Thanking you,

Yours faithfully,
OIL INDIA LIMITED

Deputy General Manager (Contracts)
for Chief General Manager (PLS)

INSTRUCTIONS TO BIDDERS

- 1.0 Bidder shall bear all costs associated with the preparation and submission of bid. Oil India Limited, hereinafter referred to as 'Company', will in no case be responsible or liable for those costs, regardless of the conduct or outcome of the bidding process.

2.0 BIDDING DOCUMENTS

- 2.1 The services required, bidding procedures and contract terms are prescribed in the Bidding Documents. This Bidding Document includes the following:
- a) A forwarding letter highlighting the following points
 - (i) Company's IFB No.
 - (ii) Bid closing date and time
 - (iii) Bid opening date, time and place
 - (iv) Bid submission place
 - (v) Bid opening place
 - (vi) The amount of Bid Security
 - (vii) The amount of Performance Guarantee
 - (viii) Quantum of liquidated damages for default in timely mobilizations
 - b) Instructions to Bidders
 - c) BRC-BEC-Bid Rejection Criteria & Bid Evaluation Criteria
 - d) General Conditions of Contract (Part-I)
 - e) Schedule of Work, Unit, Quantities, Rates and Prices (Part- II-SOQ)
 - f) Special Conditions of Contract (Part-III-SCC)-(Sub Section 1 to 4)
 - g) Payment Terms (Part IV)
 - h) Schedule of company's Plants, Materials and Equipments-(Part-V)
 - ~~i) Sk/Drawing & Data - (Part VI)~~
 - j) Safety Measures (Part-VII-SM)
 - k) Integrity Pact- (Part-VIII)
 - l) Price Bid Format
 - m) Proforma & Annexure.

- 2.2 The bidder is expected to examine all instructions, forms, terms and specifications in the Bid document. Failure to furnish all information required in the Bidding Documents or submission of a bid not substantially responsive to the Bidding Documents in every respect will be at the Bidder's risk & responsibility and may result in the rejection of its bid.

3.0 TRANSFERABILITY OF BID DOCUMENTS :

- 3.1 Bid Documents are non-transferable. Bid can be submitted only in the name of the bidder in whose name the Bid Document has been issued.
- 3.2 Unsolicited offers will not be considered and will be rejected straightway.

4.0 **AMENDMENT OF BIDDING DOCUMENTS:**

- 4.1 At any time prior to the deadline for submission of bids, the company may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, modify the Bidding Documents by the issuance of an Addendum.
- 4.2 The Addendum will be sent in writing through post / courier / Fax/e-mail to all prospective Bidders to whom Company has sent the bid documents and also be uploaded in the OIL's e-portal in the C-folder under the tab "Amendments to Tender Documents". The company may, at its discretion, extend the deadline for bid submission, if the Bidders are expected to require additional time in which to take the Addendum into account in preparation of their bid or for any other reason. Bidders shall also check OIL's E-Tender portal [C-folder under the tab "Amendments to Tender Documents"] for any amendments to the bid documents before submission of their bids.

5.0 **PREPARATION OF BIDS**

- 5.1 LANGUAGE OF BIDS: The bid as well as all correspondence and documents relating to the bid exchanged between the Bidder and the Company shall be in English language, except that any printed literature may be in another language provided it is accompanied by an English translated version, which shall govern for the purpose of bid interpretation.
- 5.2 DOCUMENTS COMPRISING THE BID: The complete bid should be submitted on-line in the e-portal.

6.0 **BID FORM:**

The bidder shall complete the Bid Form and the appropriate Price Schedule furnished as attachment in the e-portal.

7.0 **BID PRICE:**

- 7.1 Prices must be quoted by the bidders, both in words and in figures. In case of any discrepancy between the words and in figures, the prices indicated in words only will be considered.
- 7.2 Price quoted by the successful bidder must remain firm during its performance of the Contract and will not be subjected to variation on any account.
- 7.3 Since the tender is invited under **SINGLE STAGE TWO BID SYSTEM** and such no price details should be uploaded/mentioned under Technical RFx Tab. Details of prices as per Price Bid format / Priced bid can be uploaded

as Attachment in the attachment header under the notes and attachment tab.

Offer not complying with above submission procedure will be rejected. Kindly refer the screen shots as mentioned in **NEW INSTRUCTIONS (ATTACHED)**.

- 7.4 Bidder shall be deemed to have satisfied himself/herself before submitting his bid as to the correctness and sufficiency of its bid for the services required and of the rates and prices quoted, which rates and prices shall, except insofar as otherwise provided, cover all its obligations under the contract.

8.0 **DOCUMENTS ESTABLISHING BIDDER'S ELIGIBILITY AND QUALIFICATIONS:**

These are as per BEC/BRC

9.0 **PERIOD OF VALIDITY OF BIDS:**

- 9.1 Bids shall remain valid for **120 days** from the date of bid opening.
- 9.2 In exceptional circumstances, the OIL may solicit the Bidder's consent to an extension of the period of validity. The request and the response thereto shall be made in writing (or by Fax). A Bidder may refuse the request without forfeiting its Bid Security. A Bidder granting the request will neither be required nor permitted to modify their bid.

10.0 **FORMAT AND SIGNING OF BID:**

The original and all copies of the bid shall be typed or written in indelible inks and shall be signed(digitally) by the Bidder or a person or persons duly authorized to bind the Bidder to the contract.

11.0 **SUBMISSION OF BIDS.**

- 11.1 **Bids are to be submitted online** through OIL's E-procurement portal with digital signature. The bid and all attached documents should be digitally signed by the bidder using "Class 3" digital certificates [e commerce application (Certificate with personal verification and Organization Name)] as per Indian IT Act 2000 obtained from the licensed Certifying Authorities operating under the Root Certifying Authority of India(RCAI), Controller of Certifying Authorities (CCA) of India before bid is uploaded.

The bid including all uploaded documents shall be digitally signed by duly authorized representative of the bidder to bind the Bidder to the contract. The authenticity of above digital signature shall be verified through

authorized CA after bid opening and in case the digital signature is not of "Class-3" with organization name, the bid will be rejected.

Bidder is responsible for ensuring the validity of digital signature and it's proper usage by their employees.

- 11.2 Any person signing the Bid or any other document in respect of this Bid Document or other relevant documents on behalf of the Bidder without disclosing his authority to do so shall be deemed to have the authority to bind the Bidder. If it is discovered at any time that the person so signing has no authority to do so, the company (OIL) may, without prejudice to any other right or remedy, cancel his Bid or Contract and hold the Bidder liable to the Company (OIL) for all costs and damages arising from the cancellation of the Bid or Contract including any loss which the Company (OIL) may sustain on account thereof.
- 11.3 Timely submission of the bids is the responsibility of the Bidder should be submitted before the bid closing date and time. Company shall not be responsible for any delay.
- 11.4 E-mail/ Fax/ Telex/Telegraphic/Telephonic offers will not be accepted.
- 11.5 Bidder shall submit the Bid, duly completed in terms of the Bid Document.

12.0 **DEADLINE FOR SUBMISSION OF BIDS:**

- 12.1 Bids should be submitted on-line up to 11.00 AM (IST) (Server Time) on the Bid Closing date mentioned in the Forwarding Letter. Bidders will be permitted by System to make any changes in their bid after the bid has been uploaded by the bidder prior to the date and time as mentioned in the bid. But no changes would be allowed by the system once the due date and for submission of bids has been reached and bids are opened.
- 12.2 No bid can be submitted after the submission date line is reached. The system time displayed on the e-procurement web page shall decide the submission dead line.
- 12.3 The documents in physical form must be received by Company at the address specified in the "Forwarding Letter" on or before the Bid Closing Date & Time mentioned in the "Forwarding Letter". Timely delivery of the same at the address mentioned in the Forwarding Letter is the responsibility of the Bidders.

13.0 **LATE BIDS:**

Bidders are advised in their own interest to ensure that their bids are uploaded in system before the closing date and time of the bid. Any Bid

received by the Company after the Bid Closing Date & Time stipulated by the Company shall be rejected.

14.0 MODIFICATION AND WITHDRAWAL OF BIDS:

- 14.1 Bidders will be permitted by System to make any changes in their bid after the bid has been uploaded by the bidder prior to the date and time as mentioned in the bid. But no changes would be allowed by the system once the due date and for submission of bids has been reached and bids are opened.
- 14.2 No bid can be modified / withdrawn subsequent to the deadline for submission of bids.
- 14.3 No bid may be withdrawn in the interval between the deadline for submission of bids and the expiry of the period of bid validity specified by the Bidder on the Bid Form. Withdrawal of a bid during this interval shall result in the Bidder's forfeiture of its Bid Security.

15.0 EXTENSION OF BID SUBMISSION DATE:

Normally no request for extension of Bid Closing Date & Time will be entertained. However, OIL at its discretion, may extend the Bid Closing Date and/or Time due to any reasons. However, the bidder whose bid has been received within the bid closing date and time will not be allowed to revise their Bid/prices. Withdrawal of such Bid also will not be permitted by the system.

16.0 BID OPENING AND EVALUATION:

- 16.1 OIL shall open the Bids, in the presence of Bidder's representatives who choose to attend at the date, time and place mentioned in the Covering Letter. However, an authorization letter (as per Proforma-II) from the bidder must be produced by the Bidder's representative at the time of bid opening. Unless this Letter is presented, the representative will not be allowed to attend the bid opening. The Bidder's representatives who are allowed to attend the bid opening shall sign a register evidencing their attendance. Only one representative against each bid will be allowed to attend. **In technical bid opening date, only Technical RFx will be allowed to open by the system.** Bidders therefore should ensure that techno-Commercial bid is uploaded under the **Technical RFx** Tab Page only **and no price should be mentioned anywhere under the Technical RFx.**

- 16.2 In case of any unscheduled holiday or Bandh on the Bid Opening Date, the Bids will be opened on the next full working day. Accordingly, Bid Closing Date / time will get extended up to the next working day and time.
- 16.3 Bid for which an acceptable notice of withdrawal has been received pursuant to clause 14.0 shall not be opened. OIL shall examine bids to determine whether they are complete, whether requisite Bid Securities have been furnished, whether documents have been properly signed and whether the bids are generally in order.
- 16.4 Bid opening shall be done as detailed in clauses 16.1 and 16.2 above
- 16.5 OIL shall prepare, for its own records, minutes of bid opening including the information disclosed to those present in accordance with the sub-clause 16.3
- 16.6 To assist in the examination, evaluation and comparison of bids, normally no clarifications shall be sought from the Bidders. However, for assisting in the evaluation of the bids especially on the issues where the Bidder confirms compliance in the evaluation and contradiction exists on the same issues due to lack of required supporting documents in the Bid (i.e. document is deficient or missing), or due to some statement at other place of the Bid (i.e. reconfirmation of confirmation) or vis-e-versa, clarifications may be sought by OIL at its discretion. The request for clarification and the response shall be in writing and no change in the price or substance of the bid shall be sought, offered or permitted.
- 16.7 Prior to the detailed evaluation, OIL will determine the substantial responsiveness of each bid to the requirement of the Bidding Documents. For purpose of these paragraphs, a substantially responsive bid is one, which conforms to all the terms and conditions of the Bidding Document without material deviations or reservation. A material deviation or reservation is one which affects in any way substantial way the scope, quality, or performance of work, or which limits in any substantial way, inconsistent way with the bidding documents, the Company's right or the bidder's obligations under the contract, and the rectification of which deviation or reservation would affect unfairly the competitive position of other bidders presenting substantial responsive bids. OIL's determination of bid's responsiveness is to be based on the contents of the Bid itself without recourse to extrinsic evidence.
- 16.8 A Bid determined as not substantially responsive will be rejected by the Company and may not subsequently be made responsive by the Bidder by correction of the non-conformity.

- 16.9 The Company may waive minor informality or nonconformity or irregularity in a bid, which does not constitute a material deviation, provided such waiver, does not prejudice or affect the relative ranking of any Bidder.

17.0 **EVALUATION AND COMPARISON OF BIDS:**

- 17.1 The OIL will evaluate and compare the bids as per Priced Bid Format of the bidding documents.
- 17.2 Post bid or conditional discounts/rebates offered by any bidder shall not be considered for evaluation of bids. However, if the lowest bidder happens to be the final acceptable bidder for award of contract, and if they have offered any discounts/rebates, the contract shall be awarded after taking into account such discounts/rebates.

18.0 **CONTACTING THE COMPANY:**

- 18.1 Except as otherwise provided in Clause 14.0 above, no Bidder shall contact OIL on any matter relating to its bid, from the time of the bid opening to the time the Contract is awarded except as required by OIL vide sub-clause 16.6.
- 18.2 An effort by a Bidder to influence OIL in the bid evaluation, bid comparison or Contract award decisions may result in the rejection of their bid.

19.0 **AWARD CRITERIA:**

OIL will award the Contract to the successful Bidder whose bid has been determined to be substantially responsive and has been determined as the lowest evaluated bid, provided further that the Bidder is determined to be qualified to perform the Contract satisfactorily.

20.0 **OIL' S RIGHT TO ACCEPT OR REJECT ANY BID:**

OIL reserves the right to accept or reject any or all bids and to annul the bidding process and reject all bids, at any time prior to award of contract, without there by incurring any liability to the affected bidder, or bidders or any obligation to inform the affected bidder of the grounds for OIL's action.

21.0 **NOTIFICATION OF AWARD:**

- 21.1 Prior to the expiry of the period of bid validity or extended validity, OIL will notify the successful Bidder in writing by registered letter or by cable or telex or fax or e-mail (to be confirmed in writing by registered / couriered letter) that its bid has been accepted.
- 21.2 The notification of award will constitute the formation of the Contract.

22.0 SIGNING OF CONTRACT:

- 22.1 At the same time as OIL notifies the successful Bidder that its Bid has been accepted, OIL will either call the successful bidder for signing of the agreement or send the Contract Form provided in the Bidding Documents, along with the General & Special Conditions of Contract, Technical Specifications, Schedule of rates incorporating all agreements between the parties.
- 22.2 Within 2(Two) Weeks from the date of issue of Letter of Award (LOA), the successful Bidder shall sign and date the contract and return it to OIL. Till the contract is signed, the LOA issued to the successful bidder shall remain binding among the two parties.
- 22.3 In the event of failure on the part of the successful bidder to sign the contract within the period specified above or any other time period specified by OIL. OIL reserves the right to terminate the LOA issued to the successful bidder. The party shall also be debarred for a period of 2(two) years from the date of default.

23.0 FURNISHING FRAUDULENT INFORMATION/DOCUMENTS:

If it found that a bidder has furnished fraudulent information/documents, it shall constitute sufficient ground for annulment of the award and the party shall be debarred for a period of 3(three) years from the date of detection of such fraudulent act besides the legal action.

24.0 BID DOCUMENT:

Before submission of Bids, Bidders are requested to make themselves fully conversant with all Conditions of the Bid Document and other relevant information related to the works to be executed under this contract.

25.0 MOBILIZATION PERIOD: 1(one) month from the date of issue of LOA.**26.0 SITE VISIT:**

The Bidder, at the Bidder's own cost, responsibility and risk is encouraged to visit and examined the site of work and its surroundings, understand the logistics and obtain all information that may be necessary for preparing the Bid and entering into a Contract for the required services/work. The Contractor shall be deemed prior to Pre-Bid Conference & submitting their Bid to have:

- a) Inspected and examined the Site and its surroundings and carried out such surveys as it considers necessary;

- b) Satisfied itself as to the nature of the work and materials necessary for the execution of the Works;
- c) Satisfied itself as to the circumstances at the Site, including, without limitation, the ground and sub-soil, the form and nature of the Site and the climate and hydrological conditions of the Site;
- d) Satisfied itself as to the means of communication with and access to & through the Site, the accommodation it may require and the precautions and the times and methods of working;
- e) Obtained for itself all necessary information as to the risks, contingencies and all other circumstances, which may influence or affect the Contract price and its obligations under the Contract;
- f) Satisfied itself with all the Indian as well as local conditions, factors and legislation which may have any effect on the execution of the work covered under the Bid Document.
- g) Ascertained the general labour position at the Site and have understood the cost associated with engagement of the labours.

BEC – BRC**BID REJECTION CRITERIA & BID EVALUATION CRITERIA FOR THE TENDER
BID REJECTION / EVALUATION CRITERIA (BRC/BEC)****1.0. BID REJECTION CRITERIA (BRC):**

The bid shall conform to the specifications and terms and conditions given in the Bidding Documents. Bids will be rejected in case material and services offered do not conform to the required parameters stipulated in the technical specifications. Notwithstanding the general conformity of the bid to the stipulated specifications, the following requirements will have to be particularly met by the Bidders without which the same will be considered as non-responsive and rejected. All the documents related to BRC shall be submitted along with the Techno-Commercial Bid.

2.0 TECHNICAL:

2.1.1 The Bidder shall have the experience of executing at least one project for installation of API quality Hydrocarbon 'Cross-country' submerged pipeline in India by horizontal directional drilling (HDD) method for a minimum length 924m and size 200 mm OD across river. The experience criteria as defined above shall be in last 7 (seven) years reckoned from the of bid closing date.

2.1.2 The bidder must have experience of executing project for installation of API quality 'Cross-country' submerged pipeline crossing by horizontal directional drilling (HDD) method of minimum OD 355.6 mm of **Rs.1,17,66,300.00** in previous 7 years to be reckoned from the original bid closing date.

Note:

Documentary evidence in support of work experience and fulfilling the requirement as spelt out in clause 2.1.1, 2.1.2, must be submitted along with techno-commercial bid. These documents should be in the form of copies of Completion Certificates/ Payment Certificates issued by the Owner of a pipeline. However, the originals of these documents shall have to be produced by the bidder, as and when asked for.

3.0 FINANCIAL:

3.1. Annual financial turnover of bidder during any of preceding three financial/accounting years from the original bid closing date should be at least **Rs.70,59,800.00**.

3.2. The Net worth of the bidders shall be positive for preceding financial/accounting year.

3.3. For proof of Annual turnover & Net worth any one of the following document must be submitted along with the bid: i. A certificate issued by a practicing

Chartered cost accountant (with membership number and firm registration number), certifying the annual turnover and net worth as per format OR ii. Audited balance sheet along with profit & loss account.

3.4. The Bidder must possess PF Code number, PAN , VAT & GST Registration No issued by appropriate Govt. Authority.

4.0 COMMERCIAL:

4.1 Bidder shall furnish Bid Security along with Bid. Bid security shall be furnished as a part of 'Techno-Commercial Bid'. Any bid not accompanied by a proper bid security will be rejected.

In case of e-Tender, Bidder shall submit original document to the address as specified with BCD and scanned copy shall be submitted along with the e-Tender.

4.2 Any bid received in the form of Telex/Cable/Fax/E-mail/ Telephone call will not be accepted.

4.3 Bid shall be typed or written in indelible ink and original bid shall be signed by the Bidder or their authorized representative on all pages failing which the bid will be rejected. Rates shall be quoted in figures as well as in words.

In case of e-Tender, Bidder shall submit scanned copy of the signed bid as mentioned above as per e-Tendering procedure.

4.4 Bid shall contain no inter-lineation, erasures or overwriting except as necessary to correct errors made by Bidder, in which case such corrections shall be initialled by the person(s) signing the bid. However, white fluid should not be used for making corrections. Any bid not meeting this requirement shall be rejected.

4.5 The Techno-Commercial Bid should not have any price indication.

4.6 Any bid containing false statement will be rejected.

4.7 Bidders must quote clearly and strictly in accordance with the price schedule outlined in Bidding Documents, otherwise the bid will be rejected.

4.8 The Bid Documents are not transferable. Bids made by parties who have not purchased the Bid Documents from the Company will be rejected.

4.9 Any Bid received by the Company after the deadline for submission of bids prescribed by the Company will be rejected.

4.10 Price quoted by the successful Bidder must be firm during the performance of the Contract and not subject to variation on any account. A bid submitted with an adjustable price will be treated as non-responsive and rejected.

4.11 The following Clauses with all its sub-clauses should be agreed in toto, failing which the bid will be rejected.

- a) Performance Security Clause
- b) Force Majeure Clause
- c) Termination Clause
- d) Settlement of disputes Clause
- e) Liquidated Damages Clause.
- f) Acceptance of Jurisdiction and applicable law.
- g) Tax liabilities clause.
- h) Insurance clause.
- i) With holding clause.
- j) Liability clause.

5.0 GENERAL:

5.1 In case Bidder takes exception to any clause of Tender Document not covered under BEC/BRC, then the Company has the discretion to load or reject the offer on account of such exception if the Bidder does not withdraw/ modify the deviation when/as advised by the Company. The loading so done by the Company will be final and binding on the Bidders. No deviation will however, be accepted in the clauses covered under BEC/BRC.

5.2 To ascertain the substantial responsiveness of the bid the Company reserves the right to ask the Bidder for clarification in respect of clauses covered under BEC/BRC also and such clarification fulfilling the BEC/BRC clauses must be received on or before the deadline given by the Company, failing which the offer will summarily rejected.

5.3 In case, any of the clauses in the BRC contradict with other clauses of Bid Document elsewhere, then the clauses in the BRC shall prevail.

5.4 Any exceptions/deviations to tender must be spelt out by Bidder in their 'Techno-Commercial' bid only. Any additional information/terms/ conditions furnished in sealed 'Price Bid' will not be considered by Company for evaluation/award of contract.

5.5 Bidder shall fulfil all the relevant clauses applicable in case of legacy system or e-Tender whichever is applicable.

6.0 BID EVALUATION CRITERIA (BEC):

6.1 The bids conforming to the technical specifications, terms and conditions stipulated in the bid documents and considered to be responsive after subjecting to the Bid Rejection Criteria will be considered for further evaluation as per the Bid Evaluation Criteria given below:

6.2 To ascertain the inter-se-ranking, the comparison of the responsive bids will be made on the basis of total cost of various works envisaged under the contract.

6.3 Original Bid closing date will be considered for evaluation of BRC criteria even in case of any extension of the original Bid Closing Date.

6.4 In case more than one bidder emerges as lowest bidder due to equal rate quoted by the bidder, then the lowest bidder will be decided by draw of lots. Company's decision in this regard is final and binding to all bidders.

7.0 PAYMENT TERMS:

7.1 Payment for welding & radiography of 3 LPE pipe, repair of defective coating of 3LPE pipe, supply and installation of heat shrinkable sleeve will be initiated only after successful completion of HDD work.

