(a) **"Similar work"** mentioned in Paragraph 2.1.1 above means the following:

**Definition of similar work: Construction of Drilling location/ Road works.**

(b) Non-submission of the documents as specified in all the paragraphs above will result in rejection of bids.

**4.0** The bids conforming to the specifications, terms and conditions stipulated in the tender documents and considered to be responsive will be evaluated as per the procedure mentioned below:

- i. Bid will be opened on schedule date & time as specified in the NIT and all the bids where the bidders have quoted the lowest price (within the permissible percentage as per NIT) will be selected for conducting Draw of Lots (DoL). DoL will be conducted within a short period after Bid Closing Date. In the DoL, 7 (seven) numbers of bidders will be selected first, in the order of B-1 (Bidder-1), B-2 B-3, B-4, B-5, B-6 and B-7. The technical scrutiny will be carried out for these seven bidders only. If the bid of bidder B-1 is found to be technically qualified, B-1 will be the successful bidder (Priority-1 bidder) and the contract will be awarded to B-1. If B-1 is not found to be technically qualified but B-2 is technically qualified, B-2 will be awarded the contract, ---- and so on; i.e. whoever becomes the first technically qualified bidder in the order of B-1 → B-2 → B-3 → B-4 → B-5 → B-6 → B-7, will be the successful bidder (P-1). In this way, P-1 (Priority-1) and P-2 bidders will be selected. The contract will be awarded to the P-1 bidder only. However, in case the bidder P-1 is not able to carry out the job due to any reason, P-2 may be awarded the job, if the same is approved by Company's competent authority. In case, none of these seven bidders are found to be technically acceptable, the draw of Lot will be again conducted to select 7 more bidders as B-8 to B-14 and similar steps will be followed thereon as explained above. The system of conducting further draw of lots will be followed till a technically acceptable bidder is selected.
- ii. Bidder should note that deficit documents will not be sought from the bidders. The bids will be evaluated as per the documents received from the bidders at the time of bid opening. Any bid, which is not supported with the requisite documents as per the NIT, will be rejected straightway without seeking any further clarification and deficit document.

**Note:** The Company's Internal Estimated Rates, as indicated in Part-II, are inclusive of all overheads, taxes, duties, levies etc. except P.F. & GST.

**(B). BID REJECTION CRITERIA (BRC):**

1. The bids are to be submitted in single stage under composite bid system i.e. Un-priced Techno-Commercial Bid and Price Bid together. Only the Price Bid should contain the quoted price (percentage only).
2. Bid security shall be furnished as a part of the Techno Commercial Un-priced Bid. The amount of bid security should be as specified in the NIT. Any bid not accompanied by a proper bid security will be summarily rejected.

3. Bid Documents / User Id & Password for OIL's E-Tender portal are not transferable. Bid submitted by parties who have not submitted the requisite tender fees will be rejected.
4. Any bid received in the form of Physical document/ Telex/Cable/Fax/E-mail will not be accepted.

**(C). GENERAL:**

- i. Submission of Forged Documents: Bidders should note that Company may verify authenticity of all the documents /certificates / information submitted by the bidder(s) against the tender. In case at any stage of tendering process or Contract execution etc., if it is established that bidder has submitted forged documents / certificates / information towards fulfilment of any of the tender / contract conditions, Company shall immediately reject the bid of such bidder(s) or cancel / terminate the contract and forfeit EMD / SD submitted by the bidder(s), besides taking action as per OIL's Banning Policy dated 6<sup>th</sup> January 2017, available in the OIL's website.
- ii. In case bidder takes exception to any clause of bidding document not covered under BEC/BRC, then the Company has the discretion to load or reject the offer on account of such exception if the bidder does not withdraw / modify the deviation when / as advised by company. The loading so done by the Company will be final and binding on the bidders. No deviation will however be accepted in the clauses covered under BRC.
- iii. To ascertain the substantial responsiveness of the bid the Company reserves the right to ask the bidder for clarification in respect of clauses covered under BEC/BRC also and such clarifications fulfilling the BEC/BRC clauses in toto must be received on or before the deadline given by the company, failing which the offer will be evaluated based on the submission. However, mere submission of such clarification shall not make the offer responsive, unless Company is satisfied with the substantial responsiveness of the offer.

- iv. If any of the clauses in the BRC contradicts with other clauses of Bidding document elsewhere, the clauses in the BRC shall prevail.
- v. Bidder(s) must note that requisite information/financial values etc. as required in the BEC/BRC & Tender are clearly understandable from the supporting documents submitted by the Bidder(s); otherwise Bids shall be rejected.
- vi. OIL will not be responsible for delay, loss or non-receipt of applications for participating in the bid sent by mail and will not entertain any correspondence in this regard.

**OIL INDIA LIMITED  
(A Govt. of India Enterprise)  
DULIAJAN (ASSAM)  
WORKS CONTRACT**

**PARTICULAR SPECIFICATIONS AND INSTRUCTIONS:**

**DESCRIPTION OF WORK/SERVICES:** Development of road beside in gate of CISF colony of Duliajan including supply of all materials.

