ANNEXURE-I**Tender No. : GFD4108L15/3P****Tender Date : 10.07.2014**

Item No./ Mat. Code	Material Description	Quantity	UOM
10 0C000525	<p>Specifications for software for source rock kinetics</p> <p>The software for source rock kinetics is required for determination of kinetic parameters i.e. distribution of activation energies and the Arrhenius constant for the kerogen present in the source rocks. The input to the software will be the digital data from the pyrolysis curves obtained during Rock Eval or Source Rock Analyzer analysis of source rocks. The software must be capable of computing kinetic parameters even from a single pyrolysis run data from Rock Eval or Source Rock Analyzer.</p> <p>The software should have following minimum specifications</p> <ol style="list-style-type: none"> 1) The software should be able to directly import digital data from pyrolysis curves, obtained during Rock Eval or Source Rock Analyzer analysis of source rocks at a particular heating rate. 2) The software should be able to calculate activation energy distributions for total hydrocarbon generation from kerogens using data from a single open-system pyrolysis run, after the user fixes the A factor to the desired value. 3) The software should be able to provide an estimate of the relative proportions of oil and gas generated from the kerogen, based on the kerogen's original Hydrogen Index. 4) The software should be able to provide, if desired, separate kinetics for oil generation and gas generation. 5) The software should show the fit between measured pyrolysis yield and pyrolysis yield calculated from the final activation-energy distribution, and provide a quantitative measure of the quality of fit. 6) It should be possible to automatically transfer the output from the software to a data-reporting sheet, where the user can perform additional manual editing. 7) A detailed step-by-step manual to use the software must be provided (in English). 8) Updates for the software must be provided at no cost whenever they become available. 	1	NO

Special Notes : 1. The items shall be brand new, unused & of prime quality shall warrant (in the event of an order) that the product supplied will be free from all defects & fault in material, workmanship & manufacture and shall be in full conformity with ordered specifications. This clause shall be valid for 18 months from the date of dispatch /shipment or 12 months from the date of receipt of the items at site which ever is earlier. The defective materials, if any, rejected by us shall be replaced by the supplier at their own expenses. Bidders must confirm the same while quoting.

ANNEXURE-I

Tender No. : GFD4108L15/3P

Tender Date : 10.07.2014

2.The minimum FOB/FCA charges incase of partial order for reduced quantity / terms shall have to be indicated by the bidder. In case this is not indicated specifically, the charges quoted would be prorata calculated and the same will be binding on the bidder.

3.Please mention clearly in your quotation the net weight, gross weight and volume, Indian agent's name and its commission, payment terms, Ocean freight/air freight charges, port of loading, delivery period, country of origin with manufacturer's name, etc.

4.NIL Custom Duty shall not be applicable against this tender. Indigenous Bidders are requested to quote their Non Deemed Export prices.

5.Quotation must be submitted in triplicate.

6. Annexure-I is not enclosed separately. Please refer to General terms and conditions (Pipeline sphere), Annexure-I, in www.oil-india.com under Global tenders. Tender will be governed by the same.

Tender No. : GFD4108L15/3P
Tender Date : 10.07.2014
Bid Closing On : 03.09.2014 at 13:00 hrs.(IST)
Bid Opening On : 03.09.2014 at 13:00 hrs.(IST)

Tender issued to following parties only:

Sln0	V_Code	Vendor Name	City/Country
1	101212	INTEGRATED GEOCHEMICAL INTERPRETATI	DEVON EX 39 5HE
2	101451	BEICIP-FRANLAB SIEGE SOCIAL	PARIS
3	101468	GEOQUEST SYSTEMS B V	
4	102446	WEATHERFORD LABORATORIES	
5	102642	PRA ASSOCIATES	
6	102643	IES GmbH