7.2 Payment for welding & radiography of bare line pipe, repair of defective pipe ends, coating and wrapping by cold applied tape will be initiated only after lowering and backfilling of pipeline as per guidelines/instruction of engineer in charge.

7.3 Whereas payment of clause no 7.2 will be initiated only after successful completion of HDD work.

7.4 No part payment will be initiated before reaching of specified HDD rig in good working condition at site/starting of HDD work.

AND ALSO LAYING OF 40 MM DIA HDPE DUCT ENCAGED IN 75MM NB MS PIPE ACROSS RIVER KOSHI OF LENGTH 1320 M ALONG WITH CRUDE OIL LINE

GENERAL CONDITIONS OF CONTRACT (GCC)

MEMORANDUM OF AGREEMENT made this _____ day of _____ between OILINDIA LIMITED a Company incorporated under the Companies Act 1956 and having its registered Office at Duliajan in the District of Dibrugarh, Assam (hereinafter called Company) of the one part and Shri/Smti _____ and Shri/Smti _____ carrying on business as partners /proprietor under the firm name and style of M/s. _____ with the main Office at _____ in the District of _____ aforesaid (hereinafter called 'Contractor') on the other part.

WITNESSETH:

1. a) The contractor hereby agrees to carry out the work set down in the Schedule of work which forms **Part-II** of this Contract in accordance with the 1968 General Conditions of Contract of Oil India Limited and General Specifications read in conjunction with any drawings and Particular Specifications & instructions which forms **Part-III** of the contract utilizing any materials/services as offered by the Company as per **Part-V** of the contract at Various field installations within the state of **Assam**.
- b) In this Contract all words and expressions shall have the same meaning as are respectively assigned to them in the 1968 General Conditions of Contract of Oil India Limited which the Contractor has perused and is fully conversant with before entering into this Contract.
- c) The clauses of this contract and of the specifications set out hereunder shall be paramount and in the event of anything herein contained being inconsistent with any term or terms of the 1968 General Conditions of Contract of Oil India Limited, the said term or terms of the 1968 General

conditions of Contract to the extent of such inconsistency, and no further, shall not be binding on the parties hereto.

2. The contractor shall provide all labour, supervision and transport and such specified materials described in **Part-III** of the Contract including tools and plants as necessary for the work and shall be responsible for all royalties and other levies and his rates shall include for these. The work executed and materials supplied shall be to the satisfaction of the Company's Engineer and Contractor's rates shall include for all incidental and contingent work which although not specifically mentioned in this contract are necessary for its completion in a sound and workman like manner.
3. The Company's Engineer shall have power to:
 - a) Reduce the rates at which payments shall be made if the quality of work although acceptable is not up to the required standard set forth in the OIL Standard Specifications which have been perused and fully understood by the Contractor.
 - b) Order the Contractor to remove any inferior material from the site and to demolish or rectify any work of inferior workmanship, failing which the Company's Engineer may arrange for any such work to be demolished or rectified by any other means at the Contractor's expenses.
 - c) Order the Contractor to remove or replace any workman who he (The Engineer) considers incompetent or unsuitable; the Engineer's opinion as to the competence and suitability of any workman engaged by the Contractor shall be final and binding on the Contractor.
 - d) Issue to the Contractor from time to time during the progress of the work such further drawings and instructions as shall be necessary for the purpose of proper and adequate execution and maintenance of the works and the Contractor shall carry out and be bound by the same.
 - e) Order deviations in **Part II, III and IV** of this Contract. All such deviation orders shall be in writing and shall show the financial effect, if any, of such deviation and whether any extra time is to be allowed.
4. The Contractor shall have no claim against the company in respect of any work which may be withdrawn but only for work actually completed under this contract. The contractor shall have no objection to carry out work in excess of the quantities stipulated in **Part-II** if so ordered by the company at the same rates, terms and conditions.
5. The Company reserves the right to cancel this Contract at any time upon full payment of work done and the value of the materials collected by the contractor for permanent incorporation in the work under this contract particularly for execution of this contract up to the date of cancellation of

the Contract. The valuation of the work done and the materials collected shall be estimated by the company's Engineer in presence of the contractor. The Contractor shall have no claim to any further payment whatsoever. The valuation would be carried out exparte if Contractor fails to turn up despite reasonable notice which will be binding on the Contractor.

6. The Contractor hereby undertakes to indemnify the Company against all claims which may arise under the under noted Acts:-

- i) The Factories Act & Rules
- ii) The Minimum Wages Act, 1948.
- iii) The Workman's Compensation Act, 1923.
- iv) The Payment of wages Act, 1963.
- v) The Payment of Bonus Act, 1965.
- vi) The Contract Labour (Regulation & Abolition) Act, 1970 and the rules framed there under.
- vii) Employees Pension Scheme, 1995.
- viii) Inter-State Migrant (Regulation of Employment and Condition of Service) Act. 1979.
- ix) The Employees Provident Fund and Miscellaneous Provisions Act, 1952.
- ~~x) AGST Act.~~
- xi) GST Act.

or any other Acts or Statute not here in above specifically mentioned having bearing over engagement of workers directly or indirectly for execution of work. The Contractor shall not make the Company liable to reimburse the Contractor for the statutory increase in the wage rates of the Contract Labour appointed by the Contractor. Such Statutory increase in the wage rates of Contract Labour shall be borne by the contractor.

The Contract shall be deemed to be a Contract made under, governed by and construed in accordance with the laws of India for the time being in force and shall be subject to the exclusive jurisdiction of **Courts situated in Guwahati**

7. The Contractor shall clear away all rubbish and surplus material from the site on completion of work and shall leave the site clean and tidy.

8. The duration of the contract shall be **18(Eighteen) months** from the commencement date mentioned in the work order. The Contractor must complete the work within the contract period. During the currency of the job, the work progress must be commensurate with the time elapsed. In the event of any delay on the contractor's part, he/she will be liable to pay to the company liquidated damages at the rate of 1/2% (Half p.c) per week of the contract price of the item(s) delayed in completion and the maximum value of the liquidated damage will be 7.5% of the contract price of the item(s) delayed provided the item(s) delayed are not critical for commissioning and final utilization of the work. If, however, the item(s) delayed in completion are critical for commissioning and final utilisation

of the work then the contractor will be liable to pay liquidated damages by way of penalty at the rate of 1/2% (Half percent) of the total contract cost subject to a maximum of 7.5% of the total contract cost.

OIL's Engineer's certificate as to the criticality or otherwise of an item shall be final.

The payment of liquidated damages/penalty may be reduced or waived at the sole discretion of the Company whose decision in this regard will be final.

In the event of there being undue delay in execution of the Contract, the Company reserves the right to cancel the Contract and / or levy such additional damages as it deems fit based on the actual loss suffered by the company attributable to such delay. The company's decision in this regard shall be final.

9. In order to promote, safeguard and facilitate the general operational economic in the interest of the Company during the continuance of this contract the Contractor hereby agrees and undertakes not to take any direct or indirect interest and or support, assist, maintain or help any person or persons engaged in antisocial activities, demonstration, riots , or in any agitation prejudicial to the Company's interest and any such even taking shape or form at any place of the Company's works or and its neighborhood.
10. The tendered all-inclusive of Price (the Contract price) **except GST** is Rs.XXXXXXXXXX **(Not to be filled up by the bidder. This will be entered at the time of Signing of the agreement) but the Company shall pay the Contract or only for actual work done at the all-inclusive rates set down in the Schedule of work part II of this Contract.**

Final payment will be made only after satisfactory completion of the work. Such final payment shall be based on the work actually done allowing for deviations and any deductions and the measurement shall be checked and certified correct by the Company's Engineer before any such final payment is made.

11. The contractor employing 20 (twenty) or more workmen on any day preceding 12 months shall be required to obtain requisite licence at his cost from the appropriate Licensing Officer before undertaking any Contract work. The Contractor shall also observe the rules & regulations framed under the Contract Labour (Regulation & Abolition) Act.
12. The Company for any reason whatsoever and of which the company shall be sole judge may terminate this Contract with a 24 hours' notice in writing to the Contractor and in the event of Company's so doing the clause 5 here of

shall prevail and the accounts between the parties will be in accordance therewith finalized.

13. The Contractor will not be allowed to construct any structure (for storage / housing purpose) with thatch, bamboo or any other inflammable materials within any company's fenced area.
14. The Contractor shall ensure that all men engaged by him/her are provided with appropriate protective clothing and safety wear in accordance with Factories Act & Rules. The Company's representative shall not allow/accept those men who are not provided with the same.
15. All Statutory taxes levied by the Central & State Government or any other competent authority from time to time will be borne by contractor and the amount of the contract specified in the contract is inclusive of all tax liabilities **but excluding GST**. ~~GST if applicable shall be, to the company's account. However, GST portion payable directly by the Service provider (if applicable) shall be reimbursed to the Contractor on the basis of the documentary evidence.~~
16. The Contractor shall deploy local persons in all works.
17. The Contractor shall not engage minor labour below 18(eighteen) years of age under any circumstances.
18. The Contractor and his/her workmen shall strictly observe the rules and regulations as per Factories Act & Rules(latest editions).
19. **GENERAL OBLIGATIONS OF COMPANY:**

COMPANY shall, in accordance with and subject to the terms and conditions of this contract:

- i) Pay the Contractors in accordance with terms and conditions of the contract.
- ii) Allow access to Contractors and their personnel, subject to normal security and safety procedures, to all areas as required for orderly performance of the work.

20. **SPECIAL CONDITIONS**

- a) The contractor will be required to allow OIL Officials to inspect the work site and documents in respect of the workers' payment.
- b) Contractor(s) whosoever is liable to be covered under the P.F. Act and contract cost is inclusive of P.F., must ensure strict compliance of provisions of Provident Fund and Miscellaneous Provisions Act, 1952 in addition to the various Acts mentioned elsewhere in this contract. Any

contractor found violating these provisions will render themselves disqualified from any future tendering. As per terms of the contract, if applicable, the Contractor must deposit Provident Fund Contribution (covering Employee's & Employer's share) with the competent authority monthly under their direct code. The Contractor shall be required to submit documentary evidence of deposit of P.F. Contribution to the Company. In case of failure to provide such documentary evidence, the Company reserves the right to withhold the amount equivalent to applicable P.F. Contribution.

21. **FORCE MAJEURE:**

- 21.1 In the event of either party being rendered unable by 'Force Majeure' to perform any obligation required to be performed by them under the contract, the relative obligation of the party affected by such 'Force Majeure' will stand suspended for the period during which such cause lasts. The word 'Force Majeure' as employed herein shall mean acts of God, war, revolt, agitation, strikes, riot, fire, flood, sabotage, civil commotion, road barricade (but not due to interference of employment problem of the Contractor), acts of government of the two parties, which makes performance impossible or impracticable and any other cause, whether of kind herein enumerated or otherwise which are not within the control of the party to the contract and which renders performance of the contract by the said party impossible.
- 21.2 Upon occurrence of such cause and upon its termination, the party alleging that it has been rendered unable as aforesaid thereby, shall notify the other party in writing within Seventy Two (72) hours of the alleged beginning and ending thereof, giving full particulars and satisfactory evidence in support of its claim.
- 21.3 Should 'force majeure' condition as stated above occurs and should the same be notified within seventy two (72) hours after its occurrence the 'force majeure' rate shall apply for the first fifteen (15) days. Parties will have the right to terminate the Contract if such 'force majeure' conditions continue beyond fifteen (15) days with prior written notice. Should either party decide not to terminate the Contract even under such condition, no payment would apply after expiry of fifteen (15) days force majeure period unless otherwise agreed to.

22. **TERMINATION:**

- 22.1 **TERMINATION ON EXPIRY OF THE TERMS (DURATION):** The contract shall be deemed to have been automatically terminated on the expiry of duration of the Contract or the extension period, if exercised by Company under the provision of the Contract.

- 22.2 TERMINATION ON ACCOUNT OF FORCE MAJEURE: Either party shall have the right to terminate this Contract on account of Force Majeure as set forth in Article 21.0 above.
- 22.3 TERMINATION ON ACCOUNT OF INSOLVENCY: In the event that the Contractor or its collaborator at any time during the term of the Contract, becomes insolvent or makes a voluntary assignment of its assets for the benefit of creditors or is adjudged bankrupt, then the Company shall, by a notice in writing have the right to terminate the Contract and all the Contractor's rights and privileges hereunder, shall stand terminated forthwith.
- 22.4 TERMINATION FOR UNSATISFACTORY PERFORMANCE: If the Company considers that, the performance of the Contractor is unsatisfactory, or not upto the expected standard, the Company shall notify the Contractor in writing and specify in details the cause of the dissatisfaction. The Company shall have the option to terminate the Contract by giving 15 days' notice in writing to the Contractor, if Contractor fails to comply with the requisitions contained in the said written notice issued by the Company.
- 22.5 TERMINATION DUE TO CHANGE OF OWNERSHIP & ASSIGNMENT: In case the Contractor's rights and /or obligations under this Contract and/or the Contractor's rights, title and interest to the equipment/material, are transferred or assigned without the Company's consent, the Company may at its absolute discretion, terminate this Contract.
- 22.6 If at any time during the term of this Contract, breakdown of Contractor's equipment results in Contractors being unable to perform their obligations hereunder for a period of 15 successive days, Company at its option, may terminate this Contract in its entirety without any further right or obligation on the part of the Company, except for the payment of money then due. No notice shall be served by the Company under the condition stated above.
- 22.7 Notwithstanding any provisions herein to the contrary, the Contract may be terminated at any time by the Company on giving 30 (thirty) days written notice to the Contractor due to any other reason not covered under the above clause from 22.1 to 22.6 and in the event of such termination the Company shall not be liable to pay any cost or damage to the Contractor except for payment for services as per the Contract upto the date of termination including the De-mobilization cost, if any.
23. **CONSEQUENCES OF TERMINATION**: In all cases of termination herein set forth, the relative obligations of the parties to the Contract shall be limited to the period up to the date of termination. Notwithstanding the termination of this Contract, the parties shall continue to be bound by the

provisions of this Contract that reasonably require some action or for bearance after such termination.

- 23.1 Upon termination of this Contract, Contractor shall return to Company all of Company's items, which are at the time in Contractor's possession.
- 23.2 In the event of termination of contract, Company will issue Notice of termination of the contract with date or event after which the contract will be terminated. The contract shall then stand terminated and the Contractor shall demobilize their personnel & materials.

24. **SETTLEMENT OF DISPUTES AND ARBITRATION:**

24.1 Arbitration (Applicable for Suppliers/Contractors other than PSU) :

Except as otherwise provided elsewhere in the contract, if any dispute, difference, question or disagreement arises between the parties hereto or their respective representatives or assignees, in connection with construction, meaning, operation, effect, interpretation of the contract or breach thereof which parties are unable to settle mutually, the same shall be referred to Arbitration as provided hereunder :

- a. A party wishing to commence arbitration proceeding shall invoke Arbitration Clause by giving 30 day's notice to the other party. The notice invoking arbitration shall specify all the points of dispute with details of the amount claimed to be referred to arbitration at the time of invocation of arbitration and not thereafter. If the claim is in foreign currency, the claimant shall indicate its value in Indian Rupee for the purpose of constitution of the arbitral tribunal.
- b. The number of arbitrators and the appointing authority will be as under:

Claim amount (excluding claim for interest and counter claim, if any)	Number of Arbitrator	Appointing Authority
UptoRs. 5 Crore	Sole Arbitrator	OIL
Above Rs. 5 Crore	3 (Three) Arbitrators	One Arbitrator by each party and the 3 rd Arbitrator, who shall be the presiding Arbitrator, by the two Arbitrators.

- c. The parties agree that they shall appoint only those persons as arbitrators who accept the conditions of the arbitration clause. No person shall be appointed as Arbitrator or Presiding Arbitrator who does not accept the conditions of the arbitration clause.

- d. Parties agree that there will be no objection if the Arbitrator appointed holds equity shares of OIL and/or is a retired officer of OIL/any PSU. However, neither party shall appoint its serving employees as arbitrator.
- e. If any of the Arbitrators so appointed dies, resigns, becomes incapacitated or withdraws for any reason from the proceedings, it shall be lawful for the concerned party/arbitrators to appoint another person in his place in the same manner as aforesaid. Such person shall proceed with the reference from the stage where his predecessor had left if both parties consent for the same; otherwise, he shall proceed de novo.
- f. Parties agree that neither shall be entitled for any pre-reference or pendente-lite interest on its claims. Parties agree that any claim for such interest made by any party shall be void.
- g. The arbitral tribunal shall make and publish the award within time stipulated as under :

Amount of Claims and counter claims (excluding interest)	Period for making and publishing of the award (counted from the date of first meeting of the Arbitrators)
Upto Rs. 5 Crore	Within 8 months
Above Rs. 5 Crore	Within 12 months

The above time limit can be extended by Arbitrator, for reasons to be recorded in writing, with the consent of the other parties.

- h. If after commencement of the arbitration proceedings, the parties agree to settle the dispute mutually or refer the dispute to conciliation, the arbitrators shall put the proceedings in abeyance until such period as requested by the parties.
- i. Each party shall be responsible to make arrangements for the travel and stay etc. of the arbitrator pointed by it. Claimant shall also be responsible for making arrangements for travel/stay arrangements of the Presiding Arbitrator and the expenses incurred shall be shared equally by the parties.
- j. In case of sole arbitrator, OIL shall make all necessary arrangements for his travel, stay and the expenses incurred shall be shared equally by the parties.

- k. The Arbitration shall be held at the place from where the contract has been awarded. However, parties to the contract can agree for a different place for the convenience of all concerned.
- l. The Arbitrator(s) shall give reasoned and speaking award and it shall be final and binding on the parties.
- m. Subject to aforesaid, provisions of the Arbitration and Conciliation Act, 1996 and any statutory modifications or re-enactment thereof shall apply to the arbitration proceedings under this clause.

24.2 Arbitration (applicable in case of Contract awarded on Public Sector Enterprise):

In the event of any dispute or difference relating to, arising from or connected with the Contract, such dispute or difference shall be referred by either party to the arbitration of one of the Arbitrators in the Department of Public Enterprises, to be nominated by the Secretary to the Government of India, In-Charge of the Bureau of Public Enterprises. The Arbitration and Conciliation Act 1996 shall not be applicable to the Arbitration under this clause. The award of the Arbitrator shall be binding upon the parties to the dispute, provided however; any party aggrieved by such award may make a further reference for setting aside or revision of the award to the Law Secretary, Department of Legal Affairs, Ministry of Law and Justice, Government of India. Upon such reference, the dispute shall be decided by the Law Secretary or the Special Secretary/Additional Secretary, whose decision shall bind the parties finally and conclusively. The parties in the dispute will share equally the cost of the arbitration as intimated by the Arbitrator.

The venue of all arbitrations under both 24.1 & 24.2 will be **Guwahati, Assam**. The award made in pursuance thereof shall be binding on the parties.

25. **I.B. VERIFICATION REPORT AND SECURITY REVIEW:**

Contractor will be required to submit the verification report to ascertain character and antecedents from the Civil Administration towards the persons engaged under this contract to the Head of the user Department before engagement.

In case of any doubt or dispute as to the interpretation of any clause herein contained, the decision of the Company's Engineer shall be final and binding on the contractor.

26. **SET OFF CLAUSE:**

Any sum of money due and payable to the contractor (including Security Deposit refundable to them) under this or any other contract may be appropriated by Oil India Limited and set off against any claim of Oil India Limited (or such other person or persons contracting through Oil India Limited) for payment of a sum of money arising out of this contract or under any other contract made by the contractor with Oil India Limited (or such other person or persons contracting through Oil India Limited).

27. **FURNISHING FRAUDULENT INFORMATION/DOCUMENT:**

If it is found that a Bidder/Contractor has furnished fraudulent document/information the party shall be debarred for period of 3(three) years from date of detection of such fraudulent act, besides the legal action.

28. **WARRANTY AND REMEDY OF DEFECTS:**

28.1 Contractor warrants that it shall perform the work in a professional manner and in accordance with the highest degree of quality, efficiency, and with the state of the art technology/ inspection services and in conformity with all specifications, standards and drawings set forth or referred to in the Scope of Work. They should comply with the instructions and guidance which Company may give to the Contractor from time to time. For any rectification works during Defect Liability Period (12 Months from the date of completion of the project) of any Works contractor(s) / purchase(s), PMC shall extend their supervisory / technical assistance at no extra cost.

28.2 Should Company discover at any time **during the execution** of the Contract that the work carried out by the contractor does not conform to the foregoing warranty, Contractor shall after receipt of notice from Company, promptly perform all corrective work required to make the services conform to the Warranty. Such corrective work shall be performed entirely at contractor's own expenses. If such corrective work is not performed within a reasonable time, the Company, at its option, may have such remedial work carried out by others and charge the cost thereof to Contractor which the contractor must pay promptly. In case contractor fails to perform remedial work, the performance security shall be forfeited.

29. **CONFIDENTIALITY, USE OF CONTRACT DOCUMENTS AND INFORMATION:**

29.1 Contractor shall not, without Company's prior written consent, disclose the contract, or any provision thereof, or any specification, plan, drawing pattern, sample or information furnished by or on behalf of Company in connection therewith, to any person other than a person employed by Contractor in the performance of the contract. Disclosure to any such

employed person shall be made in confidence and shall extend only as far as may be necessary for purposes of such performance.

29.2 Contractor shall not, without Company's prior written consent, make use of any document or information except for purposes of performing the contract.

29.3 Any document supplied to the Contractor in relation to the contract other than the Contract itself remain the property of Company and shall be returned (in all copies) to Company on completion of Contractor's performance under the Contract if so required by Company.

30. **TAXES:**

30.1 Tax levied as per the provisions of Indian Income Tax Act and any other enactment/rules on income derived/ payments received under the contract will be on contractor's account.

30.2 Contractor shall be responsible for payment of personal taxes, if any, for all the personnel deployed in India.

30.3 The contractor shall furnish to the company, if and when called upon to do so, relevant statement of accounts or any other information pertaining to work done under the contract for submitting the same to the Tax authorities, on specific request from them. Contractor shall be responsible for preparing and filing the return of income etc. within the prescribed time limit to the appropriate authority.

30.4 Prior to start of operations under the contract, the contractor shall furnish the company with the necessary documents, as asked for by the company and / or any other information pertaining to the contract, which may be required to be submitted to the Income Tax authorities at the time of obtaining "No objection Certificate" for releasing payments to the contractor.