**1.0SCOPE OF WORK:**

Brief specifications are given here under for general guidance purpose of the bidders. The job scope includes construction of sub-base with granular materials, construction of two layers of W.B.M of 75 mm thick each, providing and applying tack coat, construction of 40 mm thick Semi Dense Bituminous Concrete.

(a)Construction of Granular Sub-Base: All dirt, dust, rubbish, tree leaves etc. must be removed from the road surface before any portion of the road surface can be scarified. After the above operation, the road surface shall be scarified to sufficient depth to loosen the top surface layer. The road surface shall then be graded to the correct camber by using proper templates. Granular sub-base work shall consist of laying and compacting well-graded Granular materials over the prepared road surface. The material shall be laid in one or more layers as necessary, as directed by the Engineer in charge. The road shall then be heavily rolled with an 8 to 10 ton roller to the correct camber.

(b)Construction of Water Bound Macadam: The sub-grade/ sub-base to receive the water bound macadam course shall be prepared to the specified grade & camber and made free of dust and other extraneous material. Any ruts or soft yielding places shall be corrected in an approved manner and rolled until firm. Wherever W.B.M. is to be laid over an existing black topped surface, 50 mm x 50 mm furrows shall be cut at an angle 45 degrees to the center line of the road at 1 meter intervals before laying the aggregates. The aggregates will be crushed river boulder of size 63 mm and graded down to 45mm and should be hard and durable and free from excess of flat, elongated, soft and integrated particles and dirt. Binding materials to be used for water bound macadam construction shall comprise of suitable materials such as stone dust or loamy earth approved by the Engineer-in-charge having plasticity index value of less than 6.

After preparation of sub-grade/ sub-base in a proper camber the aggregates shall be spread uniformly over the prepared surface in compacted layer of not more than 75 mm at a time. In case of thickness of more than 75 mm, the same shall be compacted in two layers. Following the spreading of the aggregates, rolling shall be started with a three wheeled roller of 8 to 10 ton capacity. On super elevated portions where the rolling shall proceed from inner edge to the outer, rolling shall begin from the edges gradually progressing towards the center. First the edges shall be compacted with roller running forward and backward. The roller shall then move inwards parallel to the center line of the road, in successive passes uniformly lapping proceeding tracks by at least one half width. Rolling shall be discontinued when the aggregates are partially compacted with sufficient void space in them to permit application of binding material. During rolling slight sprinkling of water may be done, if necessary. Rolling shall not be done when the sub-grade is soft or yielding or when it causes a wave like motion in the sub grade or sub-base course. The rolled surface shall be checked transversely and longitudinally with templates and irregularities if

any will be corrected by loosening the surface, adding or removing necessary amounts of aggregate and re-rolling until the entire surface conforms to desired camber and grade.

After application of aggregates the binding materials shall be applied successively in two or more thin layers at a slow and uniform rate. After each application, the surface shall be copiously sprinkled with water, the resulting slurry swept in with hand brooms or mechanical brooms to fill the voids properly and rolled during which water shall be applied to the wheels of the rollers if necessary to wash down the binding materials sticking to them. These operations shall continue until the resulting slurry after filling of voids, forms a wave ahead of the wheels of the moving roller. After the final compaction of water bound macadam course, the road shall be allowed to dry overnight. Next morning hungry spots shall be filled with screenings or binding materials as directed, lightly sprinkled with water if necessary and rolled.

(c) Construction of Semi Dense Bituminous Concrete: This work shall consist of construction of a single layer of semi dense bituminous concrete on W.B.M. surface after applying tack coat over the W.B.M surface. The tack coat will be applied with bitumen emulsion or bitumen using emulsion pressure distributor at the rate of 0.20 kg per square meter on the prepared W.B.M. surface cleaned with mechanical broom. A single layer semi dense bituminous concrete shall be of 40 mm compacted thickness.

First, semi- dense bituminous concrete will be prepared in a Batch Type Hot Mix Plant of 100-120 TPH capacity using crushed stone aggregates of specified grading i.e. 18mm graded down to 10mm, 12mm graded down to 6mm & 6mm graded down to 2mm; premixed with bitumen of grade VG-30 @ 5% (percentage by weight of total mix) and lime filler @ 2% (percentage by weight of Aggregate). Then the hot mix will be transported to work site by tippers. After that, hot mix will be laid with paver finisher equipped with electronic sensor to the required grade, level and alignment. Then rolling will be done with smooth wheeled, vibratory and tandem rollers to achieve the desired compacted thickness as per directions of Engineer-in-Charge.

#### **2.0 WATER:**

Water for WBM shall not be salty or brackish and shall be clean, reasonably clear and free from objectionable quantity of silt and traces of oil, acid, injurious alkali, salts, organic matter and other deleterious materials which will either weaken the mortar or concrete or causes efflorescence or attack the steel in reinforced cement concrete. Water shall be obtained from sources approved by the Site Engineer.

