

OIL PROMOTES ECO FRIENDLY WASTE MANAGEMENT WITH WATER HYACINTH BINS

7th July, 2023: As an alternative to usage of plastic disposal bins, OIL promoted the usage of waste bins made from naturally found water hyacinth fibers which are organic and eco friendly. OIL supports the persons with disabilities under Project OIL Sakshyam and the vocational learning centre of Mrinaljyoti Rehabilitation Centre in building their skills to make such bins and other environment friendly products; which are later bought back by OIL thereby providing them with opportunities of sustainable livelihood.