30.5 Corporate income tax will be deducted at source from the invoice at the specified rate of income tax as per the provisions of Indian Income Tax Act as may be in force from time to time.

30.6 Corporate and personal taxes on contractor shall be the liability of the contractor and the company shall not assume any responsibility on this account.

30.7 ***All local taxes, levies and duties, ~~sales-tax~~, octroi, customs duty, GST etc. on purchases and sales made by contractor shall be borne by the contractor.***

30.8 GST:

Quoted price should be **exclusive of applicable GST**.

30.9 CUSTOMS DUTY ON EQUIPMENT:

- i) Contractor is liable to pay all customs duty, as applicable on the equipment brought to India for executing the works.
- ii) The Contractor shall be fully liable for observing all the formalities in this regard as well as to pay the customs duty chargeable on the equipment, including any deposit payable for such purposes. No adjustment in the Contract Price shall be permissible for any change in duty drawback applicable in respect of equipment and machinery brought to India for use in the project and for re-export of equipment & machinery, on completion of the project.

30.10 CUSTOMS DUTY:

The quoted price shall include full customs duties for materials (for permanent incorporation in the work), equipment and plants envisaged to be imported for execution of work.

30.11 IMPORT LICENSE:

The Contractor shall arrange import of all materials required for permanent incorporation in the works as well as construction equipment as per the guidelines laid down by the Government of India. Import license shall not be provided by Company.

31. INSURANCE:

- 31.1 The contractor shall arrange insurance to cover all risks in respect of their personnel, materials and equipment belonging to the contractor or its subcontractor during the currency of the contract.
- 31.2 Contractor shall at all time during the currency of the contract provide, pay for and maintain the following insurances among others:
 - a) Workmen compensation insurance as required by the laws of the country of origin of the employee.
 - b) Employer's Liability Insurance as required by law in the country of origin of employee.

- c) General Public Liability Insurance covering liabilities including contractual liability for bodily injury, including death of persons, and liabilities for damage of property. This insurance must cover all operations of Contractor required to fulfill the provisions under this contract.
- d) Contractor's equipment used for execution of the work hereunder shall have an insurance cover with a suitable limit (as per international standards).
- e) Automobile Public Liability Insurance covering owned, non-owned and hired automobiles used in the performance of the work hereunder, with bodily injury limits and property damage limits shall be governed by Indian Insurance regulations.
- f) Public Liability Insurance as required under Public Liability Insurance Act 1991.

31.3 Any deductible set forth in any of the above insurance shall be borne by Contractor.

31.4 Contractor shall furnish to Company prior to commencement date, certificates of all its insurance policies covering the risks mentioned above.

31.5 If any of the above policies expire or are cancelled during the term of this contract and Contractor fails for any reason to renew such policies, then the Company will renew/replace same and charge the cost thereof to Contractor. Should there be a lapse in any insurance required to be carried by Contractor for any reason whatsoever, loss/damage claims resulting there from shall be to the sole account of Contractor.

31.6 Contractor shall require all of their sub-contractor to provide such of the foregoing insurance coverage as Contractor is obliged to provide under this Contract and inform the Company about the coverage prior to the commencement of agreements with its sub-contractors.

31.7 All insurance taken out by Contractor or their sub-contractor shall be endorsed to provide that the underwriters waive their rights of recourse on the Company.

32. **CHANGES:**

32.1 During the performance of the work, Company may make a change in the work within the general scope of this Contract including, but not limited to, changes in methodology, and minor additions to or deletions from the work to be performed. Contractor shall perform the work as

changed. Changes of this nature will be affected by written order by the Company.

- 32.2 If any change result in an increase in compensation due to Contractor or in a credit due to Company, Contractor shall submit to Company an estimate of the amount of such compensation or credit in a form prescribed by Company. Such estimates shall be based on the rates shown in the Schedule of Rates (**Part - II**). Upon review of Contractor's estimate, Company shall establish and set forth in the Change Order the amount of the compensation or credit for the change or a basis for determining a reasonable compensation or credit for the change. If Contractor disagrees with compensation or credit set forth in the Change Order, Contractor shall nevertheless perform the work as changed, and the parties will resolve the dispute in accordance with Clause 24.0 hereunder. Contractor's performance of the work as changed will not prejudice Contractor's request for additional compensation for work performed under the Change Order.

33. **NOTICES:**

- 33.1 Any notice given by one party to other, pursuant to this Contract shall be sent in writing or by telex or Fax and confirmed in writing to the applicable address specified below:

- 33.2 A notice shall be effective when delivered or on the notice's effective date, whichever is later.

34. **SUBCONTRACTING:**

- 34.1 Contractor shall not subcontract or assign, in whole or in part, its obligations to perform under this contract, except with Company's prior written consent.

35. **MISCELLANEOUS PROVISIONS:**

- 35.1 Contractor shall give notices and pay all fees at their own cost required to be given or paid by any National or State Statute, Ordinance, or other Law or any regulation, or bye-law of any local or other duly constituted authority as may be in force from time to time in India, in relation to the performance of the services and by the rules & regulations of all public bodies and companies whose property or rights are affected or may be affected in any way by the services.
- 35.2 Contractor shall conform in all respects with the provisions of any Statute, Ordinance of Law as aforesaid and the regulations or bye-law of any local or other duly constituted authority which may be applicable to the services and with such rules and regulation, public bodies and Companies as aforesaid and shall keep Company indemnified against all penalties and liability of every kind for breach of any such Statute, Ordinance or Law, regulation or bye-law.
- 35.3 During the tenure of the Contract, Contractor shall keep the site where the services are being performed reasonably free from all unnecessary obstruction and shall store or dispose of any equipment and surplus materials and clear away and remove from the site any wreckage, rubbish or temporary works no longer required. On the completion of the services, Contractor shall clear away and remove from the site any surplus materials, rubbish or temporary works of every kind and leave the whole of the site clean and in workman like condition to the satisfaction of the Company and conform to ISO 14001.
- 35.4 Key personnel cannot be changed during the tenure of the Contract except due to sickness/death/resignation of the personnel in which case the replaced person should have equal experience and qualification which will be again subject to approval by the Company.

36. **LIABILITY:**

- 36.1 Except as otherwise expressly provided, neither Company nor its servants, agents, nominees, Contractors, or sub-contractors shall have any liability or responsibility whatsoever to whomsoever for loss of or damage to the equipment and/or loss of or damage to the property of the Contractor and/or their Contractors or sub-contractors, irrespective of how such loss or damage is caused and even if caused by the negligence of Company and/or its servants, agent, nominees, assignees, contractors and sub-Contractors. The Contractor shall protect, defend,

indemnify and hold harmless Company from and against such loss or damage and any suit, claim or expense resulting there from.

- 36.2 Neither Company nor its servants, agents, nominees, assignees, Contractors, subcontractors shall have any liability or responsibility whatsoever for injury to, illness, or death of any employee of the Contractor and/or of its Contractors or sub-contractor irrespective of how such injury, illness or death is caused and even if caused by the negligence of Company and/or its servants, agents nominees, assignees, Contractors and sub-contractors. Contractor shall protect, defend, indemnify and hold harmless Company from and against such liabilities and any suit, claim or expense resulting there from.
- 36.3 The Contractor hereby agrees to waive its right to recourse and further agrees to cause their underwriters to waive their right of subrogation against Company and/or its underwrites, servants, agents, nominees, assignees, Contractors and subcontractors for loss or damage to the equipment of the Contractor and/or its subcontractors when such loss or damage or liabilities arises out of or in connection with the performance of the contract.
- 36.4 The Contractor hereby further agrees to waive its right of recourse and agrees to cause its underwriters to waive their right of subrogation against Company and/or its underwriters, servants, agents, nominees, assignees, Contractors and sub-contractors for injury to, illness or death of any employee of the Contractor and of its Contractors, sub-contractors and/or their employees when such injury, illness or death arises out of or in connection with the performance of the contract.
- 36.5 Except as otherwise expressly provided, neither Contractor nor its servants, agents, nominees, Contractors or sub-contractors shall have any liability or responsibility whatsoever to whomsoever for loss of or damage to the equipment and/or loss or damage to the property of the Company and/or their Contractors or sub-contractors, irrespective of how such loss or damage is caused and even if caused by the negligence of Contractor and/or its servants, agents, nominees, assignees, Contractors and sub-contractors. The Company shall protect, defend, indemnify and hold harmless Contractor from and against such loss or damage and any suit, claim or expense resulting there from.
- 36.6 Neither Contractor nor its servants, agents, nominees, assignees, Contractors, subcontractors shall have any liability or responsibility whatsoever to whomsoever for injury or illness, or death of any employee of the Company and/or of its Contractors or sub-contractors irrespective of how such injury, illness or death is caused and even if caused by the negligence of Contractor and/or its servants, agents, nominees, assignees, Contractors and sub-contractors. Company shall protect,

defend indemnify and hold harmless Contractor from and against such liabilities and any suit, claim or expense resulting there from.

36.7 The Company agrees to waive its right of recourse and further agrees to cause its underwriters to waive their right of subrogation against Contractor and /or its underwriters, servants, agents, nominees, assignees, Contractors and subcontractors for loss or damage to the equipment of Company and/or its contractors or sub-contractors when such loss or damage or liabilities arises out of or in connection with the performance of the contract.

36.8 The Company hereby further agrees to waive its right of recourse and agrees to cause it underwriters to waive their right of subrogation against Contractor and/or its underwriters, servants, agents, nominees, assignees, Contractors and sub-contractors for injury to, illness or death of any employee of the Company and of its Contractors, sub-contractors and/or their employees when such injury, illness or death arises out of or in connection with the performance of the Contract.

37. **CONSEQUENTIAL DAMAGE:**

37.1 Except as otherwise expressly provided, neither party shall be liable to the other for special, indirect or consequential damages resulting from or arising out of the contract, including but without limitation, to loss or profit or business interruptions, howsoever caused and regardless of whether such loss or damage was caused by the negligence (either sole or concurrent) of either party, its employees, agents or sub-contractors.

38. **INDEMNITY AGREEMENT:**

38.1 Except as provided hereof Contractor agrees to protect, defend, indemnify and hold Company harmless from and against all claims, suits, demands and causes of action, liabilities, expenses, cost, liens and judgments of every kind and character, without limit, which may arise in favour of Contractor's employees, agents, contractors and sub-contractors or their employees on account of bodily injury or death, or damage to personnel/property as a result of the operations contemplated hereby, regardless of whether or not said claims, demands or causes of action arise out of the negligence or otherwise, in whole or in part or other faults.

38.2 Except as provided hereof Company agrees to protect, defend, indemnify and hold Contractor harmless from and against all claims, suits, demands and causes of action, liabilities, expenses, cost, liens and judgments of every kind and character, without limit, which may arise in favour of Company's employees, agents, contractors and sub-contractors or their employees on account of bodily injury or death, or

damage to personnel/property as a result of the operations contemplated hereby, regardless of whether or not said claims, demands or causes of action arise out of the negligence or otherwise, in whole or in part or other faults.

39. **INDEMNITY APPLICATION:**

The indemnities given herein above, whether given by Company or Contractor shall be without regard to fault or to the negligence of either party even though said loss, damage, liability, claim, demand, expense, cost or cause of action may be caused, occasioned by or contributed to by the negligence, either sole or concurrent of either party.

40. **PAYMENT & INVOICING PROCEDURE:**

- 40.1 Company shall pay to Contractor, during the term of the contract, the amount due calculated according to the rates of payment set and in accordance with other provisions hereof. No other payments shall be due from Company unless specifically provided for in this contract. All payments will be made in accordance with the terms hereinafter described.
- 40.2 All payments due by Company to Contractor shall be made at Contractor's designated bank. All bank charges will be to Contractor's account. Payment will be cleared on monthly basis only.
- 40.3 Payment of any invoices shall not prejudice the right of Company to question the validity of any charges therein, provided Company within one year after the date of payment shall make and deliver to Contractor written notice of objection to any item or items the validity of which Company questions.
- 40.4 Contractor will submit six sets of all invoices to Company for processing of payment. Separate invoices for the charges payable under the contract shall be submitted by Contractor for foreign currency and Indian Rupee.
- 40.5 Payment of invoices if undisputed shall be made.
- 40.6 The Company shall within 30 days of receipt of the invoice notify Contractor of any item under dispute, specifying the reasons thereof, in which event, payment of the disputed amount may be withheld until settlement of the dispute, but payment shall be made of any undisputed portion.
- 40.7 The acceptance by Contractor of part payment on any billing not paid on or before the due date shall not be deemed a waiver of Contractor's

rights in respect of any other billing, the payment of which may then or thereafter be due.

- 40.8 Contractor shall maintain complete and correct records of all information on which Contractor's invoices are based up to 2(two) years from the date of last invoice. Such records shall be required for making appropriate adjustments or payments by either party in case of subsequent audit query / objection. Any audit conducted by Company of Contractor's records, as provided herein, shall be limited to Company's verification (i) of the accuracy of all charges made by Contractor to Company and (ii) that Contractor is otherwise in compliance with the terms and conditions of this Agreement.

41. **WITH-HOLDING:**

- 41.1 Company may withhold or nullify the whole or any part of the amount due to Contractor, after informing the Contractor of the reasons in writing, on account of subsequently discovered evidence in order to protect Company from loss on account of :

- a) For non-completion of jobs assigned as per **PART-III.**
- b) Contractor's indebtedness arising out of execution of this Contract.
- c) Defective work not remedied by Contractor.
- d) Claims by sub-Contractor of Contractor or others filed or on the basis of reasonable evidence indicating probable filing of such claims against Contractor.
- e) Failure of Contractor to pay or provide for the payment of salaries/wages, contributions, unemployment compensation, taxes or enforced savings with-held from wages etc.
- f) Failure of Contractor to pay the cost of removal of unnecessary debris, materials, tools, or machinery.
- g) Damage to another Contractor of Company.
- h) All claims against Contractor for damages and injuries, and/or for non-payment of bills etc.
- i) Any failure by Contractor to fully reimburse Company under any of the indemnification provisions of this Contract. If, during the progress of the work Contractor shall allow any indebtedness to accrue for which Company, under any circumstances in the opinion of Company may be primarily or contingently liable or ultimately responsible and Contractor shall, within five days after demand is made by Company, fail to pay and discharge such indebtedness, then Company may during the period for which such indebtedness shall remain

unpaid, with-hold from the amounts due to Contractor, a sum equal to the amount of such unpaid indebtedness.

With-holding will also be affected on account of the following:-

- i) Order issued by a Court of Law in India.
- ii) Income-tax deductible at source according to law prevalent from time to time in the country.
- iii) Any obligation of Contractor which by any law prevalent from time to time to be discharged by Company in the event of Contractor's failure to adhere to such laws. When all the above grounds for with-holding payments shall be removed, payment shall thereafter be made for amounts so with-hold. Notwithstanding the foregoing, the right of Company to withhold shall be limited to damages, claims and failure on the part of Contractor which is directly/ indirectly related to some negligent act or omission on the part of Contractor.

42. **SUBSEQUENTLY ENACTED LAWS:**

Subsequent to the date of submission of contractor's bid, if there is a change in or enactment of any law or interpretation of existing law, which results in additional cost/reduction in cost to Contractor on account of the operation under the Contract, the company/Contractor shall reimburse/pay Contractor /company for such additional/ reduced costs actually incurred.

43. **ROYALTY AND PATENTS:**

Each party shall hold harmless and indemnify the other from and against all claim and proceedings for or on account of any patent rights, design, trade mark or other protected rights arising from any use of materials, equipment, processes, inventions and methods which have not been imposed on the attending party by the terms of the contract or the specifications or drawings forming part thereof.

44. **WAIVER:**

Any delay in exercising and any omission to exercise any right, power or remedy exercisable by the Company under this contract shall not impair such right, power or remedy nor shall any waiver by the Company of any breach by the Contractor of any provision of this contract prevent the

subsequent enforcement of that provision by the Company or be deemed a waiver by the Company of any subsequent breach by the Contractor.

Necessary safety arrangement shall be done at the pig receiving end. The Job shall be carried out as per instructions of Company's Representative / Engineer in Charge. Hydraulic testing of entire section of the welded pipeline shall be subjected to a pressure as mentioned by Engineer in Charge for a minimum period of 24 hrs.	131	NO						

(Continuous). The water required for hydro testing should be arranged by the contractor. The job shall be carried out as per the approved SOP of the company. All arrangements including pressure recorder/ pressure gauge etc shall be done by the contractor and shall be calibrated and in good condition. Calibration certificate shall be provided prior to the testing. The contractor shall engage sufficient number of competent people over the entire line to keep vigilance on the line during the test. In case of failure, the contractor shall locate it and report to the site Engineer / Supervisor of the Company. Any failure due to contractor's bad workmanship shall be rectified at contractor's cost. The contractor shall also repeat the pressure test free of charge. The detailed report shall be submitted. The hydro testing of the pipeline shall be carried out								
--	--	--	--	--	--	--	--	--

	after necessary air pigging with gauging of the line pipeline.								
90	<u>Radiography of Welding Joints:</u> The welding joints shall be radiographically inspected as per API 1104. Contractor shall engage qualified Radiographer having valid certificate from BARC (Bhaba Atomic Research Centre). The contractor shall also comply with all the latest norms relating to radiation safety as stipulated by BARC.	131	NO						
100	<u>Hydro testing & Gauging:</u> Carrying out air pigging, gauging with aluminium plate of the entire pipeline as per the approved SOP of the company. Necessary safety arrangement shall be done at the pig receiving end. The Job shall be carried out as per instructions of Company's Representative / Engineer in Charge. Hydraulic testing of entire section of the welded pipeline shall be subjected	1,440	M						

to a pressure as mentioned by Engineer in Charge for a minimum period of 24 hrs. (continuous). The water required for hydro testing should be arranged by the contractor. The job shall be carried out as per the approved SOP of the company. All arrangements including pressure recorder/ pressure gauge etc shall be done by the contractor and shall be calibrated and in good condition. Calibration certificate shall be provided prior to the testing. The contractor shall engage sufficient number of competent people over the entire line to keep vigilance on the line during the test. In case of failure, the contractor shall locate it and report to the site Engineer / Supervisor of the Company. Any failure due to contractor's bad workmanship shall be rectified at contractor's cost. The contractor shall also repeat the pressure test free of charge. The detailed								
---	--	--	--	--	--	--	--	--

	report shall be submitted. The hydro testing of the pipeline shall be carried out after necessary air pigging with gauging of the line pipeline.								
110	<p><u>Supply of Heat Shrinkable Sleeve:</u></p> <p>Heat shrinkable wraparound sleeve shall consist of radiation cross-linked, thermally stabilized, ultraviolet resistant semi-rigid polyolefin backing with a uniform thickness of high shear strength thermoplastic / co-polymer hot melt adhesive. The joint coating system shall consist of a solvent free epoxy primer applied to the pipe surface prior to sleeve application. The backing shall be provided with suitable means (thermo-chrome paint, dimple, or other means) to indicate the desired heat during shrinking in field is attained. The sleeve shall be supplied in pre-cut sizes to suit the pipe diameter and the requirements of overlap. The</p>	120	NO						

	heat shrinkable wraparound sleeve shall have the required adhesive properties when applied on various commercial pre-coating materials. Heat shrinkable wraparound field joint coating system manufactured by M/s Tyco Adhesives M/s Raychem and M/s Canusa or any other reputable brand with prior consent of Engineer in Charge are acceptable for the supply of field joint coating materials.								
120	<p><u>Installation of Heat Shrinkable Sleeve:</u></p> <p>Application of Heat shrinkable joint sleeve on weld joint by Cleaning of exterior surface of pipes by sand blasting and subsequent priming of cleaned surfaces. All equipment materials for cleaning and sand blasting should be arrange by the Contractor. Coating of welded pipeline shall be done in conformity to the applicable code. The coated</p>	120	NO						

	pipe shall be subjected to Holiday Detection test for perfection. Defective section of the pipes shall be repaired at contractor's cost. The Holiday testing shall be carried out by Company's personnel or Third party Inspectors. The contractor shall provide assistance during the testing operation.								
130	<u>Cross trenching:</u> Excavation of earth / trench cutting of suitable depth across the ROW manually at 15 mtr interval (approx) for identification of other utilities like pipeline, cable etc and provide adequate protection of the utilities present against any damage during execution. Cross trenching shall be carried out as directed by company representative / Engineer in charge. Measurement will be length of the trench dug.	360	M						
140	<u>Laying of Pipe by HDD:</u> Design, Detailed engineering, and installation of 355.6 mm O.D. 11.92 mm W.T. API 5L-Grade 46, 3LPE coated pipe across the river	1,320	M						

	<p>by 'Horizontal Directional Drilling' method as per specification and applicable drawing or as directed by Engineer-in-charge.</p> <p>The job includes:</p> <p>a) Design of HDD profile with data of hydrological and geo-technical surveys furnished including detailed engineering and design calculation, preparation of all necessary construction drawings.</p> <p>b) Installation of pipeline below the river bed by HDD operation to the correct profile as per approved drawing.</p> <p>c) Carryout pre-installation gauging and hydrostatic testing of the pipeline.</p> <p>d) Preparation and submission of as-built drawings and other drawings etc.</p>								
150	<p><u>Study & Installation of CP system:</u></p> <p>To carry out current requirement survey for</p>	1	EAC H OPE RATI						

	Cathodic Protection system after installation of pipeline crossing and recommendation. Supply and installation CP system with magnesium anode or any other suitable method. The job shall be carried only after necessary approval from the Engineer in Charge.		ON(E OP						
160	<u>Test Water Replacement:</u> Replace the Hydro test water by pigging with treated water having corrosion inhibitor with sufficient PPM in a manner to avoid corrosion effect at least for one year including supply of C.I and other consumables and equipment. End cap have to be welded. The job shall be carried only after necessary approval from the Engineer in Charge.	1	EAC H OPE RATI ON(E OP						
170	<u>Coating and Wrapping by Cold Applied Tape:</u> Coating and Wrapping of Bare Line Pipe and Existing pipe section by Cold Applied Tape in compliance with AWWA C 209. The job	180	M						

	includes scrapping of existing coating on old pipes, cleaning, surface preparation by sand blasting as per AWWA C 209 including supply of equipment and all consumables, application of primer and inner and outer wrap of cold applied tape and as per instruction of the Engineer in charge. Any defect found during testing by holiday or any other method shall be repaired and cost shall be borne by the contractor. The coating Material shall be supplied by the Company.								
180	<u>Excavation of Trench:</u> Excavation of open trench along the ROW for lowering and laying of new pipeline, coating refurbishment of old pipeline etc. as per instructions of the Engineer in Charge. The excavation shall be such that the slopes of embankment is at least 30 degrees and protection shall be given against collapse of trench if required. The bottom, width	180	M						