#### **3.0 SPECIAL INSTRUCTION TO THE BIDDER:**

The Bidder, at the Bidder's own responsibility and risk is encouraged to visit and examine the Site of Works and its surroundings and obtain all information that may be necessary for preparing the Bid and entering into a contract for construction of the Works. The costs of visiting the Site shall be at the Bidder's own expense. A prospective bidder requiring any clarification of the bidding documents may notify the Employer in writing.

#### **4.0 SPECIAL INSTRUCTION TO THE CONTRACTOR:**

- b) The Contractor's representative should report to Engineer-in charge on all working days at 7.30 am for day to day instruction.

- c) Materials if rejected should be removed from site within 48(forty eight) hours of rejection, failing which the company reserves the right to get the rejected materials removed at the risk and cost of the contractor.
  - d) The Company reserves the right to get the part or whole work completed through other agency at the risk and cost of the contractor if he fails to complete the work within the stipulated time without any valid reasons. The Company's decision shall be final and binding on the Contractor.
  - e) The Contractor shall obtain labour clearance within seven days of signing the contract.
  - f) Water that may accumulate on the site during progress of the works or in trenches or at any excavated place of working site have to be evacuated from site by the contractor to the satisfaction of the Engineer-in-charge and at the Contractor's expense.
  - g) If needed water and electricity will have to be arranged by the Contractor at his own cost.
  - h) Temporary road closure will be allowed during execution of work and necessary traffic signal/road boards to be displayed at proper place by the Contractor at his own cost. The Contractor shall be wholly responsible for any accident arising out of non-fulfillment of this condition.
  - i) The Contractor will be required to work expeditiously at the site and must visit the site before tendering.
  - j) Hot and Cold permit, Gas leakage testing certificate issued by the Concerned Department to be submitted by the contractor to Engineer-in-charge.
  - k) The contractor should submit the work program in form of a bar chart within 7 days of receipt of work order.
  - l) Necessary Test certificates, for all materials including water to be supplied by the contractor, must be submitted to Engineer in-charge from a recognized institution/ organization for approval.
  - m) Company's Internal Estimate is excluding of PF component.
- 5.0**The signatory of the contract should visit the site of work/office at least twice a week to receive instructions from the Engineer in Charge or Company's representative.
- 6.0**All safety precautions as per Company's guidelines are to be strictly adhered to by the contractor.
- 7.0**The contractor shall arrange to provide watch and ward of Company's materials and equipment's, issued to him/her (if any) in relation to the work.
- 8.0**Any infrastructural facility like water, electricity (if required), site go down etc. will have to be arranged/ constructed by the contractor at his/her own cost.
- 9.0**Except where otherwise specifically stated, the Engineer will decide contractual matters between the Employer and the Contractor in the role representing the Employer.

**10.0** All risks of loss of or damage to physical property and of personal injury and death which arise during and in consequence of the performance of the Contract other than the excepted risks are the responsibility of the Contractor.

**11.0** The Contractor shall submit Specifications and Drawings showing the proposed Temporary Works to the Engineer, who is to approve them if they comply with the Specifications and Drawings.

**12.0** The Contractor shall allow the Engineer and any person authorized by the Engineer access to the Site, to any place where work in connection with the Contract is being carried out or is intended to be carried out and to any place where materials or plant are being manufactured / fabricated / assembled for the works.

**13.0** Except where otherwise stated, the contractor shall pay all tonnage and other royalties, rent and other payments of compensation, if for getting stone, sand, gravel, clay of other materials required for the works. Contractor shall have to produce necessary cash memos towards forest produce used against the contract to Head (Civil) used against this contract from the authorities prior to processing of final payment. In absence of cash memos, the final bill shall not be processed.

**14.0 TIME CONTROL:**

Within the time stated in the Contract Data the Contractor shall submit to the Engineer for approval a Programme showing the general methods, arrangements, order, and timing for all the activities in the Works.

**15.0 IDENTIFYING DEFECTS:**

The Engineer shall check the Contractor's work and notify the Contractor of any Defects that are found. Such checking shall not affect the Contractor's responsibilities. The Engineer may instruct the Contractor to search for a Defect and to uncover and test any work that the Engineer considers may have a Defect. If the Engineer instructs the Contractor to carry out a test not specified in the Specification to check whether any work has a Defect and the test shows that it does, the Contractor shall pay for the test and any samples. The Engineer shall give notice to the Contractor of any Defects before the end of the Defects Liability Period, which is defined in the Contract.

**16.0 PERIODIC MAINTENANCE:**

The Contractor shall do the routine maintenance of roads, including pavement, road sides and cross drains including surface drains to the required standards and keep the entire road surface and structure in Defect free condition during the entire construction period.

**17.0 GENERAL HEALTH, SAFETY & ENVIRONMENT (HSE) POINTS:**

1.
