standard deviation, Random variables, Poisson, Normal and Binomial distributions, Linear regression analysis.

Numerical Methods: Numerical solutions of linear and non-linear algebraic equations. Integration by trapezoidal and Simpson's rule. Single and multi-step methods for numerical solution of differential equations.

Petroleum Exploration: Classification and description of some common rocks with special reference to elastic and nonelastic reservoir rocks. Origin, migration and accumulation of Petroleum. Petroleum exploration methods.

Oil and Gas Well Drilling Technology: Well planning. Drilling method. Drilling rigs Rig operating systems. Drilling fluids function and properties. Drilling fluid maintenance equipment. Oil & gas well cementing operations. Drill bit types and their applications. Drill string & Casing string function, operations, selection & design. Drilling problems, their control & remedies. Directional drilling tools. Directional survey. Application of horizontal, multilateral, extended reach, slim wells.

Reservoir Engineering: Petrophysical properties of reservoir rocks. Coring and core analysis. Reservoir fluid properties. Phase behavior of hydrocarbon system. Flow of fluids through porous media. Water and gas coning. Reservoir pressure measurements. Reservoir drives, drive mechanics and recovery factors. Reserve estimation & techniques.

Petroleum Production Operations: Well equipments. Well completion techniques. Well production problems and mitigation. Well servicing & Workover operations. Workover & completion fluids. Formation damage. Well stimulation techniques. Artificial lift techniques. Field processing of oil & gas. Storage and transportation of petroleum and petroleum products. Metering and measurements oil & gas. Production system analysis & optimization. Production testing. Multiphase flow in tubing and flow-lines. Nodal system analysis. Pressure vessels, storage tanks, shell and tube heat exchangers, pumps and compressors, LNG value chain.

Offshore Drilling and Production Practices: Offshore oil and gas operations & ocean environment. Offshore fixed platforms, Offshore mobile units, Station keeping methods like mooring & dynamic positioning system. Offshore drilling from fixed platform, jack-up, ships and semi submersibles. Use of conductors and risers. Offshore well completion. Deep water applications of subsea technology. Offshore production: Oil processing platforms, water injection platforms, storage, SPM and SBM transportation and utilities. Deep water drilling rig. Deep water production system. Emerging deep water technologies.

Petroleum Formation Evaluation: Evaluation of petrophysical of sub-surface formations: Principles applications, advantages and disadvantages of SP, resistivity, radioactive, acoustic logs and types of tools used. Evaluation of CBL/VDL, USIT, SFT, RFT. Production logging tools, principles, limitations and applications. Special type of logging tools. Casing inspection tools (principles, applications and limitations), Formations micro scanner (FMS), NMR logging principles. Standard log interpretation methods. Cross-plotting methods.

Oil and Gas Well Testing: Diffusivity equation, derivation & solutions. Radius of investigation. Principle of superposition. Horner's approximation. Drill Stem Testing. Pressure Transient Tests:

Drawdown and build up-test analysis. Wellbore effects. Multilayer reservoirs. Injection well testing. Multiple well testing. Interference testing, Pulse testing, well-test analysis by use of type curves. Gas well testing.

Health Safety and Environment in Petroleum Industry: Health hazards in Petroleum Industry: Toxicity, Physiological, Asphyxiation, respiratory and skin effect of petroleum hydrocarbons, sour gases. Safety System: Manual & automatic shutdown system, blow down systems. Gas detection system. Fire detection and suppression systems. Personal protection system & measures. HSE Policies. Disaster & crisis management in Petroleum Industry. Environment: Environment concepts, impact on eco-system, air, water and soil. The impact of drilling & production operations on environment, Environmental transport of petroleum wastes. Offshore environmental studies. Offshore oil spill and oil spill control. Waste treatment methods.

Enhanced Oil Recovery Techniques: Basic principles and mechanism of EOR, Screening of EOR process. Concept of pattern flooding, recovery efficiency, permeability heterogeneity. Macroscopic and microscopic displacement efficiency. EOR methods: Chemical flooding, Miscible flooding. Thermal recoveries (steam stimulation, hot water & steam flooding, in-situ combustion), Microbial EOR.

Latest trends in Petroleum Engineering: Coal bed methane, shale gas, oil shale, gas hydrate, and heavy oil.

PETROLEUM ECONOMICS:

Production Forecast and Reserves Estimation Methods, Oil and Gas Prices: International Market and Geopolitics, Cash Flow Analysis and Economic Parameters, Risk and Uncertainty Analysis, Financial Analysis and Accounting, Petroleum Fiscal System.

**SYLLABUS FOR WRITTEN TEST FOR THE POST OF
PHYSIOTHERAPIST [POST CODE – PY (18)]**

- Electrotherapy (IFT, TENS , Ultrasound Therapy, Long Wave diathermy, MWD, Faradic/Galvanic Stimulation, Cryotherapy, Wax Bath) and their uses with indications and contraindications.
- Exercise Therapy (Muscle Energy Technics, Hold Relax, Isometric, Resistance Exercise, Spinal Exercises, Shoulder and Knee Rehabilitations exercises.
- Degenerative Conditions like Osteoarthritis of knee and hip, Frozen Shoulder, Rheumatoid Arthritis, Ankylosing Spondylosis.
- Neurology : Stroke, Parkinsonism, Cranial Nerves, Bells Palsy