	& sides of the trench should be smoothly finished to accommodate the welded section of the pipe without any strain. This shall include all the trenching jobs along the ROW irrespective of the quality of earth like slushy or water logged area or normal soil including dewatering if required. Contractor shall also provide barricading the whole trench and installation of signs to avoid any mishap.								
190	<u>Lowering of Pipeline:</u> Lowering of the new pipeline inside the excavated trench without causing any damage to the coating or the pipe. Any damage during handling shall be repaired at the contractor's cost. Contractor must arrange water pump to drain out the water from the trench before lowering the pipe.	120	M						
200	<u>Making of Field Bends:</u> Making of field bend of 355.6 mm dia 11.92/ 7.92 mm wall thickness pipe of bend radius more than 20D	8	NO						

	including movement at site, inspection as per specification. Any damage to pipe shall be rejected and the cost of replacement shall be borne by the contractor.								
210	<p><u>Earthen Pit:</u> Earth cutting for making pit to accommodate spilled crude oil . This includes arrangement of the land, shielding of the pit walls with suitable polythene sheet to minimize seepage, covering the pit with tarpaulin etc. for protection against rain or any other event. The excavated earth shall be stacked of size- 2m wide & 1 m height and 1 m away from pit boundary. Stacked earth and pit side wall shall be dressed suitably for laying polyethylene sheet. Arrangement of land shall be done by way of leasing if required or any other suitable means. Pit to be dug on sides of the either bank of the hook up location. Contractor shall also provide barricading the</p>	600	M3						

	whole trench and installation of signs to avoid any mishap. The job shall be as per instructions of the Engineer in Charge.								
220	<u>Collection & Pumping of Crude Oil:</u> Collection and Handling of Spill into the designated earthen Pit excavated for the purpose. This includes collection of the crude oil into the designated pit, Necessary assistance to PLM team for pumping the crude oil from the pit in to the pipeline including arrangement of compressor and other misc. items required for safe operation of the Job	600	M3						
230	<u>Evacuation of Crude Oil:</u> Making arrangement for Air Pigging of the entire segment of old pipe to evacuate and collection of crude oil and sludge including welding of necessary fittings on either side for Air pigging, supply of equipment (Air Compressor, Welding Set etc.) and all other	1	EAC H OPE RATI ON(E OP						

	consumables etc. and as per instructions of Engineer in Charge.								
240	<u>Hook-up Job:</u> Hook up with existing pipeline at both ends including clearing, any additional excavation required, dewatering, Cutting of Pipe, end preparation, coating and wrapping and all other works related to hook up shall be carried out as per approved SOP of the company, and making all necessary arrangement for safe working, providing assistance for testing, providing all necessary equipment, labour, materials, consumables and performing all works necessary for completion of works strictly in accordance with the relevant specifications and as per instructions of Engineer in Charge.	2	NO						
250	<u>Retrieval of Pipes & Accessories:</u> Retrieval of 14" pipes from	1,500	M						

	bridges and underground section. The job shall include manual cutting of the pipes at 10m interval with Hacksaw, Isolation and Retrieval of valves, Dismantling of the hangers as per instructions of the Engineer in Charge.								
260	<u>Transportation of Retrieved Pipes & Accessories:</u> Loading Unloading of 14" Pipes including accessories like Valves, Hangers and other Bridge Crossing structures and onward transportation to Pump Station 9 (Dumar) as per instructions of the Engineer in Charge.	1,500	M						
270	<u>Installation of Valves:</u> Installation of supplied Gate valves of 14" Dia on Pipeline. The job involves pre hydro test of valve at field as per approved SOP, handling of Gate valve for placing and aligning with new pipeline for welding, application of anti-corrosive coating of Gate Valve and as per the instruction of site Engineer.	2	NO						

	No tension on existing piping shall be allowed during installation. Hydro test shall be carried out as per approved SOP of Company.								
280	<u>Construction of Valve Box:</u> Construction of Valve Box including making of supports and CC foundation with placement of neoprene/polyutherane insulating mat of minimum size 1mx1mx 10mm including supply of all consumables except cement. The size of valve Box shall be of minimum size 30"x16" and height shall be minimum of 45" or as per site condition made of MS sheet of minimum thickness 6 mm including supply of all consumables. The Job shall be carried out as per instruction of the Engineer in Charge.	2	NO						
290	<u>Supply of Air Compressor:</u> Supply of Air Compressor for Logistic support during the job of Hook up job for Air pigging of the existing Pipeline to evacuate the	2	EAC H OPE RATI ON(E OP						

	product away from the Hook-up Location.								
300	<u>Supply of Generators:</u> Supply of generators on each side of the Hook up location for the whole job of Hook up and restoration works until the completion of the entire job at the site. This Includes uninterrupted operation of generator throughout the night and if required during day time also and supply of all lightings such as halogen lamps, tube lights, bulbs etc.	2	EAC H OPE RATI ON(E OP						
310	<u>Supply of Hydra/Crane:</u> Supply of Hydra/Crane for Logistic Support for the whole job of Hook up and restoration works for various activities at the site.	1	EAC H OPE RATI ON(E OP						
320	<u>Supply of Oil Tankers:</u> Supply of Oil Tanker of capacity 9Kl/12Kl as stand by during the Job of Hook up and restoration works. The job shall be carried out only as per instructions from the Engineer in Charge	8	EAC H P[ER DAY(EPD)						

330	<u>Transportation of Crude Oil in Tanker:</u> Cost of Transportation of Crude Oil in Standby Tankers from Site to PS9-Dumar. The job involves handling, collection Loading of crude oil from Pipeline/Earthen Pit into the tanker and onward transport to PS9-Dumar and Unloading at PS9-Dumar including supply of all tools, accessories etc. required for carrying out the job. The job shall be carried out only as per instructions from the Engineer in Charge	8	TRIP(TRP)						
340	<u>Site Restoration:</u> Cleaning the area and Restoration of Site in all respects and as per instructions of the Engineer in Charge.	1	EAC H OPE RATI ON(E OP						
350	<u>Laying of MS pipe with 1 HDPE OFC duct:</u> This shall include all but not limited to the following works: Transportation of 75 mm NB MS pipe & 40/33 mm size OFC HDPE duct from OIL's	1,320	M						

store location at PS-8, Sonapur in West Bengal to site and PS-9, Dumar in Bihar respectively. Contractor shall be responsible for welding, fabrication & stringing of the 75 mm MS pipes and pulling the 75 NB MS pipe along with the 355.6 mm OD Mainline HDD pipe. Before pulling of 75 NB MS pipe the OFC HDPE duct shall be inserted inside the 75 mm NB MS pipe and duct integrity test shall be done by the contractor. Duct integrity test shall be carried by applying pressurize air of about 10 bar at one end of the duct and a pressure measuring gauge at the other end. The pressure inside the duct shall be remaining stable for at least 10 minutes. In case any leak in pressure is there, it should be rectified and test should be repeated by the Contractor at his own cost for successful pressure test. Contractor shall take sufficient precaution during								
--	--	--	--	--	--	--	--	--

	welding of 75mm NB pipe so as not to damage the HDPE Duct. Before pulling of 75mm NB MS pipe with HDPE duct inside the both ends of duct as well as the MS pipe shall be properly seal by the contractor at their cost to prevent ingress of any unwanted debris inside the duct and MS pipe. Contractor shall be responsible to carry out any change and or modification in work procedure as directed by site In-charge of OIL during execution of the work.								
360	<p><u>Blowing of OFC inside HDPE duct:</u></p> <p>Optical Fibre Cable shall be blown into HDPE duct with the help of Air Compressor and Blowing Machine. The blowing method involves feeding of optical fibre cable into the duct with the help of consistent airflow of specified pressure, equally distributed along the entire cable throughout the duct. Polywater PL 2000 lubricant/ or equivalent</p>	1	LSM						

	<p>lubricant shall be used for smooth movement of the cable.</p> <p>The Contractor shall perform the blowing operation in a steady and suitable speed so that folding back of cable inside duct do not occur or create excessive flutter in cable during blowing. Contractor shall either repaired or replaced, as directed by the site In-Charge of OIL, at their own cost if the OFC is damaged during blowing it through the HDPE duct.</p> <p>Optical Fibre Cable (OFC) drum will be supplied by OIL at the HDD site and contractor shall be responsible for safe custody as well as safe handling of OFC during the entire work period.</p>								
370	<p><u>Normal trenching laying of OFC:</u></p> <p>Once HDPE duct inside the MS pipe is laid under the river bed then the both end of HDPE duct shall be</p>	200	M						

<p>coupled with separate HDPE ducts laid under trench of 1.65 metre minimum depth. The HDPE ducts laid under the trench shall be extended to the appropriate locations as directed by the site In-charge of OIL. The cutting of trench of minimum depth of 1.65 metre and backfilling will be under the responsibility of the contractor. The fibre cable shall also be blown or pulled inside the extended portion of the HDPE ducts and contractor's price shall include this cost also. Notwithstanding the variations of trench width and depth and consequently the volume of excavation of earth, which may be required to maintain a uniform minimum level of 1.65 metre, the measurement for the purpose of payment shall be made on the basis of running length of trench only. The HDPE duct couplers shall be supplied by OIL.</p>								
---	--	--	--	--	--	--	--	--

TOTAL			
--------------	--	--	--

Total Price with GST(**D**) (In words) _____

Total Price excluding GST(**C**) (In words) _____

Notes:

1. The price/rate(s) quoted by the Bidders will be inclusive of all taxes except **GST** (i.e. IGST or CGST and SGST/UTGST as applicable in case of interstate supply or intra state supply respectively and Cess on GST, if applicable) on the final services. However, GST rate (including cess) to be provided in the respective places in the Price Bid.

2. OIL will prefer to deal with registered bidder under GST. Therefore, bidders are requested to get themselves registered under GST, if not registered yet.

However, in case any unregistered bidder is submitting their bid, their prices will be loaded with applicable GST while evaluation of bid. Where OIL is entitled for input credit of GST, the same will be considered for evaluation of bid as per evaluation methodology of tender document."

3. Price Bid uploaded without giving any of the details of the taxes (Including rates and amounts) will be considered as inclusive of all taxes including GST.

When a bidder mentions taxes as extra without specifying the rates & amount, the offer will be loaded with maximum value towards taxes received against the tender for comparison purposes. If the bidder emerges as lowest bidder after such loading, in the event of order on that bidder, taxes mentioned by OIL on the Purchase Order/ Contracts will be binding on the bidder."

4. Refer GST Clauses(**Clause no. 31 of GCC**).

5. Bidders are required to quote for all the items as per Price Bid Format; otherwise the offer of the bidder will be straightway rejected.

6. Bidders are also requested to refer the Taxes and Duties clause during GST regime attached vide **Annexure-I** for compliance

TAXES AND DUTIES CLAUSE - FOR VENDOR/SUPPLIER/CONTRACTOR
(For Supplies/ Services during GST Regime i.e., New Tender)

INDIRECT TAXES/ GST

1. For the purposes of levy and imposition of GST, the expressions shall have the following meanings:
 - (a) GST - means any tax imposed on the supply of goods and/or services under GST Law.
 - (b) Cess – means any applicable cess, existing or future on the supply of Goods and Services as per Goods and Services Tax (Compensation to States) Act, 2017.
 - (c) GST Law - means IGST Act 2017, CGST Act 2017, UTGST Act, 2017 and SGST Act, 2017 and all related ancillary Rules and Notifications issued in this regard from time to time.
2. **The rates quoted by the bidders shall be inclusive of all taxes, duties and levies.** However, bidders are required to provide separately the rate and amount of all types of taxes, duties and levies. In case, the quoted information related to various taxes, duties & levies subsequently proves wrong, incorrect or misleading, OIL will have no liability to reimburse the difference in the duty/ tax, if the finally assessed amount is on the higher side and OIL will have to right to recover the difference in case the rate of duty/ taxes finally assessed is on the lower side. Further, for the purpose of this contract, it is agreed between the parties that if Goods and Services Tax introduced during the tenure of this contract/agreement then the bidders have to clearly show the amount of GST separately in the Tax Invoices. Further, it is the responsibility of the bidders to make all possible efforts to make their accounting / IT system GST compliant in order to ensure availability of Input Tax Credit (ITC) to Oil India Ltd.
3. Offers without giving any of the details of the taxes (Including rates and amounts) as specified above will be considered as inclusive of all taxes including GST. When a bidder mentions taxes as extra without specifying the rates & amount, the offer will be loaded with maximum value towards taxes received against the tender for comparison purposes. If the bidder emerges as lowest bidder after such loading, in the event of order on that bidder, taxes mentioned by OIL on the Purchase Order/ Contracts will be binding on the bidder.

4. Bidders are required to pass on the benefit arising out of introduction of GST, including seamless flow of Input Tax Credit, reduction in Tax Rate on inputs as well as final goods by way of reduction of price as contemplated in the provision relating to Anti-Profitteering Measure vide Section 171 of the CGST Act, 2017. Accordingly, for supplies made under GST, the bidders should confirm that benefit of lower costs has been passed on to OIL by way of lower prices/taxes and also provide details of the same as applicable. OIL reserves the right to examine such details about costs of inputs/input services of the bidders to ensure that the intended benefits of GST have been passed on to OIL.
5. Oil India Ltd. shall declare the value of free issue of materials and services, if any, involved in the execution of the contract. The Contractor should consider the same while working out the GST liability, if any. Further in cases where GST is leviable on any facilities provided by OIL and used by bidders and the consideration for which is recovered by OIL in the form of reduction in the invoice raised by bidders then OIL will raise GST invoices on such transactions and the same will be reimbursed by bidders.

6. When Input tax credit is available for Set Off as per the end use certification given by User Department at the time of raising Purchase Requisition (P.R.)

Evaluation of L-1 prices shall be done based on Quoted price after deduction of Input Tax Credit (ITC) of GST, if available to OIL. OIL shall evaluate the offers on the basis of the quoted rates only and any claim subsequently by the bidders for additional payment/liability shall not be admitted and has to be borne by the bidders

When Input tax credit is NOT available for Set Off

Evaluation of L-1 prices shall be done based on Quoted price only. OIL shall evaluate the offers on the basis of the quoted rates only and any claim subsequently by the bidders for additional payment/liability shall not be admitted and has to be borne by the bidders

7. In a situation where Purchase Orders (POs)/ Contracts have been placed prior to GST Regime and supplies are effected during GST Regime, it is made clear that any statutory variation (increase/decrease) due to introduction of GST, as the case may be, but within the contractual delivery/completion period will be to the account of OIL subject to documentary evidence. However, any increase in statutory levy after the expiry of the scheduled date of delivery shall be to the supplier's account.
8. Bidders agree to do all things not limited to providing GST compliant Tax Invoices or other documentation as per GST law relating to the supply of goods and/or services covered in the instant contract like raising of and /or acceptance or rejection of credit notes / debit notes as the case may be, payment of taxes, timely filing of valid statutory Returns for the tax period on the Goods and Service Tax Network (GSTN), submission of general information as and when called for

by OIL in the customized format shared by OIL in order to enable OIL to update its database etc. that may be necessary to match the invoices on GSTN common portal and enable OIL to claim input tax credit in relation to any GST payable under this Contract or in respect of any supply under this Contract.

9. In case Input Tax Credit of GST is denied or demand is recovered from OIL by the Central / State Authorities on account of any non-compliance by bidders, including non-payment of GST charged and recovered, the Vendor/Supplier/Contractor shall indemnify OIL in respect of all claims of tax, penalty and/or interest, loss, damages, costs, expenses and liability that may arise due to such non-compliance. OIL, at its discretion, may also withhold/recover such disputed amount from the pending payments of the bidders.
10. GST liability, if any on account of supply of free samples against any tender shall be to bidder's account.

Special Conditions of Contract (SCC)**SECTION-II****SPECIAL CONDITIONS OF THE CONTRACT****1.0 GENERAL :**

1.1 Special Conditions of Contract (SCC) shall be read in conjunction with the General Conditions of Contract (GCC), Specifications of Work, Drawings and other documents forming part of this contract wherever the context so requires.

1.2 Notwithstanding the sub-division of the documents into these separate parts and volumes, every part of each shall be deemed to be supplementary to and complementary of every other part and shall be read with and into the contract in so far as it may be practicable to do so.

1.3 Where any portion of the GCC is repugnant to or at variance with any provision of the SCC, then the provision of the SCC shall be deemed to override the provisions of the GCC and shall, to the extent of such repugnance or variations, prevail.

1.4 Wherever it is mentioned in the specifications that the contractor shall perform certain works or provide certain facilities, it is to be understood that in addition to the items supplied by the company, the contractor shall do so at his own cost, being deemed to be part of the relevant item in the schedule of rates (SOR) whether specifically stated or not.

1.5 The design and workmanship of all materials to be used / supplied by the bidder shall satisfy the relevant Standards & Codes, besides the specifications & stipulations contained herein the contract specifications. The bidder shall absorb all cost because of the additional involvements thereon.

1.6 A pre-bid conference shall be organized by the owner to clarify the service requirement. Bidder may seek clarification to any of the issues and confusion, if any, in respect of the work. It would be considered that bidder satisfied himself regarding the details furnished by the owner in the tender document, feasibility of the method of construction and other associated job.

2.0 DETAILS OF JOB :

Design, Detail Engineering & Installation of 355.6 mm OD Pipeline by Horizontal Directional Drilling method at Koshi river crossings including laying of approximately 1320 m of 355.6 mm OD Pipeline & Hook-ups with existing crude oil pipeline. And also Laying of 40 mm Dia HDPE duct encased in 75 mm NB MS pipe across River Koshi of length 1320 m along with crude oil line.

3.0 SCOPE OF WORK:

3.1 Preparation of detailed construction / installation drawings, method, statements for Owners approval after site verification

3.2 Submission of QA/QC procedure for Owners approval.

3.3 The scope may be broadly summarized for each location as follows:

- a) Mobilization of materials and equipment to work-site and making of approaches.
- b) Welders Qualification Test.
- c) Design and Installation of submerged pipeline crossing.
- d) Supply of Heat- Shrinkable sleeve for joint coating.
- e) Handling & Transportation of pipes and coating materials.

- f) Stringing, Welding, Radiography and Hydro-testing prior to installation.
- g) Post – installation Hydro-test.
- h) Hook up with existing pipeline.
- i) Crude oil handling and transportation.
- j) Retrieval of pipes.
- k) Refurbishment of coating,
- l) Back filling and Restoration of site.
- m) Laying of HDPE duct.

3.4 Taking delivery of Owner-supplied from the designed location at PS8, Sonapur and transporting them to work sites. Repair of pipe ends, if any.

3.5 Mobilizing equipment, manpower and other resources etc. site preparation including arrangement of additional land required for pipeline stacking / welding, stringing and equipment placement, preparation launching area / facilities and access to work site etc.

3.6 String preparation including pipe welding, inspection and 100% radiographic inspection of the girth welds.

3.7 Carryout post-installation gauging and hydrostatic testing of the pipeline.

3.8 Repairing of damaged 3LPE coating of line pipe during taking over at company's yard including supply of all repair material. The job covers complete removal of defective coating and applying repair patch of coating as directed by the Engineer-in-charge.
N.B: Any coating repair after taking over shall be carried out at Contractor's cost.

3.10 Replace the Hydro test water by pigging with treated water having corrosion inhibitor with sufficient PPM in a manner to avoid corrosion effect at least for one year. End cap have to be welded.

3.11 Laying of pipe size 355.6 mm dia 11.92 mm/ 7.92 mm wall thickness including transportation, end preparation, making Tie Joint, welding, 100% radiographic inspection, trenching, dewatering, coating & wrapping, lowering, backfilling, existing pipeline crossing etc in all type of terrain in OIL's ROW / ROU including supply of all consumables, transportation of required pipes from company's yard and complete in all respect as per specification. Total approximately 120 m.

3.12 Make trench across the ROW manually at 15 mtr interval (approx) for identification of other utilities like pipeline, cable etc and provide adequate protection of the utilities present against any damage during execution.

3.13 Transportation of 355.6mm dia 7.92 / 11.91 mm wall thickness line pipes from OIL's dump site at PS8 Sonapur to site including loading, unloading and stacking as per specification provided herein or as directed by the engineer-in- charge.

3.14 Making field bends of 355.6 mm dia 11.92/ 7.92 mm wall thickness pipe of bend radius more than 20D including transportation, inspection as per specification or as per site requirement.

3.15 Carrying out air pigging, gauging with aluminum plate and hydrostatic testing of complete pipeline along with hydro-test of the completed string up to 85% of SMYS or. 120 kg/cm², whichever is minimum for 24 hours, this shall include repair / replacement of defects and re-testing till successful hydro test is achieved approximate length 1500 mtrs.

3.16 Carrying out coating & wrapping of the pipeline by CTE / cold applied tape and holiday inspection and repair of coating damages, if any.

3.17 Proving of internal diameter of pipe for the newly laid pipe segment including HDD portion using aluminum gauge plate pigging as per relevant codes and standards.

3.18 Preparation and creation of the logistic support for execution of Hook up job which shall involve infrastructure development. The Shut-down job shall complete within 48 hrs from the time allotted by the company. The work shall be carried out round the clock basis. Two separate independent team with all equipment and manpower shall be deployed each end at hook up job locations. All equipment and man-power required for successful completion of the job shall be made available hot-stand by during shut-down period. The Equipment such as Air compressor-2 nos, Recovery van / crane / hydra - 1 no Generator- 1 no shall be kept on hot standby mode for 72 hrs.

3.19 Making arrangement for Air Pigging of the entire segment of old pipe to evacuate crude oil and sludge and make blind at both end by welding. The job includes Handling, collection and transportation of spill during Hook-up.

3.20 Making pit to accommodate spilled crude oil. This includes arrangement of the land, shielding of the pit walls with suitable polythene sheet to minimize seepage, collection of the crude oil into the pit. The excavated earth shall be stacked of size- 2m wide & 1 m height and 1 m away from pit boundary. Stacked earth and pit side wall shall be dressed suitably for laying polyethylene sheet. Arrangement of land shall be done by way of leasing or any other suitable means. Pit to be dug on both side of the hookup location.

