All future corrigendum / amendments and clarification to the EOI, if any, shall be hosted on above web site only and not in the news paper. Parties are therefore advise to keep themselves updated with all such amendments.

EXPRESSION OF INTEREST

1.0 OIL INDIA LIMITED (OIL)'s Oil & Gas fields are located in the districts of upper Assam, India. Produced Formation Water from different fields are handled at various existing OCS operated and maintained by OIL's in-house facilities. In order to ensure stipulated guidelines and maintain parameters of produced water prior to its disposal or injection a produced water 5000 klpd Effluent Treatment Plant (ETP) is proposed to be installed and operated in Tengakhat OCS area.

2.0 The produced water in Greater Tengakhat area, from around 7 installations shall be required to be transported to the proposed ETP at Tengakhat OCS area through a network of pipelines as feed to the ETP. Further the treated produced water, shall also be required to be evacuated from the ETP to Dikom and Naharkatiya through another network of pipelines for final reinjection / disposal.

SL no.	Parameters	Inlet Range of Parameter
01	pH	7-9
02	Temperature	Ambient- 60 degree Centigrade
03	Total Suspended Solids	Upto 150 ppm
04	Filterability (through 0.45µ Filter)	1-2.5 Litres/30 min
05	Turbidity	100 – 180 NTU
06	Dissolved Oxygen	Upto 6 ppm
07	SRB	103 to 106 CFU/ml
08	Any other Bacteria like GAB, IRB and APB	Not Measured
09	Oil & Grease	100 – 5000 mg/l

Produced Water Quality Inlet Parameters

- 4.0 Interested parties must provide information indicating that they are qualified to perform the above services (like detail specifications of the HDPE/ RPT line pipes, executing similar assignments, experience in similar conditions, availability of appropriate project management skills among staff, sound financial background, brochures etc.)
