

OIL develops a new 'Design Studio' at COE, OIRDS

24th May, 2024: Oil India Limited recently developed a 'Design Studio' at OIL's Centre of Excellence for Handicraft, Handloom and Entrepreneurship at OIRDS building. The studio essentially showcases the various value added handlooms and crafts being promoted by the Centre of Excellence. It is worth noting that most of the products currently in display are the outcomes of training and some have been developed as prototypes for the purpose of future trainings. The design studio with its aesthetically pleasing décor would serve as a promising hub for motivating incoming batches of potential weavers and artisans to take up entrepreneurial ventures while being well equipped with an understanding of market relevant products and designs. Along with it, the studio also promises for more new items to be displayed as time progresses.