3.21 Collection and Handling of Spill into the designated earthen Pit excavated for the purpose. This includes collection of the crude oil into the pit, making arrangement for pumping the crude oil from the pit in to the pipeline and all safety aspects during the operations.

3.23 Retrieval of pipes from under ground section. The job shall include Air Pigging of the entire segment, Collection and handling of product and sludge from old pipes, cutting of the pipes at 10m interval with Hacksaw, Dismantling of the hangers and loading, unloading and onward transportation to PS8.

3.22 Hook-up with existing pipeline at both end including clearing, grading, trenching, dewatering, end preparation, welding, radiographic inspection, coating, & wrapping and back filling within 60 hrs including cutting of existing pipe by hacksaw, Cleaning the area, Spreading of dry sand, preparation for welding etc. complete in all respect. The job includes providing sand, electrode, hacksaw etc required for successful completion of the job.

3.23 Retrieval of pipes from underground section. The job shall include Air Pigging of the entire segment, Collection and handling of product and sludge from old pipes, cutting of the pipes at 10m interval with Hacksaw, Dismantling of the hangers and loading, unloading and onward transportation to PS8.

3.24 Coating and wrapping of existing 355.6mm (14") dia pipeline by CTE. the job involves scrapping of the existing coating; sand-blasting (including supply of sand); transportation of material to site; removal of scraps; providing protection during sand blasting; applying primer, and subsequent application of cold applied tape

3.25 Installation of 508 mm OD 6 mm thick casing pipe for Road crossing by way of boring and insertion of 355.6 mm OD carrier pipe complete with casing pipe, insulators, vent pipes end seals and including transportation of all materials, welding, radiographic inspection, Hydro testing, treating, testing and tie-in as per specification & applicable drawings including all consumables except casing end seals..

Note: Casing end seals shall be supplied from Company stock.

3.26 Testing Shipment and Installation of line Gate valve at down-stream end, size 355.6 mm dia with valve box and its enclosure after Hydrostatic testing including excavation, dewatering, radiographic inspection of welding joints, treating with coal tar enamel, painting, necessary supports & foundation and placement of neoprene / polyethylene insulating mat of size 1mx1m x 254mm thick between the foundation & valve as per construction specification & applicable drawings. The job also include making of earth filled approach road of apprx dimension to Valve from nearest high land (embankment) as directed by Engineer-in -charge, OIL.

3.27 Retrieval of valves, boxes and transportation to PS8 Sonapur. The job shall include retrieval of valves, loading, transportation and unloading at PS8, Sonapur.

3.28 Preparation & submission of „As-Built“ drawings & record.

3.29 All other works, which are not specifically indicated above, but required for successful completion of the works as per the tender documents, drawings, construction methodology & detailed engineering calculations etc.

3.30 Submission of daily progress reports

3.31 Restoration of site and final clean-up including de-mobilization.

4.0. **SCOPE OF SUPPLY**

4.1. **OWNER'S SCOPE OF SUPPLY.**

a) The Owners scope of supply shall be limited to the supply of the Followings:

i) 355.6 mm OD x 7.91 / 11.92 mm WT, API 5L, G-46 pipes from the designated stockpile location at PS8, Sonapur.

ii) Coating materials as required.

iii) Gate valve

4.2 **CONTRACTOR'S SCOPE OF SUPPLY**

All other equipment, materials, consumables, etc. not specifically indicated above, but are required for successful completion of the works as per the tender documents, drawings / construction methodology / detailed engineering calculations etc. shall be included in the Contractor's scope of supply.

5.0. **OWNER'S RESPONSIBILITIES**

Owner shall review and approved detailed engineering, including engineering analysis/calculations, work procedures/construction methodology and drawings etc. prepared by the Contractor for execution of the entire job.

6.0 **CONTRACTOR'S RESPONSIBILITIES.**

6.1 Prior to quoting prices, the bidder shall be deemed to have visited the site and satisfied himself regarding the details furnished by the Owner in the tender document and the feasibility of the method of construction for the crossing and associated completion of the job.

6.2 Land required for Pipe stringing, operation and associated facilities etc. shall have to be arranged by the contractor at his own cost. Cost of making temporary access road to site, payment to the landowners if and when necessary, crop compensation etc. for the previously mentioned purpose shall be borne by the contractor.

6.3 Contractor shall be solely responsible for settling all compensation and disputes arising out of crop, property, any other damage caused thus, or his team during positioning the rig, pipeline stringing, construction and other associated works.

6.4 Disposal of wastes shall be exclusive responsibility of the Contractor. The contractor shall obtain any permits, permission or clearances required in this regard.

6.5 Contractor shall provide particulars of his qualified skilled / unskilled personal and equipment, instrument tools and tackles and all other necessary materials and facilities required for successful execution of the entire job.

6.6 Contractor shall supply all the materials required for permanent incorporation in the works as per his scope of supply, specified in the document.

6.7 Contractor shall use reasonable means / endeavors to protect all existing structures or utilities at or near the site, belonging to the company, the government or other third party facilities or installations from any kind of damage. The contractor shall also undertake to repair and restore such damage resulting from Contractor's failure to use suitable means/endeavors to protect the same.

Any such repair or restoration shall be at Contractor's expense and shall not be reimbursable.

6.8 All surplus materials supplied by Contractor / Owner and all trash, refuse and spoil materials shall be collected and disposed off / returned to the Owner's store by the contractor at his own expenses, as the case may be.

7.0 TECHNICAL PARAMETERS:

7.1 Actual construction shall be as per the owner's approved construction drawings to be developed by the contractor and approved by the owner and statutory authority, if any, as per provisions of the tender documents.

Contractor shall make site investigation before submission of the bid and no compensation, whatsoever, shall be payable on this account subsequently.

8.0 WATER AND POWER SUPPLY:

8.1 Contractor is responsible to arrange the required water and its storage at the site and power requirement at his own cost for execution of the work.

9.0 TIME OF COMPLETION

Time of completion shall be 18 (twelve) months from the date of issue of work order at a single stretch.

The time of completion shall be encompassing time for mobilization, approval of the design & other materials, if any.

10.0 CONSTRUCTION :

Contractor shall observe all laws, rules and regulations, and requirements both National and local pertaining to the work in addition to the specified codes of the specifications.

11.0 INSTALLATION AND INSPECTION :

The contractor shall carry out required supervision and inspection as per the QAP and furnish all assistance required by the owner in carrying out inspection work during this phase. The owner shall have Engineers, Inspectors or other authorized representatives, who shall have free access to the work site all throughout. If representative of the owner notifies the contractor's authorized representative, of any deficiency, or recommends action regarding compliance with the specifications, the contractor shall make every effort to carry out such instructions in conformance to the specifications and approved drawings as per the best engineering practices.

12.0 EXISTING FACILITIES :

Existing facilities like drains, pipes, pipelines, cables, overhead wires, OFC cables and similar services encountered in the course of the work shall be protected against damage by the contractor at his own cost, such that the aforesaid services remains un- interrupted to the satisfaction of the owner and are not likely to hinder the operation of such services.

Any damage affecting the existing facilities / structures due to the contractor's fault shall be repaired by the contractor at his own cost to the satisfaction of the owner or the Engineer in charge of the concerned authority.

13.0 CONSTRUCTION EQUIPMENT :

All construction equipment to be deployed shall be in sound operating condition, safe and fit for the intended purpose and to have a sufficient supply of spares parts to avoid delays in the completion of the work. All construction equipment shall be subject to inspection and approval from time to time by the owner for ensuring conformity with the

standard. Any such equipment, which is rejected or non-conforming with the standard shall be promptly repaired or removed / replaced by the contractor at his own cost.

14.0 TEST AND INSPECTION

a) The contractor shall carry out various tests, as enumerated in the technical specifications of these technical documents that will be furnished to him during the execution of the work.

b) All the required test pertaining to execution of the work either on the field or in laboratories and supply of materials by the contractor shall be carried out by himself at his own cost. All test equipment including recording / measuring gauges / instruments shall be calibrated and necessary certificates shall be shown issued by the statutory agency / test houses to the effect that the test equipment / instruments have been calibrated as per the standard practices on demand.

c) The contractor shall carry out all instructions given during inspection(s) and shall ensure that the work is being carried out in accordance to the technical specifications and relevant codes and practices. Contractor shall submit daily work programme to the Engineer in charge.

d) Any work, not conforming to the execution drawings, specifications or codes shall be rejected forthwith and the contractor shall carry out the rectification at his own cost.

e) All the results of inspection and tests will be recorded in the inspection reports, pro forma to be approved by the Engineer in charge. These reports shall form part of the completion document.

15.0 COMPLETION CERTIFICATE :

15.1 Within 15(fifteen) days of issue of final test certificate, the contractor shall clear the job-site of all surplus materials, equipment and machinery and shall demolish / dismantle including removal of all temporary work structures and constructions. The contractor shall remove all rubbish and restore the job-site to the satisfaction of the Engineer in charge.

15.2 In addition to the stipulations contained in the clauses of GCC, the contractor shall submit the following documents as prescribed by the Engineer in charge.

a. Declaration in respect of completion of works.

b. Material reconciliation statement duly verified and certified by the site engineer.

c. Manufacturer's test certificate for all materials supplied by the contractor.

d. All test certificates carried out by the contractor in conformance with the QAP.

e. Certificate of return of all surplus materials, equipment Machineries etc, if any supplied by the owner. f. Pipe-gauging report.

15.3 The engineer in charge shall issue a completion certificate in respect of the works within 15(fifteen) days of receipt of the application along with the documents indicated in 15.2.

The decision of the Engineer in charge as to the acceptability of the „material reconciliation statement“ furnished by the contractor and as to the irrecoverable losses if determined to be reasonable, shall be final and binding upon the contractor.

15.4 The final bill shall not be accepted for processing unless the requisite completion certificate is furnished along with document.

16.0 PRICE ESCALATION:

“The contract price shall deem to be “firm and valid“ for the entire duration of the contract till the completion of the work and shall not be subjected to any variation due to increase of price of materials, utilities etc.

17.0 MOBILIZATION ADVANCE:

No mobilization advance shall be admissible for carrying out work.

18.0 FIRE FIGHTING AND SAFETY EQUIPMENT / SERVICES:

(As per API wherever applicable)

Safety: Contractor shall observe such safety regulations in accordance with acceptable oilfield practice and applicable Indian Laws. Contractor shall take all measures reasonably necessary to provide safe working conditions and shall exercise due care and caution in preventing fire, explosion etc and maintain fire control equipment in sound condition at all times. Contractor shall conduct such safety drills etc. as may be required by Company at prescribed intervals.

- i) Contractor shall provide all necessary PPE as required.
- ii) Fire protection at site shall be the responsibility of the Contractor. Necessary action shall be taken and prior arrangements to be made for providing competent persons trained in the field of firefighting at the site.
- iii) Documentation, record keeping of all safety practices should be conducted as per international / Indian applicable laws, act, regulations etc, as per standard Oilfield practice and these records should be made available for inspection at any point of time. The H.S.E (Hygiene Safety and Environment) policy as well as emergency procedure manual should be kept at site. Compliance of these shall be the sole responsibility of the Contractor.

19.0 SECURITY SERVICES:

Contractor shall be wholly responsible for complete Security of their personnel, their Rig packages, Base Camp, operation, transit etc. and arrange suitable, complete and best Security services accordingly on round the clock basis for their personnel and equipment throughout the tenure of the contract. All security related issues shall be dealt by the Contractor on their own including dealing with Government agencies. Company in no case will be involved in security related issues, relating to Contractor's personnel and material. Contractor shall also be responsible for the safety and security of Company's personnel/ equipment/ tools/materials etc. in the site and camp site and shall provide best security services to them during the tenure of the contract.

- i) **Set-Off :**
Any sum of money due and payable to the Contractor (including Performance Security refundable to them) under this or any other Contract may be appropriated by OIL and set-off against any claim of OIL (or such other person or persons contracting through OIL) for payment of a sum of money arising out of this contract or under any other contract made by the Contractor with OIL (or such other person or persons contracting through OIL).

- ii) **Subsequently Enacted Laws :**

Subsequent to the date of issue of letter of intent if there is a change in or enactment of any law or interpretation of existing law, which results in additional cost/reduction in cost to Contractor on account of the operation under the Contract the Company/Contractor shall reimburse/pay Contractor / Company for such additional / reduced costs actually incurred.

- iii) **Pollution and Contamination:**

Notwithstanding anything to the contrary contained herein, it is agreed that the responsibility and liability for pollution or contamination shall be as follows:

- a) Contractor shall assume all responsibility and liability for cleaning up and removal of pollution or contamination which originates above the surface from spills of fuels, lubricants, motor oils, pipe dope, paints, solvents and garbage wholly in Contractor's possession and control and/or directly associated with Contractor's equipment and facilities, caused, and that originating from normal water base drilling fluid and drill cuttings.
- b) Contractor shall assume all responsibility and liability for all other pollution or contamination, howsoever caused including control and removal of same, which may occur during the term of or arising out of this contract

and shall indemnify Company from and against all claims, demands and causes of action of every kind and character arising from said pollution or contamination, including but not limited to that which may result from fire, cratering seepage or any other uncontrolled flow of oil, gas, water or other substance, as well as the use or disposal of oil base drilling fluids.

c) In the event a third party commits an act of omission which results in pollution or contamination for which either the Contractor or Company, by whom such party is performing work is held to be legally liable, the responsibility shall be considered as between Contractor and Company, regardless of the party for whom the job was performed and liability as set forth in (a) and (b) above would be specifically applied.

d) Contractor shall be responsible for any sound/noise pollution arising out of the Rig package or other items used by Contractor at site. Contractor shall sort out the noise/sound pollution with the third party either by minimizing the sound/noise pollution with technological means or by compensating the affected people practicing the system and procedure followed by OIL. Contractor must ensure that there is no disruption of operation due to sound/noise pollutions.

20 DISCIPLINE :

The Contractor shall maintain strict discipline and good order among their respective employees and their respective Sub-contractors, if any, and shall abide by and conform to all rules and regulations promulgated by the Company and Contractor governing the operations at the assigned worksites. Should the Company feel with just cause that the conduct of any of the Contractor's personnel is detrimental to Company's interests; the Company shall notify Contractor in writing the reasons for requesting removal of such personnel. The Contractor shall remove and replace such employees at their expense within 7 days from the time of such instruction given by the Company.

21.0 WATER MANAGEMENT:

i. Strict control has to be made in on the use of water. Wastage of water increases the effluent volume in the pit and may aggravate pollution problems.

ii. The valves, glands, hoses etc. are to be checked for any leakage and the same to be informed immediately to the concerned for rectification.

iii. Arrangements have to be made for pumping effluents into the nearest dry pit in case of emergency.

22.0 EFFLUENT PIT BUNDS:

i. Regular checks are to be made to ensure that there are no leakage/seepage/overflow of effluents from the pit into the surrounding areas.

ii. The bunds / walls of the effluent pit are to be checked by Contractor for any breaches during the operation. Any imminent breach of effluent bunds and walls shall be immediately attended by Contractor to restrict pollution.

23.0 COLLECTION OF USED / BURNT LUBE OIL:

The used lube oils are to be collected separately in drums. Floating burnt oil, if any, in the effluent pit has to be lifted and collected into drums immediately.

24.0 COMPREHENSIVE 'HSE' GUIDELINES:

A) It will be solely the Contractor's responsibility to fulfill all the legal formalities with respect to the Health, Safety and Environmental aspects of the entire job (namely; the person employed by him, the equipment, the environment, etc.) under the jurisdiction of the district of that state where it is operating. . Ensure that all sub- Contractors hired by him comply with the same requirement as the Contractor himself and shall be liable for ensuring compliance all HSE laws by the sub or sub- sub contractors.

B) Every person deployed by the Contractor must wear safety gadgets to be provided by the Contractor. The Contractor shall provide proper Personnel Protective Equipment as per the hazard identified and risk assessed for the job and conforming to statutory requirement and Company PPE schedule. Safety appliances like protective footwear, Safety Helmet and Full Body harness has to be DGMS approved. Necessary supportive document shall have to be submitted as proof. If the Contractor fails to provide the safety items as mentioned above to the working personnel, the Contractor may apply to the Company (OIL) for providing the same. OIL will provide the safety items, if available. But in turn, OIL will recover the actual cost of the items by deducting from Contractor's Bill. However, it will be the Contractor's sole responsibility to ensure that the persons engaged by him use the proper PPE while at work. All the safety gears mentioned above are to be provided to the working personnel before commencement of the work.

C) The Contractor shall prepare written Safe Operating Procedure (SOP) for the work to be carried out, including an assessment of risk, wherever possible and safe methods to deal with it/them. The SOP should clearly state the risk arising to men, machineries & material from the mining operation / operations to be done by the Contractor and how it is to be managed.

D) The Contractor shall provide a copy of the SOP to the person designated by the mine owner who shall be supervising the Contractor's work.

E) Keep an up to date SOP and provide a copy of changes to a person designated by the Mine Owner/Agent/Manager.

F) Contractor has to ensure that all work is carried out in accordance with the Statute and SOP and for the purpose he may deploy adequate qualified and competent personnel for the purpose of carrying out the job in a safe manner. For work of a specified scope/nature, he should develop and provide to the mine owner a site specific code of practice in line.

G) All persons deployed by the Contractor for working must undergo Mines Vocational Training, initial medical examination, PME. They should be issued cards stating the name of the Contractor and the work and its validity period, indicating status of VT, IME & PME.

H) The Contractor shall submit to Factory Inspector returns indicating - Name of his firm, Registration number, Name and address of person heading the firm, Nature of work, type of deployment of work persons, Number of work persons deployed, how many work persons hold VT Certificate, how many work persons undergone IME and type of medical coverage given to the work persons

I) The return shall be submitted quarterly (by 10th of April, July, October & January) for contracts of more than one year. However, for contracts of less than one year, returns shall be submitted monthly.

J) It will be entirely the responsibility of the Contractor/his Supervisor/representative to ensure strict adherence to all HSE measures and statutory rules during operation in OIL's installations and safety of workers engaged by him. The crew members will not refuse to follow any instruction given by Company's Installation Manager / Safety Officer / Engineer / Official / Supervisor/Junior Engineer for safe operation.

K) Any compensation arising out of the job carried out by the Contractor whether related to pollution, Safety or Health will be paid by the Contractor only.

L) Any compensation arising due to accident of the Contractor's personnel while carrying out the job, will be payable by the Contractor.

M) The Contractor shall have to report all incidents including near miss to Installation Manager / departmental representative of the concerned department of OIL.

N) The Contractor has to keep a register of the persons employed by him/her. The Contractor's supervisor shall take and maintain attendance of his men every day for the work, punctually.

O). If the Company arranges any safety class / training for the working personnel at site (Company employee, Contractor worker, etc.) the Contractor will not have any objection to any such training.

P) The health checkup of Contractor's personnel is to be done by the Contractor in authorized Health Centers as per OIL's requirement & proof of such test(s) is to be submitted to OIL. The frequency of periodic medical examinations should be every five years for the employees below 45 years of age and every three years for employees of 45 years of age and above.

Q) To arrange daily tool box meeting and regular site safety meetings and maintain records.

R) Records of daily attendance, accident report etc. are to be maintained in Forms by the Contractor.

S) A Contractor employee must, while at work, take reasonable care for the health and safety of people who are at the employee's place of work and who may be affected by the employee's act or omissions at work.

T) A Contractor employee must, while at work, cooperate with his or her employer or other persons so far as is necessary to enable compliance with any requirement under the act or the regulations that is imposed in the interest of health, safety and welfare of the employee or any other person.

U) Contractor's arrangements for health and safety management shall be consistent with those for the mine owner.

V) In case Contractor is found non-compliant of HSE laws as required Company will have the right for directing the Contractor to take action to comply with the requirements, and for further non-compliance, the Contractor will be penalized prevailing relevant Acts/Rules/Régulations.

W) When there is a significant risk to health ,environment or safety of a person or place arising because of a non-compliance of HSE measures Company will have the right to direct the Contractor to cease work until the non-compliance is corrected.

X) The Contractor should prevent the frequent change of his contractual employees as far as practicable.

Y) The Contractor should frame a mutually agreed bridging document between OIL & the Contractor with roles and responsibilities clearly defined.

Z) For any HSE matters not specified in the contract document, the Contractor will abide the relevant and prevailing Acts/rules/regulations/pertaining to Health, Safety and Environment.

TERMS OF REFERENCE

SPECIFICATION FOR HOOK UP OF SEGMENTS WITH EXISTING PIPELINE.

1.0 General:

- i) This specification covers the minimum requirements for the various activities to be performed by the contractor for the engineering and construction of pipeline & hooking up the HDD segment with existing Pipeline. This specification shall be read in conjunction with the conditions of all specifications and documents included in the tender.
- ii) Contractor shall , with due care and diligence , execute the work in compliance with all laws, bylaws, ordinance, regulations etc and provide all services and labour, inclusive of supervision thereof , all materials, equipment, appliances or other things of whatsoever nature required for execution of the work excluding the materials indicated as “owner supplied materials”.
- iii) The contractor shall deemed to have inspected and examined the work sites and its works in the surroundings and the means of access to the work site and to have satisfied himself with regard to practicability of carrying out the specified works thereof, including subsurface conditions and climatic conditions, the extent and nature of the works and materials necessary for the completion of the works.
- iv) The contractor at his own cost and initiatives shall arrange access to work site including the temporary stock-yard constructed for execution of the work.
- v) The contractor shall provide and maintain at his own cost guards, fencing, watch and ward service, all lights etc, wherever necessary or on being advised by any authority in the interest of the work and properties for the safety and conveniences of public.
- vi) The restoration of the entire area which had been temporarily used for execution of the work by the contractor including temporary RoW for accessing to the site , storage yard etc shall deemed to be included in the scope of work.
- vii) The contractor shall provide public conveniences and other facilities to owner’s personnel in any phases of construction.

2.0 Construction Procedure:

- a) Contractor shall furnish, before commencing any work at site, for owner’s approval a detailed pipeline layout drawings for the purpose of hook up of the HDD section with existing pipeline.
- b) The construction procedure shall include but not be limited to the following:
 - i) Project Organization Chart: This shall indicate organizational set up at site and manpower deployment.
 - ii) Details of equipment: Complete list of all equipment to be deployed with technical characteristic and capacity of each equipment including instrumentation, monitoring and control equipment.
 - iii) Pipe string preparation details (hauling, stringing, welding etc.)
 - iv) Hydrostatic test procedure (pre installation).
 - v) Method of laying covering all steps of construction, excavation, gauging air pigging, making necessary bends, backfilling etc.
 - vi) Shut down time at each location shall be as specified in the SOR and schedule shall be in accordance with overall time schedule for the project.
 - vii) Approval of the method, by the owner, used by the contractor shall in no way relieve the contractor from responsibilities for safe and satisfactory working and operational use of the pipeline system

3.0 Delivery and Transportation of Pipes

3.1 General

- a) This specification covers delivery, transportation, handling and stacking of line pipes. The contractor shall take delivery of the pipes from the Company’s designated stock- yard.
- b) All acts, deeds, matters and things required fulfilling the general transportation obligation, all municipal and other statutory provisions, rules,

regulations & orders related to transportation of pipes shall be the responsibility of the contractor.

c) All other acts, deeds, matters and things whatsoever auxiliary or incidental to the above or necessary to be done to comply with any statute, rule, regulations or orders applicable thereto shall be the responsibility of the contractor.

d) The contractor shall be responsible to plan for and provide suitable labour, material, machinery and equipment necessary for loading, transporting, unloading and stacking of pipes including but not limited to cranes, truck trailers etc as approved by the owner. The trailers should be fitted with wooden saddles with grooves to the size and diameter of the pipes.

e) The contractor shall latch and secure the pipes during transportation in a manner to ensure that pipes shall not slip off and cause damage, dent and wrap due to over balance during transportation. The wire ropes used for lashing should have rubber padded to prevent damage to pipe.

f) In the event of any damage to or loss of any pipe(s) during transportation, the contractor shall indemnify the owner against the consequences. Any resultant loss shall be borne by the contractor, who shall forthwith inform the owner and shall lodge reports, complaints and claims in respect thereof with police, insurance, and / or other authorities as needed.

g) The contractor shall abide by the applicable transportation rules for carrying out the jobs under this contract and follow all safety and security requirements at the stock yard sites and other places of work. The contractor also shall be responsible for ensuring deployment of proper and suitable equipment with experienced staff for carrying out the jobs under the contract.

h) The contractor shall be required to indemnify the owner against any loss, damage, inconvenience caused to any person or property due to this activities while rendering services under this contract till final completion of the work.

i) The owner shall not be responsible for safety or security with relation to the contractor's staff, equipment, or any other properties.

3.2 Transportation:

The contractor shall be responsible for inspection of pipes and damages to the pipe, if any, at the time of taking delivery of pipes. The contractor shall be fully responsible for the line pipes from the time of taking delivery from the stockyard until the time of installation in the permanent location. The contractor shall render/ perform the following incidental services / operations as may be necessary in the course of transportation of pipes to sites.

a) The contractor shall check the pipes for pipe identification marks and shall not transport those pipes, which do not bear identification marks without specific permission from the owner.

b) The contractor shall handle / transport the pipes from the designated stockyard to the Hook up sites without causing any damage to the pipes.

c) Handling of pipes, loading and transportation of the same from the designated stock yard to Hook up sites or temporary stockpile sites including unloading and stacking of pipes shall be with the scope of the contract.

4.0 STRINGING OF PIPES:

a) The pipes shall be unloaded from the trailers and lowered mechanically by means of boom tractor or crane or other suitable equipment using lifting devices as mentioned earlier.

b) The Contractor shall receive line pipe from OIL's designated pipe yard preferably at Sonapur. The defective ends requiring rebuffering, jacking-out, cutting and beveling etc. will be recorded before taking over the pipes for which the Contractor shall be entitled to extra compensation at the rate set forth in the Schedule of Rates.

c) Any subsequent damages to the line pipe requiring repairs will be at the Contractor's cost. Pipe shall not be allowed to drop or strike objects, which will damage the pipe but shall be lifted or lowered from one level to another by suitable equipment. Lifting hooks when used shall be equipped with a plate curved to fit the curvature of the inside of pipe. In loading pipe on trucks each

length shall be lowered to position without dropping and each succeeding length shall rest evenly with other lengths on the truck. After loading, suitable chains shall be used to tie the load securely to each bolster. If stock piled, pipe to be placed on suitable skids to keep it clear of the ground and waters and piled not more than four tiers high. Care shall be exercised in handling or stocking of pipe in order to avoid distortion, flattening, denting, scouring or other damages. The Contractor shall provide all necessary timber or other materials required for the stockpiles.

d) The Contractor shall be liable for damage caused by it to State and District roads including bridges, culverts and other facilities. Pipe shall be un-loaded from the stringing trucks and lowered to the ground by means of boom tractor or swinging crane or other suitable equipment. Dragging and skidding of pipe shall not be permitted.

e) In stringing pipe along the right-of-way, clear gaps shall be left between adjacent lengths of pipe and at all well-defined trails to permit the free passage of livestock or vehicles during the time interval between stringing and other construction operations.

f) The contractor shall inspect the strung pipes on the **ROW** and be assured of its quality. Repair and rejection of defective pipe shall be carried out as per the advice of Engineer in charge. Defects marked at the time of taking delivery at the company's stockyard shall be borne by the company at the rates quoted in the schedule of rates. The cost incurred in repair of other defects shall be borne by the Contractor.

g) It shall be the responsibility of the Contractor to see that pipe is strung in accordance with the lists furnished by the Company for the proper placement of pipe by size, grade and other specifications. Any shifting of pipe resulting from failure to comply with these requirements shall be at contractor's expense.

5.0 **TRENCHING (DITCHING):**

a) The Contractor shall dig the pipeline trench on the staked center line of the pipeline, but may deviate if conditions require, with the prior approval of The Company.

b) The Contractor shall by any method that may be necessary or directed, dig the pipeline trench on the cleared and graded right-of-way. Suitable crossings should be provided and maintained over the open trench, wherever necessary, to permit the property owner or his tenants to move stock or equipment from one side of the trench to the other.

c) The Contractor shall exercise care to see that the fresh soil recovered from trenching operation intended to be used for backfilling over the laid pipe in the trench, is not mixed with loose debris or foreign matter.

d) Without regard to soil conditions and/or the topography of the ground, the trench shall be excavated and finished to provide a minimum of 1200 mm of cover over the pipe and to a bottom width of 710 mm.

e) The trench shall be cut with square bottom so that the full width is available for providing slack in the line at the time of laying.

f) The Contractor shall, if necessary dig the trench to such additional depth and width as will, ensure that the finished trench meets the minimum dimensions of 1200 mm cover from the top of the pipe when placed in the trench and backfield from the mean surface of the graded right-of-way, except as noted hereafter. The Contractor shall at its cost, grade the trench so that the pipe has a firm continuous support on the bottom.

g) Where the trench is across or adjacent to roads, highways, railways, canals, ravines and other water-courses or landfalls and at locations where the contour of the land may require additional depth to eliminate unnecessary bending of pipes, The Contractor shall dig such additional depth as shown in the construction drawings and/or as directed by the Engineer to reduce to minimum the required number of bends to lay the pipes to conform with contour of the ground and shall maintain normal covering by cutting the trench deep enough at the crest of ridges and by gradually deepening the trench in approaches to crossings.

h) The bottom and sides of the finished trench shall be uniformly graded and must be free of loose rock, hard clods, large gravel, protruding roots or rock projections, bush, skids, sticks, welding rods, or other hard objects and debris which are liable to cause damage to the coating when the pipe is lowered in.

i) In rocky or rough terrain where dry clay gravel and/or other hard materials are in the bottom of the trench and where, in the Engineer's opinion such conditions will result in injury to the pipe coating, a cushion of fine loose earth for a depth of 150 mm is to be provided to the pipe in order to prevent rock or hard materials from coming into contact with the pipe coating. This cushion as and when required/directed by the Engineer shall be prepared by The Contractor without any extra cost with materials specified or approved by the Engineer. The finished trench shall meet the minimum dimensions of 1200 mm of cover from the top of the pipe when placed in the trench and backfill from the mean surface.

j) In cases where tea bushes, trees or valuable growing timber is encountered in the right-of-way and in locations where in the opinion of the Engineer the use of the trenching machinery may result in unnecessary damage or injury to the property crossed by the right-of-way. The Company may require the trench to be excavated by hand at no extra cost.

k) The Contractor's attention is called to marshy and high water-table conditions which may require the use of pumps, well points or other means of dewatering. No additional compensation shall be due to The Contractor for increased cost due to such conditions. The Contractor shall bear the costs for damage resulting from the disposal of such water from the trench upon properties adjacent to the right-of-way.

l) The Contractor shall also be responsible for locating and protecting the existing and operating underground pipeline and cables in the same right-of-way. He should exercise sufficient care to avoid any damage to the pipeline/cables arising out of its activity on the existing right-of-way.

m) If damage should occur to any structures, line or property as specified above, the property owner of damaged structures, line(s) or property shall be contacted jointly by the representative of The Company and The Contractor and repair shall forthwith be made / carried out by The Contractor at its expense under the direction and to the satisfaction of the property owner. Reports shall be made to the Company by The Contractor of any damage or any other incidents relating to interference with adjacent structures.

n) The Contractor shall be responsible for making all necessary arrangement, to remove bail or pump water from the trench or from wet area if required by the Engineer before lowering the pipe into the trench, without any extra cost to the Company.

o) The Contractor shall check if up-floating danger is present in open trench and then shall take appropriate measures to prevent up-floating, such as applying solid dams and dewatering of trench or temporary filling of water into the line(in exceptional cases).

p) In some areas, up-floating of the pipeline after back-filling is to be reckoned with. If such areas requiring negative buoyancy are encountered during construction, The Contractor shall provide negative buoyancy to the pipe by any standard method/methods to be approved by the Engineer.

6.0 LAYING:

6.1 SKIDS:

Skids of sufficient number shall be supplied by The Contractor to support the pipe to proper height. If pipe is supported over the trench, skids shall be of sufficient length to prevent collapsing of the trench and of sufficient strength to carry the pipe.

For coated pipe, a sufficient number of skids shall be used to minimize damage to coating. Further, if required padding of gunny bags stuffed with wood shavings may be used between the pipe and the skids to safeguard the coating. If slack loops are required, skids shall be properly spaced to permit the introduction of slack loops in the line.

6.2 BENDING:

The pipe shall be laid to conform to the bottom of the trench. The Contractor, in general, shall provide for changes of vertical and horizontal alignment by making cold field bends by the use of a bending machine, approved by The Company, in such a manner as to preserve the cross sectional shape of the pipe. The bending machine shall be capable of making bends without wrinkles, buckles and stretching and pipe diameter shall not be reduced at any point by more than 2.5% of the nominal diameter and completed bend shall pass the sizing pig. The minimum radius of field cold bends of pipe shall not be less than 40 times the nominal pipe diameter. The longitudinal weld in a bend section shall be the neutral axis of the pipe. No welded joint shall be included in a bend. The ends of each bend length shall be straight and not involved anyway in the bending and the length of the straight section shall permit easy joining. Tangents approximate two meter in length are preferred on both ends of cold bends. Over bends shall be made in such a manner that the center of the bend clears the high points of the trench bottom. Sag bends shall fit the bottom of the trench and side bends shall conform and leave clearance to the outside wall of the trench. Any bend rejected by the engineer shall be removed from the line at The Contractor's expense and pipe thus removed will be charged to The Contractor as damaged material.

6.3 SWABBING, NIGHT CAPPING, PIPE BEVELING AND CLEANING ENDS AND JOINTS:

a) Each joint of pipe shall be swabbed with a leather or canvas belt disc of the proper diameter and sufficient length to remove dirt, mill scale and other foreign substances immediately before joining up. The open ends of the pipe shall be securely closed by bolt on metal caps at the end of each day's work and shall not be opened until the work is resumed. Fabric night caps will not be accepted. Particular attention must be paid to capping off at open ends left for tie-ins. Any obstruction remaining in the pipe after the completion of the line shall be removed at the expense of The Contractor. Just prior to aligning pipe for welding, the bevel ends of each joint of pipe and the area immediately adjacent there to shall be thoroughly cleaned of paint, rust, mill scale, dirt and other foreign matter by use of power driven wire buffing wheels, disc sanders or by other approved methods, so as to avoid defects in the completed welds.

b) The Contractor shall re cut and bevel all pipe end as may be necessary to maintain correct alignment and spacing of the pipe. No extra compensation will be allowed by reason of such recutting or rebeveling, except when required because of the original bevel being damaged before the pipe is delivered to The Contractor. All bevels on line pipe shall be made with a beveling machine and oxyacetylene torch; hand beveling will not be permitted. All field bevels shall be cut and finished at right angles to the longitudinal axis of the pipe, evenly and without rough surfaces. A power sander and/or buffer shall be used to finish the field bevel and should be similar to the mill bevel. Repair of damaged pipe ends by hammering and/or heating is not allowed. Dents in bevels over 3mm depth shall be repaired by cutting and rebeveling.

7.0 WELDING SPECIFICATIONS:

7.1 GENERAL

Welding shall be done in accordance with the API Standard for Field Welding of Pipelines, API Standard no. 1104 (latest edition). The following is not to be construed as the complete specifications for welding.

7.2 TYPE AND METHOD OF WELDING

a) Welds shall be made by the manual shielded electric arc process and shall be done in such a manner so as to produce welds as strong as or stronger than the pipe itself. The type of electrodes to be used shall be as follows:

- | | | | |
|------|--------------------------------|---|---------------|
| i) | Stringer, 'Root' or First Pass | - | class E 6010. |
| ii) | 'Hot' or Second Pass- | | class E 7010. |
| iii) | Filler and Subsequent Passes | - | class E 7010. |

The number of passes will vary depending upon the wall thickness. Internal line-up clamps shall be used wherever practicable and external line up clamps shall be used for final Tie in with the existing pipeline.

7.3 The stringer bead shall achieve complete penetration throughout the periphery of the weld and preferably build up a small reinforcement at the root. Weld projection inside the pipe shall not exceed 3 mm. The 'Hot-Pass' or second bead shall run completely around the pipe immediately after the stringer bead and prior to below 94° C. Two welders shall be used to make the 'hot-pass'

both working on opposite sides of the same joint. The 'hot-pass' shall fully penetrate the pipe bevel at each side of the stringer making a deposit heavy enough to avoid pin holing. Completed welds shall have a reinforcement of not less than 0.8 mm and not more than 1.6 mm above the surfaces round the entire perimeter of the weld, and the width of the finished bead shall not be more than 3.2 mm than the original groove.

7.4 No two beads shall be started at the same point. All slag and scale shall be removed by power tool from each bead for visual inspection immediately after each bead is done. Welding shall be continuous and uninterrupted during a pass. While the welding is in progress care should be taken to avoid any kind of movement of the components, shocks, vibrations and stresses to prevent occurrence of weld cracks.

7.5 The length of line in which only 'stringer' and 'hot-pass' beads have been completed shall be limited to 350 metres at the end of each day's work. Should a section of the pipe line remain unfinished or falls from the skids, the contractor shall immediately report the same to the Engineer-in-charge and jointly check for possible cracks prior to restarting the welding on the next day. All costs of repairs shall be borne by the contractor.

7.6 **Welding Procedure Qualification**

a) Welding procedure qualifications shall be carried out in accordance with the relevant requirements of API 1104 (latest edition) or other applicable code and other job requirements by the contractor at his expense. The contractor shall submit the welding procedure to owner for approval immediately after the receipt of the order.

b) Owner shall review, check and approve the welding procedure submitted and shall release the procedure for procedure qualification test. Contractor under field conditions at his own expense shall carry out the procedure qualification. A complete set of test results in approved format shall be submitted to the owner for its approval immediately after completing the procedure qualification test and at least 1(one) week before the commencement of the actual work. Standard tests as specified in the code API 1140 shall be carried out in all cases. It shall be the responsibility of contractor to carry out all the tests required to the satisfaction of the owner.

7.7 **Welders Qualification :**

Contractor shall submit the list of welders to the owner for Welder Qualification Test in accordance with the API 1104/and other applicable specifications at his expense. The butt-weld test pieces of; the qualification test shall meet the radiographic test requirements specified in API-1104.

a) Owner's representative shall witness the test and certify the qualification of each welder separately. Only those welders, who have been approved, shall be employed for welding.

b) It shall be the responsibility of contractor to carry out qualification tests of welders. A welder shall qualify for welding by performing test on segments of pipe of same diameter and the specification as the pipe to be used in system according to the applicable requirement of API-1104.

c) Test specimen shall be cut and using the testing methods described in API 1104 and contractor shall get these tests done as per the direction of owner.

d) Contractor shall submit the welder qualification test reports in the standard format as shown in Exhibit C&D and obtain owner's approval, before commencement of the work.

e) The welder may be recognized as qualified and employed on the lines of the test weld, acceptable in accordance with API standard 1104. The expenses involved during the test and testing of specification are to borne by contractor. However, the pipe required for Welder Qualification Test shall be issued free of cost by the owner.

f) The welders shall always have in their possession the identification card as shown in Exhibit-E and shall produce it on demand by the owner representative. It shall be the responsibility of contractor to issue the identity cards after duly certified by the owner.

g) No welder shall be permitted to work without the possession of identity card.

h) If a welder; is found to perform a type of welding or in a position for which he is not qualified, he shall be debarred from doing any further work. Any welding performed by an unqualified welder shall be cut and redone by a qualified welder at the expense of contractor.

i) Each welder shall identify that portion of weld the has deposited with his allotted symbol number by a weather proof crayon or paint stick on pipe surface near to each weld where stringer bead welder shall identify his weld by putting his symbol near the top of the side, he welded. The hot pass welder shall put his symbol immediately below followed by the symbol of the filler & capping welder below it.

j) The welders employed by the contractor shall be required to take welder qualification test (WQT) before being deployed in pipeline welding jobs. Each welder will be required to make a „position- weld“ on a pipe piece of the same diameter and specifications as that of the pipe. Each test weld will be inspected and tested as prescribed in API Standard 1104.

7.8 Welding Electrode Qualification:

1. Welding electrode used in the welding procedure qualification shall be used in the production welding of the same batch no and of same brand & grade.

2. Before using any electrode of different batch number / brand & grade has to be re-qualified. Only approved welding electrode shall be used in the production welding.

7.9 Welding Equipment and Supply of consumables:

The contractor shall provide/arrange all labour, equipment, tools and supplies including shielded -type welding electrodes of the correct specifications. The contractor shall only purchase the approved brand of electrodes for pipe welding as per qualified as per 5.5.2 (c), in sealed containers and protect these from any deterioration or damage. Electrodes that show signs of deterioration or damage shall be rejected.

All welding machines, line-up clamps, bevelling machines and other equipment and supplies used in connection with welding work shall be satisfactory to the company and must be kept in good condition so as to produce sound welds. Any equipment or supplies that are not satisfactory to the Engineer-in-charge must be replaced with new equipment or supplies approved by the Engineer-in-charge.

7.10 Welding During Inclement Weather:

Welding shall not be done when the quality of the completed weld might be impaired by the prevailing weather conditions, including but not limited to airborne moisture, blowing sands or dust or high wind. The Engineer-in-charge shall decide if weather- conditions are suitable for welding. The contractor shall provide windbreaks of a type that shall give adequate protection for welding.

7.11 Marking of Welds:

The contractor shall furnish each welder employed with a method of marking the weld so that the work of each welder may be identified. Each welder shall mark the pipe adjacent to the weld with the figure assigned to him. In the event any welder leaving the job, his figures shall not be used by any other welder. Steel stamps must not be used.

7.12 Repair of Welds:

a) With the prior permission of the company, welds, which do not comply with standards of acceptability, shall be repaired at contractor's own cost. The joint, cut out or re-welded shall also be redone at the contractor's own cost.

b) Separate Welding Procedure Specification sheets shall be formulated by the contractor and approved by the company repair of welds, simulating the proposed repair.

Separate procedures are required to be approved for:

- i) Through thickness repair,
- ii) External repair and,
- iii) Internal repair.

Welders shall be qualified in advance for repairs.

7.13 **Repair of Defects and Acceptability:**

The Company shall approve all repairs. Root seating or single pass repair deposit shall not be allowed. Internal root defects shall be ground thoroughly and welded with a minimum of two passes. However, while grinding for repairs, care shall be taken to ensure that no grinding marks are made anywhere on the pipe surface.

Only one attempt at repair at any region of the joint / weld is permitted. Repairs are limited to a maximum 30% of the weld length. The minimum length of a repaired area shall be 100 mm as measured over the recapped length.

7.14 **Testing of Welds**

Inspection of all welds shall be carried out as per the latest editions of the applicable codes and specifications. All finished welds shall be visually inspected for parallel and axial alignment of the work, excessive reinforcement, concavity of welds, shrinkage, cracks, undercuts dimensions of the weld, surface porosity and other defects. Under-cutting adjacent to the completed weld shall not exceed the limits specified in the applicable standard/code.

Radiographic examination of cent percent (100%) girth welds for pipes shall be carried out by an independent agency to be engaged by the contractor. Engineer in charge shall use discretion to cut out welds for further tests, if it is desired. The cost of repairs and replacement of cut-out shall be at the contractor's expense.

8.0 **WELDING/RADIOGRAPHIC INSPECTION SERVICES**

8.1 **Applicable Standards:**

This specification shall apply in conjunction with of the following standards:

- i) API 1104, Standard for welding pipelines and related facilities.
- ii) ASME B31.4 code for liquid petroleum transportation piping system.
- iii) ASTM E94, recommended practice for radiographic testing.
- iv) ASTM E 142, standard method for controlling quality of radiographic testing.
- v) The American Society for Nondestructive Testing.

8.2 **Qualification of Engineers / Inspectors and Radiographers:**

a) The Welding Engineers / Inspectors shall be duly qualified and possess minimum Level -II certificate from any certified Institute of repute and shall possess minimum 5 years of relevant experience in the field.

b) The Pipeline Radiographers shall be „qualified“ in accordance with the requirement of API 1104 and to the full satisfaction of the Company.

c) Contractor shall furnish copies of certificates of all radiographers „qualified“ as per above to the Company before engagement of a radiographer to inspect production radiography.

The certificate record shall include:

- i) Background and experience record/ details.
- ii) Training Courses attended with certificate(s).
- iii) Technical Examination pass
- iv) Doctor's report of radiographer's Jaeger J.1 acuity eye test.
- v) Date of qualification and re-qualifications.
- d) The radiographers will be required to qualify with each radiographic procedure they use, prior to performing production radiographs as per this procedure.
- e) The Company shall have the right to debar any employee of Contractor when evidence proves that such individual is not performing the work assigned to him in accordance with the specification.

8.3 **Equipment and Accessories:**

a) Contractor shall make necessary arrangements at his own expense, for providing the radiographic equipment, radiographic films and all the accessories for carrying out the Radiographic Examination of the weld joints for satisfactory and timely completion of job.

b) For carrying out the radiographic examination for the pipe string, the contractor shall have all the required facilities for film processing. The contractor shall be equipped with suitable mobile/stationary type dark- rooms. Film viewer to be used, shall be equipped with the film illuminator that has a light source of sufficient intensity and suitably controls to allow viewing film densities up to 4.0, without damaging the film.

8.4 WELDING INSPECTION:

a) Scope of Work:

To provide qualified, experienced and competent personnel with adequate equipment to ensure enforcement of Welding Inspection Procedures and other associated services, as required for laying welding of line pipe, as per the provision of API 1104, latest edition.

b) Duties:

Inspection duties to be performed under the specification shall be as follows :

- i) Welding Procedure Qualification
- ii) Welding Electrode Qualification
- iii) Welder-Qualification.
- iv) Inspection, control and test by visual, radiographic and physical means of all welding joints, the welding carried out by the welders. All pipe ends shall be inspected for out of roundness, correctness of bevel and root face.

v) Contractor shall submit the Qualification Test Reports referred herein, in the standard format approved by the Company.

8.5 Radiographic Inspection:

A) Scope of Work:

This covers the radiographic inspection of all types of welded joints of the Pipeline. The welded joints shall include the following

- a) Full girth welds on pipe string .
- b) Welding of installation of block valves, insulating joints and other appurtenances and tie-ins.

B) Procedure:

a) The Contractor shall submit Radiographic Examination Procedure in standard format and approved by the Company. The procedure for Radiographic Examination shall be endorsed by the Company to its entire satisfaction prior to use. The procedure shall also include Radiographic Identification System and Documentation for radiographic interpretation reports and their recording system. An overlap of 40mm at the ends of each film shall be required to ensure that the markings for the first and last location are common to successive films and to establish that no part of a weld has been omitted.

b) The Procedure of Radiographic Examination shall produce high quality radiographs of sufficient density, clarity and contrast so that defects in the weld or in the pipe adjacent to the weld, and the outline and holes of the penetrometer are clearly distinguishable.

c) The contractor shall on a daily basis keep record of each radiograph pertaining to

- i) Radiograph's number,
- ii) Approximate chain ages of weld location,

P18

iii) Whether or not the welds meet the specified acceptance standards.

iv) The nature and approximate location of unacceptable defects observed.

d) It must be possible to relate back to a particular butt weld and welder on piping drawing and pipeline alignment drawing subsequently.

C) Each day's production of processed radiographs shall be properly packed separately, identified by at least the (1) date, (2) radiographic unit, (3) job locations, (4) starting and ending progress survey stations (5) weld number and (6) shall include original and three copies of the daily radiographic record as per relevant clauses. The package shall be submitted to the Company daily, in no case later than the noon of the following day.

D) The contractor shall provide all the necessary facilities at site, such as a dark room with controlled temperature, film viewer etc. to enable the Company to examine the radiographs.

E) Any approval granted by the Company shall not relieve Contractor of his responsibility and guarantees.

8.6 Radiation Source:

Radiographic examination shall be carried out using x-ray radiation or gamma radiation.

8.7 Radiation Protection:

i) The contractor shall be responsible for the protection of all personnel and required monitoring and control on every man working with or near the radiation sources.

ii) In consideration of possible & likely hazards of handling of radioactive source of material, the contractor shall be solely responsible for complying with all rules and regulations set forth by Atomic Energy Commission or any other Government Agencies in India in this regard. The Company shall not be held responsible and shall be kept indemnified by the contractor. Safety equipment as considered adequate by the Company for all necessary personnel shall be made available for use and maintained for immediate and proper use by the contractor.

8.8 Re-Radiography:

i) The weld joints shall be re-radiographing in case of unsatisfactory quality of the welds or the radiographs, at the expense of Contractor.

ii) All the repaired weld joints shall be re-radiographed at no extra cost to the Company in the same manner as that followed for the original welds. In addition, the repaired weld area shall be identified with the original identification number plus the letter R to indicate the repair.

iii) When evaluating repair films, radiographers shall compare each section (exposure) of the weld with the original film to assure that the repair was correctly marked and original defect removed.

iv) The Company will review prior to any repair of welds, all the radiographs of welds which contain, according to the Contractor's interpretation, unacceptable defects. The final disposition of all unacceptable welds will be decided by the Company.

8.9 Protection and Care of Film:

i) All unexposed films shall be protected and stored properly as per the requirements of API 1104 standard and ASTM E 94.

ii) The exposed and unexposed film shall be protected from heat, light, dust and moisture. Sufficient shielding shall be supplied to prevent exposure of film to damaging radiation prior to and following the use of the film for radiographic exposure.

8.10 Preservation of Radiographs:

P18

- i) The radiographs shall be processed to allow storage of films without any discoloration for at least three years. All the radiographs shall be presented in suitable folders for preservation along with necessary documentation.
- ii) All radiographs shall become property of the Company.

8.11 Display of Safety Precautions:

The Safety Provisions should be brought to the notice of all concerned by displaying on a Notice Board at a prominent place of the work sites. The person responsible for "Safety" shall be named by the contractor.

8.12 Enforcement of Safety Regulations/ precautions:

To ensure effective enforcement of the rules and regulations relating to safety precautions, the arrangement made by the contractor shall be open for inspection by the Company or its representatives.

9.0 SPECIFICATIONS: HYDROSTATIC TESTING AND GAUGING**9.1 General:**

a) After the stringing & welding operation has been completed, hydrostatic test and gauging shall be performed on the entire length of the pipeline. Hydrostatic test shall commence only after completion of all mechanical works, i.e. after all welds have been accepted. The contractor shall ensure that all works are complete in all respect and obtain prior written approval from the Company for hydrostatic testing. The pipeline shall be tested in accordance with the requirements of ANSI B31.4 (latest edition) and approved SOP.

b) The test medium shall be neutral and fresh water arranged by the contractor. The water to be used shall not be contaminated and free from sand or silt and be filtered. The contractor shall submit laboratory test reports of water to be used for testing. The contractor shall arrange and install all temporary piping(s), which may be necessary to connect from source of water to its pumps and manifolds/tank ages.

c) The contractor shall arrange for a aluminium gauging plate having diameter equal to 95% of the internal diameter of the pipe. The contractor shall supply and install all temporary scraper launcher / receivers and other piping, materials and consumables required for the purpose.

d) Before filling operation the contractor, shall clean the pipeline by air driven „pigs“ having spring loaded brushes to remove all mill scale rust/sand from inside of pipe sections. The finishing touch shall be executed with pigs provided with jet holes or nozzles for air to keep the internal dust in turbulence ahead of the pigs. The number of pig runs shall depend upon the cleaning results and shall be determined „in situ“ by the Company.

e) After cleaning the pipeline by using „air“ and accepted by the company, the whole length of pipeline shall be filled with water. A pig fitted with aluminium gauging plate of approved design to prove the internal diameter of the pipe string shall be furnished by the contractor and propelled through the line ahead of the water in order to purge out the air. Vents should be provided at desired points in the pipeline segment to purge out air while the system is being filled with water. When the line is completely filled & purged out of air, test pressure shall be applied which produces a hoop stress equal to 90% of the minimum yield strength at the section having thinner most wall thickness or as directed by the Engineer-in-charge.

f) The pressurization shall be performed in the presence of the Engineer-in-charge at a moderate and constant rate not exceeding 2 bar / min. Volume required to reach the test pressure shall be recorded periodically throughout the pressurization as follows:

- ☐ Each 5 bar increments up to 80% of test pressure as recorded by the dead weight tester;
- ☐ Each 2 bar increment between 80% of 90% of test pressure as recorded by the dead weight tester;
- ☐ Each 0.2 bar increments between 90% of the test pressure to full test pressure as recorded by the dead weight tester.

P18

The pressurization „cycle“ shall follow the sequence as under:

- ☐ Pressurization to 50% of test pressure, hold pressure for 1 hour.
- ☐ Release pressure to 0(gauge).
- ☐ Pressurize to 75% of test pressure, hold pressure for 1 hour.
- ☐ Release pressure to 0(gauge).

In case, during the hold pressure periods indicated above, a decrease in pressure is observed, the above operations shall not be repeated more than twice after which the line shall not be considered capable of test, until the Contractor has isolated and eliminated the cause for the lack of water tightness.

g) Upon bringing a hydrostatic test section to the full specified test pressure, a stabilization period of 2 to 4 hours may be required before full stabilization. During the period, the pressure shall be maintained either by bleeding off or by adding water.

h) After stabilization, the test pressure shall be re-established and the line completely isolated for the 24 hours test. If pressure maintained during the stabilization period are acceptable to the Engineer-in-charge, the stabilization period may become part of the 24 hours test.

i) During the testing period the following measurements shall be recorded/reported;

- ☐ Every one hour pressure measurements from dead weight testers.
- ☐ Every two hours the ambient temperature and the pipe temperature at the thermocouples.

i) The hydrostatic test shall be considered as positive if pressure remains constant throughout the test duration except for change due to temperature effects.

j) The charts from the pressure recording instruments during the pressurization and testing operations shall be preserved for handing over to the Company, as official records of the Test. The charts shall be properly identified and signed by the contractor as being true records of the test. All “failures” shall be numerically and chronologically numbered and reported with appropriate description and date on proper “Test Failure Report” forms. “Failures” on the line resulting from loss of pressure shall be located and repaired by the contractor. Cost of such repairs shall be borne by the contractor except when the failure results from defective pipe or fittings. In the event of the leak being due to defective pipe or fittings supplied by the company, the cost of repair shall be paid/reimbursed by the company as per Schedule of Rates. After leaks or failures have been repaired as disclosed by the pressure test. The test shall be repeated until the specified test pressure can be satisfactorily maintained.

k) During the period of hydrostatic testing, “Safety” sign board in English & local language shall be displayed to „warn“ the people about the testing operation. All necessary precautionary measures shall be taken by the contractor as per relevant standards

All pigs used shall embody an aluminium gauging plate of approved design having a diameter of 95% of internal diameter of the section having heaviest wall thickness in the section. The contractor must ensure free passage of pigs at its own expense.

A responsible engineer/supervisor shall be nominated by the contractor for execution of hydrostatic testing. He shall ensure that all personnel working on the hydrostatic testing spread are fully aware of their individual duties.

The contractor will bleed the line after the testing to remove excessive pressure but will not remove the water. The water will be displaced by the company with crude oil at a later date.

10.0 SPECIFICATION:**COATING**

P18**10.1 REMOVING OLD COATING AND CLEANING**

The old and damaged coating over the pipe shall be removed carefully with the scrappers and small brass hammers, so that outer surface of the pipe is not damaged. After the coating is removed, the pipe surface should be thoroughly cleaned of old primer, scales, rust or any dust particles. The cleaning of pipe surface shall be carried out as per requirement and to the satisfaction of site engineer

10.2 SURFACE PREPERATION: Sand Blasting Surface preparation as per SA 2 ½ is required for application of Cold Applied Tape. For application of Visco Elastic Tape coat Normal cleaning and scrapping may be sufficient.

10.3 REQUIREMENT/SPECIFICATIONS FOR SAND BLASTING

10.3.1. Before starting the sand blasting of steel pipe the surface should be properly cleaned by cotton waste/brushes so that all dust, rust particles, grease, oil, sand or dirt are removed. If necessary a non-contaminating solvent such as Xylene shall be used to remove oil or grease if present.

10.3.2. The surface when viewed without magnification shall be free of all corrosion products, rust, mill scale, old paint /primer or any other foreign matter.

10.3.3. After blast cleaning, the blasted area shall be corresponding to photographic visual standard SA 2 ½ of the Swedish Svensk standard SIS 05 59 00 –Latest edition of “ Pictorial surface preparation standards for Maintaining steel Surface”

10.3.4. The compressor used shall be of size enough to produce displacement of 5.6 to 7 cubic m/min of air at a pressure of 7 kg/sq cm. Standard blasting equipment i.e Hoppers, hoses, nozzles and attachment should be used as per IS 1477 to obtained best results and to maintain safety standards

10.3.5 The abrasive used shall be hard sharp river silica sand of maximum particle size not larger than 1.00 mm IS sieves specification no IS 460 1962 (for test sieves) and should be free from loam and mud. For blast cleaning of small inaccessible spots special care should be taken

10.3.6. The abrasive used should not be larger than 1/3 of the diameter of the nozzle subject to maximum size of 1 mm as mentioned above

10.3.7. Sand blasting surface of pipeline should be primed immediately after completion of blast cleaning work .The time gap between the blast cleaning and application of primer should not be more than 3 hours.

10.3.8. The blast cleaned surface should never be left unprimed overnight. The surface must be thoroughly cleaned and dried before application of primer. If left overnight the surface shall be blast cleaned again at no extra cost.

10.3.9 The blast cleaning operation should be carried out keeping the nozzle at an angle of 30 degree to vertical in order to prevent rebounding abrasive from slowing down the abrasive emerging from the nozzle and to undercut the material to be removed.

10.3.10. For heavily pitted localized surface, the nozzle shall be suitably rotated around its own axis in all planes and held at various angles so that the abrasive cleans out all the pores and interstices of the surface being blasted

10.3.11. The surface profile in blast cleaning should be ideally 50 to 75 microns and not exceeding 100 microns

10.3.12. Suitable spray mask filter type air respirators safety goggles and other safety equipment are to be provided by the contractor to the persons engaged for the job .Blast cleaning agency should take up precautionary measures to protect the pipeline during sand blasting operation.

10.3.13. All fire and safety precautions should be taken before starting the sand blasting on pipeline. Necessary protection surrounding the blasted surface in the trench must be given during sand blasting.

11. APPLICATION OF COATING

Application Tools for Pipe Coating

- a) Hand wrapping machines Inner and Outer wrap.
- b) Paint brush for application of primer.

Cold Applied Tapes/ Self-healing Monolithic Polymer Wrap Coat shall be applied as per applicable codes and standards and as per instructions of the Engineer in

P18

Charge. The application system /process of cold applied tape are to be carried out as per American Water Works Association standard – ANSI/AWWA C-209 latest edition.

Testing Equipment required: For proper quality control, following testing equipment shall be provided by the contractor:-

- a) Humidity meter
- b) SA 2 ½ Surface comparator plate
- c) Press 'O' film with micro meter (For measuring anchor profile)
- d) Wet film thickness gauge
- e) Digital temperature meter.
- f) Wet film thickness gauge.
- g) Coating thickness gauge (0 to 5mm).
- h) Holiday detector (0-25KV)
- i) Peel cutter knife.
- j) Spring balance with E- clamp

11.1. Application of Cold Applied Tape (3ply/2ply)

11.1.1. Priming: A uniform, continuous coat of liquid adhesive shall be applied according to the manufacturer's recommendations and as per AWWA C-209. The wet film thickness shall be measured at every 10 m of primer application and record maintained. The liquid adhesive coverage and curing or drying time shall be sufficient to ensure an effective bond between the substrate and the coating. Liquid adhesive application shall be limited to the amount of surface area that can be wrapped during the same workday as application of the liquid adhesive; otherwise, the steel must be re-primed. After liquid adhesive application and before the tape is applied, care shall be taken to prevent the contamination of the primed surface by any foreign materials, such as dirt and moisture.

11.1.2. Step-Down areas. Where there are any step-down areas, such as at pipe weld joints, repair patch and any other fitment on the pipeline, a compatible, moldable mastic filler shall be used at the step-down areas prior to the application of the tape.

11.1.3. Coating and wrapping. The overlap of the cold applied tape for both inner and outer wrap shall be as specified by the manufacturer. When the use of hand- or power-operated machines to apply the tape is recommended, the contractor shall use the machine recommended by OIL.

Maximum and minimum temperatures for application and handling specified by the manufacturer shall be followed.

11.2 Coating Repair

Damages, flawed areas, holidays, or mislaps to coatings applied to pipeline, special sections, connections, and fittings from any cause during execution of job before final acceptance shall be repaired by peeling back and removing the tape layers from the affected area.

In case of Cold Applied Tape, the repair area shall be thoroughly cleaned, and then brushed with a primer, and then a patch of tape covering a minimum of 4 in. (100 mm) around the affected area shall be applied by wrapping it around the pipe or as specified by the manufacturer.

In case of Visco Elastic Tape, the repair shall be thoroughly cleaned, to remove the old tape and then a patch of new tape shall be applied by wrapping it around the pipe or as specified by the purchaser.

12. ELECTRICAL INSPECTION FOR CONTINUITY

After tape-wrapping operations have been completed, an electrical inspection of all wrapped surfaces shall be conducted with an electrical holiday detector. Any defect in the coating shall be satisfactorily repaired according to Sec. 6.0

12.1. Detector.

The electrical equipment used to test the tape wrapping shall be a low-amperage, adjustable-voltage, pulse holiday detector that uses an audible signaling device. The holiday detector shall have a coil-spring electrode or a brush electrode.

12.2. Power & Frequency.

The primary input power shall be no higher than 20 W, and the minimum pulses at crest voltage shall be 20 Hz.

12.3. Voltage.

The operating voltage of the detector when testing coatings described in this standard shall be determined by the following equation:

P18

$V = 1,250 \sqrt{T}$

Where: V = Inspection voltage, volts; T = Total coating system thickness, mils,
1 mm = 39.37 mils.

12.4. Voltage Adjustment.

Because of variables, such as relative humidity and temperature, the detector voltage shall be checked no less than twice daily, such as before starting work in the morning and again within the following four to six hours. To ensure proper inspection voltage, the equipment shall be grounded correctly and the voltage adjusted according to the instructions of the equipment manufacturer.

12.5. Detector Use.

After the voltage has been properly checked, the electrode shall be passed over the coated and wrapped surfaces one time only at a rate of approximately 30 to 60 ft/min (9 to 18 m/min). If the electrode is stopped while passing over the taped surface, the current to the electrode shall be cut off immediately to avoid possible damage to the coating system.

12.6. Holiday Detection & Repair

Any holidays or missed places on the coated surface will be indicated by an electrical spark between the electrode and the metal surface and by an audible signal. The tape wrapping shall pass the electrical inspection test if no electrical spark occurs. If an electrical spark occurs through the tape coating between the electrode and the metal surface, the holiday shall be marked with a suitable indicator, such as chalk or crayon, to identify the area for repair.

13 REPAIRS OF COATINGS

13.1. All defects in the coating shall be made good immediately after their detection.

13.2. The Contractor shall be responsible for the complete cost, including cost of materials, of making good all defects caused by incorrect storage, handling, application, erection and testing of the protective coating or caused by incorrect application of the coating.

13.3. In the event of numerous defects in the coating, OWNER shall have the right to order the whole coating to be stripped, the pipe cleaned and another coating provided, applied and tested in accordance with this specification at the Contractor's expense.

14.0 ADHESION TEST

14.1. Adhesion test shall be made to determine the proper bond between the tape and the primed pipe. One test for section (of up to 10 m length) shall be carried out initially; afterwards adhesion test is to be done as per the advice of OIL-representative. Repair required due to adhesion testing shall be decided by the OIL-representative.

14.2. Temperature of the tape and pipe to be tested shall be between 10° C and 27°C. If required cold water shall be poured over the test area to bring down the temperature to within the above range.

- i. A test area shall be selected where the tape is smooth for 152 mm in the longitudinal direction of the pipe.
- ii. Two knife cuts of 152 mm long and 51mm apart shall be made through the tape.
- iii. A flat blade shall be used to pry up 51mm of the fabric.
- iv. The 51mm flap of fabric shall be grasped firmly in one hand and shall be pulled with the quick motion in the direction remaining 101 mm of the 152 mm knife cut.
- v. The adhesion is satisfactory if (i) the tape tears at the point of stripping or (ii) the fabric strips from the under lying tape component, leaving no more than 10% or less of the primer or bare metal exposed.

15.0 INSTALLATION OF LINE BLOCK VALVES:

Valve assemblies shall be installed at locations designated by The Company. Valve installations shall include all supports, foundation blocks, enclosures, and insulating assemblies (wherever applicable). The Contractor shall submit the detailed drawing for the foundation block for Company's approval prior to commencement of work. The valve shall be tested to specified test pressure of the pipe before installation. The valve box/enclosures of approved design shall be supplied and installed by the Contractor. The valve assembly, box/enclosures etc.

P18

shall be cleaned by wire brushing to base and given one coat of primer and enamel or aluminium paint as directed.

16.0 HOOK UP AND SHUT DOWN LOGISTICS:**a) HOOK UP WITH EXISTING PIPELINE:**

Hook-up with existing pipeline at both end including clearing, grading, trenching, dewatering, end preparation, welding, radiographic inspection, coating & wrapping and back filling within 48 hrs including cutting of existing pipe by pneumatic cutter/ hacksaw, Cleaning the area , Spreading of dry sand, preparation for welding etc. complete in all respect. The job includes providing sand, electrode, hacksaw etc required for successful completion of the job.

b) CRUDE OIL HANDLING & RECOVERY:

i) Making arrangement for earth pit to accommodate spilled crude oil. This includes arrangement of the land, shielding of the pit walls with suitable polythene sheet to minimize seepage, collection of the crude oil into the pit. The excavated earth shall be stacked of size- 2m wide & 1 m height and 1 m away from pit boundary. Stacked earth and pit sidewall shall be dressed suitably for laying polyethylene sheet. Arrangement of land shall be done by way of leasing or any other suitable means. Pit to be dug one no each side of the hook up location.

ii) Collection and Handling of Spill into the designated earthen Pit excavated for the purpose. This includes collection of the crude oil into the pit, making arrangement for pumping the crude oil from the pit in to the pipeline and safety aspects during the operations.

c) SERVICES OF EQUIPMENT AND SHUTDOWN LOGISTIC:

Preparation and creation of the logistic support for execution of Hook up job, which shall involve infrastructure development. The Shutdown job shall complete within 48 hrs from the time allotted by the company. The work shall be carried out round the clock basis. Two separate independent team with all equipment and manpower shall be deployed each end at hook up job locations. All equipment and manpower required for successful completion of the job shall be made available hot-stand by during shutdown period. The Equipment such as Air compressor-2 nos, Recovery van / crane/ hydra - 1 no Generator- 2 nos shall be kept on Hot standby mode for 72 hrs.

d) EVACUATION OF CRUDE FROM OLD SECTION:

Making arrangement for Air Pigging of the entire segment of old pipe to evacuate crude oil and sludge and make blind at both end by welding.

e) RETRIEVAL OF UNDERGROUND PIPES :

Retrieval of pipes from bridges and underground section. The job shall include Air Pigging of the entire segment, Collection and handling of product and sludge from old pipes, cutting of the pipes at 10m intervals with Hacksaw, Dismantling of the hangers and loading, unloading and onward transportation to PS8, Sonapur.

13.0 BACKFILLING:

a) The backfilling operations shall follow as closely as possible to lowering in of the pipe, provided that the pipe has been lowered to its correct depth. No trench shall be backfield unless the pipe has a proper fit therein and has the required space for cover. Before any pipe is covered or section is backfield, it is The Contractor's responsibility to secure the approval of the Engineer. Should such sanction not be obtained due to exigencies of the work, the Engineer shall have the right to require uncovering of the pipe at certain locations for examination. The cost of uncovering and refilling shall be borne by The Contractor. Rock, gravel, pieces of wood or like materials shall not be backfield directly on to the pipe. Where such materials are encountered, the Contractor shall cover the pipe with not less than 200 mm of earth or sand. Such earth or sand is to be sieved through a 10 mm mesh should the Engineer so require. After the trench has been initially filled, earth shall be neatly crowned over the trench to form a raised walk way.

P18

b) If due to unforeseen circumstances during back filling and compacting should there be not enough soil to fill the trench properly, or to install the crown height as stipulated by Engineer, Contractor shall arrange the necessary backfill material at no additional cost to the Company.

c) When the trench has been dug through drive ways, streets or roads, rail roads, drains, canals, embankments etc. all backfill shall be thoroughly compacted to their original contour and condition as is necessary and to the satisfaction of the Engineer and authority having jurisdiction. At end of each day's work backfilling shall not be more than 1.5 km. behind the head end of the lowered in pipe approved for backfill. In such case at least 300mm earth cover shall be provided over the lowered pipe in the trench.

17.0 CLEAN-UP:

a) Following the installation and backfilling of the pipeline, The Contractor shall clear the right-of-way and its surrounding ground, and shall dispose of all waste materials, debris resulting from its operations. It shall repair all miscellaneous ground damage done by it and shall restore the ground to such stable condition as may reasonably be required consistent with the condition of the ground prior to the construction of the pipeline. The Contractor shall make permanent repair of fences and other enclosures through which it has had temporary gates or other means of passage. New and like material shall be placed in condition as good as or better than at the beginning of construction. These repairs shall be satisfactory to the property owner and his tenants. The Contractor shall remove all other temporary means of access to the right-of-way which it may have installed, excepting any which may, by agreement with the Engineer, be left for later use by maintenance crews or the land owner. The Contractor shall at its expense repair or restore to original condition all public right-of-way at the points where they have been intersected by the pipeline right-of-way. The Contractor shall install boundary markers supplied by The Company on either side of ROW as per direction of the Engineer.

b) On completion of clean up, the ROW shall be restored to such stable and unstable condition as may be reasonably consistent with the condition of the ROW prior to laying the pipeline. The Company shall be completely indemnified and held harmless by Contractor from any and against all claims, demands, losses, expenses etc. that may arise in this behalf or the Company may anyway suffer or sustain, relative to, arising out of, or in connection with same.

c) The Contractor shall be entirely responsible for all claims which may result from damage done by it off the right-of-way of the pipeline, and shall make any repairs and restorations and shall satisfy all proper claims. The Contractor shall remove from the premises all materials including pipe along the right-of-way and/or depots, camps, railheads, left from the construction work, whether owned by it or by The Company, at points designated by The Company. The Contractor shall remove from the premises all equipment, tools and appliances that were used by it in the performance of the works.

d) All the foregoing operation of cleaning up the right-of-way and adjoining and intersection premises shall be completed by The Contractor as closely as practical behind the backfilling of the pipeline so that the right-of-way shall suffer disturbance from construction for shortest practical period of time.

e) In making settlement of all claims for damages for which The Contractor is liable as specified in this Contract, The Contractor shall either authorize The Company in writing to settle on The Contractor's behalf or appoint a representative to make the settlement. The releases for all such damages are to be made out in the name of The Contractor and The Company jointly. If The Contractor is unable to make settlement of any claims within fifteen days from the date of completion and acceptance of construction cleanup on the track of land involved (unless The Contractor intends to litigate the claims involved), then in either of such event, The Company reserves the right to make settlement of the claim and charge the amount paid to The Contractor. The Company shall be furnished with a copy of all releases obtained by The Contractor.

f) All surplus & defective materials supplied by Company shall be collected and transported to The Company's depots as directed by The Engineer under "Material Custody Transfer Note".

19.0 DOCUMENTATION:

P18

Contractor shall submit all the relevant drawings including the „as built“ one along with copies but not limited to the following:

- a) Complete set of all the drawings
- b) Raw data collected / generated for and during execution of the work.

19.0 COMPLETION DOCUMENTS:

The following documents (as applicable) shall be submitted in hard binder by the contractor as a part of the completion documents.

- a) Welding Procedure Qualification Report
- b) Welder Qualification Report
- c) Radiographic Procedure Qualification
- d) Radiographic reports along with radiographs
- e) Hydrostatic test reports
- f) Pipe tally book
- g) As built drawings.

Part-IV**PAYMENT TERMS****1.0 PAYMENT TERMS:**

1.1 Payment for welding & radiography of 3 LPE pipe, repair of defective coating of 3LPE pipe, supply and installation of heat shrinkable sleeve will be initiated only after successful completion of HDD work.

1.2 Payment for welding & radiography of bare line pipe, repair of defective pipe ends, coating and wrapping by cold applied tape will be initiated only after lowering and backfilling of pipeline as per guidelines/instruction of engineer in charge.

1.3 Whereas payment of clause no **1.2** will be initiated only after successful completion of HDD work.

1.4 No part payment will be initiated before reaching of specified HDD rig in good working condition at site/starting of HDD work.

PART V

OIL INDIA LIMITED
(A Government of India Enterprise)
CONTRACTS SECTION, PHQ
P.O. UdayanVihar – 781171, Guwahati, ASSAM

SCHEDULE OF COMPANY'S PLANTS, MATERIALS& EQUIPMENT**SCOPE OF SUPPLY****4.1. OWNER'S SCOPE OF SUPPLY.**

- a) The Owners scope of supply shall be limited to the supply of the followings:
- i) 355.6 mm OD x 7.91 / 11.92 mm WT,API 5L,G-46 pipes from the designated stockpile location at PS8, Sonapur.
 - ii) Coating material required.
 - iii) Gate valve
 - iii) 75mm NB MS pipe & 40/33 mm size OFC HDPE duct
Optical Fibre Cable (OFC) drum will be supplied by OIL at the HDD site and contractor shall be responsible for safe custody as well as safe handling of OFC during the entire work period.

4.2 CONTRACTOR'S SCOPE OF SUPPLY

All other equipment, materials, consumables, etc. not specifically indicated above, but are required for successful completion of the works as per the tender documents, drawings / construction methodology / detailed engineering calculations etc. shall be included in the Contractor's scope of supply.

VII – SAFETY MEASURES

To,
Deputy General Manager(CONTRACTS)
OIL INDIA LIMITED
Guwahati-781171

SUB: SAFETY MEASURES

Description of work/service: HIRING THE SERVICES OF DESIGN, DETAIL ENGINEERING & INSTALLATION OF 355.6 MM OD PIPELINE BY HORIZONTAL DIRECTIONAL DRILLING METHOD AT KOSHI RIVER CROSSINGS INCLUDING LAYING OF APPROXIMATELY 1320 M OF 355.6 MM OD PIPELINE & HOOK-UPS WITH EXISTING CRUDE OIL PIPELINE. AND ALSO LAYING OF 40 MM DIA HDPE DUCT ENCAGED IN 75MM NB MS PIPE ACROSS RIVER KOSHI OF LENGTH 1320 M ALONG WITH CRUDE OIL LINE

Sir,

We hereby confirm that we have fully understood the safety measures to be adopted during execution of the above contract and that the same have been explained to us by the concerned authorities. We also give the following assurances.

- a) Only experienced and competent persons shall be engaged by us for carrying out work under the said contract.
- b) The names of the authorized persons who would be supervising the jobs on day to day basis from our end are the following:

i) _____

ii) _____

iii) _____

The above personnel are fully familiar with the nature of jobs assigned and safety precautions required.

- c) Due notice would be given for any change of personnel under item(b) above.

P18

d) We hereby accept the responsibility for the safety of all the personnel engaged by us and for the safety of the Company's personnel and property involved during the course of our working under this contract. Any violation pointed out by the Company's engineers would be rectified forthwith or the work suspended till such time the rectification is completed by us and all expenditure towards this would be on our account.

e) All losses caused due to inadequate safety measures or lack of supervision on our part would be fully compensated by us and the Company will not be responsible for any lapses on our part in this regard.

(Seal)

Yours Faithfully

FOR & ON BEHALF OF BIDDER

PART VIII – INTEGRITY PACT**INTEGRITY PACT(APPLICABLE FOR THIS TENDER)**

Between

Oil India Limited (OIL) hereinafter referred to as "The Principal"

And

(Name of the bidder).....hereinafter referred to as
"The Bidder/Contractor"

Preamble:

The Principal intends to award, under laid down organizational procedures, contract/s for The Principal values full compliance with all relevant laws and regulations, and the principles of economic use of resources, and of fairness and transparency in its relations with its Bidder/s and Contractor/s.

In order to achieve these goals, the Principal cooperates with the renowned international Non-Governmental Organization "Transparency International" (TI). Following TI's national and international experience, the Principal will appoint an external independent Monitor who will monitor the tender process and the execution of the contract for compliance with the principles mentioned above.

Section: 1 -Commitments of the Principal

(1) The Principal commits itself to take all measures necessary to prevent corruption and to observe the following principles:

1. No employee of the Principal, personally or through family members, will in connection with the tender for, or the execution of a contract, demand, take a promise for or accept, for him/herself or third person, any material or immaterial benefit which he/she is not legally entitled to.
2. The Principal will, during the tender process treat all Bidders with equity and reason. The Principal will in particular, before and during the tender process, provide to all Bidders the same information and will not provide to any Bidder confidential/additional information through which the Bidder could obtain an advantage in relation to the tender process or the contract execution.
3. The Principal will exclude from the process all known prejudiced persons.

(2) If the Principal obtains information on the conduct of any of its employees which is a criminal offence under the relevant Anti-Corruption Laws of India, or if there be a Page 2 of 6 substantive suspicion in this regard, the Principal will inform its Vigilance Office and in addition can initiate disciplinary actions.

Section: 2 -Commitments of the Bidder/Contractor

(1) The Bidder/Contractor commits itself to take all measures necessary to prevent corruption. He commits himself to observe the following principles during his participation in the tender process and during the contract execution.

1. The Bidder/Contractor will not, directly or through any other person or firm, offer, promise or give to any of the Principal's employees involved in the tender process or the execution of the contract or to any third person any material or immaterial benefit which he/she is not legally entitled to, in order to obtain in exchange any advantage of any kind whatsoever during the tender process or during the execution of the contract.

2. The Bidder/Contractor will not enter with other Bidders into any undisclosed agreement or understanding, whether formal or informal. This applies in particular to prices, specifications, certifications, Subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to introduce cartelization in the bidding process.

3. The Bidder/Contractor will not commit any offence under the relevant Anticorruption Laws of India; further the Bidder/Contractor will not use improperly, for purposes of competition or personal gain, or pass on to others, any information or document provided by the Principal as part of the business relationship, regarding plans, technical proposals and business details, including information contained or transmitted electronically.

4. The Bidder/Contractor will, when presenting his bid, disclose any and all payments he has made, is committed to or intends to make to agents, brokers or any other intermediaries in connection with the award of the contract.

(2) The Bidder/Contractor will not instigate third persons to commit offences outlined above or be an accessory to such offences.

(3) The Bidder/Contractor signing Integrity Pact shall not approach the Courts while representing the matters to IEMs and he/she will await their decision in the matter.

Section 3 -Disqualification from tender process and exclusion from future Contracts

If the Bidder, before contract award has committed a transgression through a violation of Section 2 or in any other form such as to put his reliability or risibility as Bidder into question, the Principal is entitled to disqualify the Bidder from the tender process or to terminate the contract, if already signed, for such reason.

1. If the Bidder/Contractor has committed a transgression through a violation of Section 2 such as to put his reliability or credibility into question, the Principal is entitled also to exclude the Bidder/Contractor from future contract award processes. The imposition and duration of the exclusion will be determined by the severity of the transgression. The severity will be determined by the circumstances of the case, in particular the number of transgressions, the position of the transgressions within the

company hierarchy of the Bidder and the amount of the damage. The exclusion will be imposed for a minimum of 6 months and maximum of 3 years.

2. The Bidder accepts and undertakes to respect and uphold the Principal's Absolute right to resort to and impose such exclusion and further accepts and undertakes not to challenge or question such exclusion on any ground, including the lack of any hearing before the decision to resort to such exclusion is taken. This undertaking is given freely and after obtaining independent legal advice.

3. If the Bidder/Contractor can prove that he has restored/recouped the Damage caused by him and has installed a suitable corruption prevention system, the Principal may revoke the exclusion prematurely.

4. A transgression is considered to have occurred if in light of available evidence no reasonable doubt is possible.

5. Integrity Pact, in respect of a particular contract, shall be operative from the date Integrity Pact is signed by both the parties till the final completion of the contract **or as mentioned in Section 9- Pact Duration whichever is later**. Any violation of the same would entail disqualification of the bidders and exclusion from future business dealings

Section 4 -Compensation for Damages

1. If the Principal has disqualified the Bidder from the tender process prior to the award according to Section 3, the Principal is entitled to demand and recover from the Bidder liquidated damages equivalent to Earnest Money Deposit / Bid Security.

(2) If the Principal has terminated the contract according to Section 3, or if the Principal is entitled to terminate the contract according to Section 3, the principal shall be entitled to demand and recover from the Contractor liquidated damages equivalent to Security Deposit / Performance Bank Guarantee.

3. The bidder agrees and undertakes to pay the said amounts without protest or demur subject only to condition that if the Bidder/Contractor can prove and establish that the exclusion of the Bidder from the tender process or the termination of the contract after the contract award has caused no damage or less damage than the amount or the liquidated damages, the Bidder/Contractor shall compensate the Principal only to the extent of the damage in the amount proved.

Section 5 -Previous transgression

1. The Bidder declares that no previous transgression occurred in the last 3 years with any other Company in any country conforming to the TI approach or with any other Public Sector Enterprise in India that could justify his exclusion from the tender process.

2. If the Bidder makes incorrect statement on this subject, he can be disqualified from the tender process or the contract, if already awarded, can be terminated for such reason.

Section: 6 -Equal treatment of all Bidders/Contractor/Subcontractors

1. The Principal will enter into Pacts on identical terms with all bidders and contractors.
2. The Bidder / Contractor undertake(s) to procure from all subcontractors a commitment in conformity with this Integrity Pact. The Bidder/Contractor shall be responsible for any violation(s) of the provisions laid down in this agreement/Pact by any of its sub-contractors/sub-vendors.
3. The Principal will disqualify from the tender process all bidders who do not sign this Pact or violate its provisions.

Section: 7 -Criminal charges against violating Bidders/Contractors/Subcontractors

If the Principal obtains knowledge of conduct of a Bidder, Contractor or Subcontractor, or of an employee or a representative or an associate of a Bidder, Contractor or Subcontractor, which constitutes corruption, or if the Principal has substantive suspicion in this regard, the Principal will inform the Vigilance Office.

Section: 8 -External Independent Monitor/Monitors

1. The Principal appoints competent and credible external independent Monitor for this Pact. The task of the Monitor is to review independently and objectively, whether and to what extent the parties comply with the obligations under this agreement.
2. The Monitor is not subject to instructions by the representatives of the parties and performs his functions neutrally and independently. He reports to the Chairperson of the Board of the Principal.
3. The Contractor accepts that the Monitor has the right to access without restriction to all Project documentation of the Principal including that provided by the Contractor. The Contractor will also grant the Monitor, upon his request and demonstration of a valid interest, unrestricted and unconditional access to his project documentation. The same is applicable to Subcontractors. The Monitor is under contractual obligation to treat the information and documents of the Bidder/Contractor/Subcontractor with confidentiality.
4. The Principal will provide to the Monitor sufficient information about all meetings among the parties related to the Project provided such meetings could have an impact on the contractual relations between the Principal and the Contractor. The parties offer to the Monitor the option to participate in such meetings.
5. As soon as the Monitor notices, or believes to notice, a violation of this agreement, he will so inform the Management of the Principal and request the Management to discontinue or heal the violation, or to take other relevant action. The monitor can in this regard submit non-binding recommendations. Beyond this, the Monitor has no right to demand from the parties that they act in a specific manner, refrain from action or tolerate action. **However, the Independent**

External Monitor shall give an opportunity to the bidder / contractor to present its case before making its recommendations to the Principal.

6. The Monitor will submit a written report to the Chairperson of the Board of the Principal within 8 to 10 weeks from the date of reference or intimation to him by the 'Principal' and, should the occasion arise, submit proposals for correcting problematic situations.

7. If the Monitor has reported to the Chairperson of the Board a Substantiated suspicion of an offence under relevant Anti-Corruption Laws of India, and the Chairperson has not, within reasonable time, taken visible action to proceed against such offence or reported it to the Vigilance Office, the Monitor may also transmit this information directly to the Central Vigilance Commissioner, Government of India.

8. The word 'Monitor' would include both singular and plural.

Section:9 -Pact Duration

This Pact begins when both parties have legally signed it. It expires for the Contractor 12 months after the last payment under the respective contract, and for all other Bidders 6 months after the contract has been awarded.

If any claim is made/ lodged during this time, the same shall be binding and continue to be valid despite the lapse of this pact as specified above, unless it is discharged/determined by Chairperson of the Principal.

Section:10 -Other provisions

1. This agreement is subject to Indian Law. Place of performance and jurisdiction is the Registered Office of the Principal, i.e. New Delhi. **The Arbitration clause provided in the main tender document / contract shall not be applicable for any issue / dispute arising under Integrity Pact.**

2. Changes and supplements as well as termination notices need to be made in writing. Side agreements have not been made.

3. If the Contractor is a partnership or a consortium, this agreement must be, signed by all partners or consortium members.

4. Should one or several provisions of this agreement turn out to be invalid, the remainder of this agreement remains valid. In this case, the parties will strive to come to an agreement to their original intentions.

PROFORMA-VII

FORMAT FOR UNDERTAKING
(IN TERMS OF TENDER NO. CGI 5180 P18)
(On Non-Judicial Stamp Paper of Rs. 100/-)
TO BE NOTARISED

To
 Deputy General Manager(CONTRACTS)
 OIL INDIA LIMITED
 GUWAHATI

Dear Sirs,

**UNDERTAKING/DECLARATION BY THE BIDDER IN RESPECT OF TENDER NO
 CGI 5180 P18**

This is in connection with the Bid submitted by me/us, (Name of Bidder), against Tender No. **CGI 5180 P18** for **“HIRING THE SERVICES OF DESIGN, DETAIL ENGINEERING & INSTALLATION OF 355.6 MM OD PIPELINE BY HORIZONTAL DIRECTIONAL DRILLING METHOD AT KOSHI RIVER CROSSINGS INCLUDING LAYING OF APPROXIMATELY 1320 M OF 355.6 MM OD PIPELINE & HOOK-UPS WITH EXISTING CRUDE OIL PIPELINE. AND ALSO LAYING OF 40 MM DIA HDPE DUCT ENCAGED IN 75MM NB MS PIPE ACROSS RIVER KOSHI OF LENGTH 1320 M ALONG WITH CRUDE OIL LINE”.**

I/We, the afore mentioned Bidder against the subject tender, hereby declare that my/our quoted rates include the following -

- (a) Labour wages as per Minimum Wages Act and notifications issued by the Central Govt. from time to time, including P.F, insurance and Bonus.
- (b) Material and Equipment (if any) cost.
- (c) PPE cost.
- (d) IME (Initial Medical Examination) cost.
- (e) Other charges / cost including overheads, profit, insurance and handling charge..

I/We, the afore mentioned Bidder against the subject tender take note that minimum wages may increase from time to time as notified by statutory authority and Central Govt. and undertake that I/We shall not make Company (i.e. OIL) liable to reimburse me/us for such statutory increase in wage rates of the labours/workers engaged by me/us during the entire period of the contract, including extension if any. Currently, such increase in the wage rates is twice in a year. I/We have bid after considering this increase in wage rates for the entire period of Contract including extension provision.

PROFORMA**E-TENDER: CGI 5180 P18**

I/We, the afore mentioned Bidder against the subject tender, further undertake that I/We will pay my/our workers the existing Daily wages as notified under the Minimum Wages Act from time to time by the Central Govt. and such statutory or any other increase in the wages rates including consequent increase in statutory contributions like provident fund etc. of contract labours engaged by me/us shall be borne solely by me/us during the entire period of the contract, including extension if any, without any cost implication whatsoever upon the Company.

I/We further agree and undertake that in case of any violation of the above undertaking, Oil India Limited (OIL) shall be at liberty to take appropriate action against me/us in terms of the Tender/Contract including but not limited to termination of contract and debarment from future business with OIL. I shall duly comply with all the statutory obligations, more particularly under applicable labour laws. I further agree and undertake that in case of any dispute or claims arise out of my non-compliance of statutory obligations under the Contract, by the Labourers engaged by me or by any statutory authorities, I shall only be responsible for the same and hold the Company harmless against such dispute or claims. I further authorize the Company, in the event of my default or non-compliance of any statutory obligations, to deduct/recover and adjust such amount or claim against my Bills due under the Contract or against any other existing or future Contracts with the Company including performance security.

I/We declare that the information given above is true and any misstatement, misrepresentation, or suppression of facts in connection with the above undertaking may entail rejection of the bid and cancellation of contract, if awarded.

Yours faithfully,

1. Authorized Signatory with Seal
