SPECIAL CONDITIONS OF CONTRACT (SCC)**SCOPE OF WORK AND TECHNICAL SPECIFICATIONS****1.0 GENERAL:**

Description of Work: Hiring of Services for Pilot Project of Pigging 02 Nos. of 100mm NB Field Pipelines of OIL as new technology induction on project mode, in the following two pipelines of OIL's operational area in the state of Assam:

- i) Nadua WHS to Dikom OCS, Approx length- 7.5KM
- ii) Loc NLC flowline, Approx length-6.5KM

2.0 OBJECTIVE: In pipeline transportation system Pigging is a very important process for maintaining smooth operation and health management of a pipeline. In OIL, Field pipelines of diameter 100mmNB flowlines and delivery pipelines are generally constructed as non-piggable lines. Hence pigging was never been an option for driving out the accumulated solids and liquids from the pipelines. These undesired deposits many a times creates operational and maintenance challenges like blockages, internal corrosion etc, which leads to operational and production losses.

The purpose of this tender is to undertake a pilot project to establish pigging system in the flowlines in order to overcome by mechanical means the problem of clearing internal accumulation.

3.0 STATUS OF THE PIPELINES:

3.1 These field pipelines have not been pigged since commissioning. The pipelines are continuously in operation of transporting crude oil. The Pipelines are laid in pipeline corridors which have other hydrocarbon pipelines running parallel. The pipelines cross highway and railway track, tea plantation area, agricultural land and small water bodies. Operating parameters and technical details of the pipelines are provided in Annexure-I.

3.2 The detailed Scope of Work is detailed in clause 4.0. The Bidder is expected to visit the sites prior to bidding for familiarization and gathering information about the pipelines as well as assess the requirements at pig launcher and receiver ends and understand site conditions. The Company may assist the Bidders during site visit by deputing personnel if intimated at least 3(three) days prior to the proposed date of visit.

3.3 The Company will offer one pipeline at a time for pigging. There will be time gap between pigging of two pipelines, which the Company will try to keep at 10(ten) days. The Contractor shall complete preparation of pigging a pipeline in 10(ten) days. If the Company is unable to provide a pipeline for the pigging operation in 10(ten) days due to operational reason, the Contractor shall absorb the cost of any such additional day.

4.0 DETAILED SCOPE OF WORK:

4.1 The scope of work shall broadly be as under:

4.1.1 Supply of solid cast poly pigs (Bi-Di) and HD Foam Pigs for 100mm NB 7.14mm WT pipeline- the pigs shall be for passing through 1.5D bend and shall be with

inserted permanent magnet and with ability to negotiate, 3 way inline pig launcher and receiver valves with companion flange- each valve with provision for accommodating one pig at a time , RTJ Ring Gasket of 600# rating, studs and nuts, Strap on type magnetic pig signallers with strap-on clamp as detailed in Schedule of Quantities/ Schedule of Rates (SOQ/SOR) required for the crude oil pipeline pigging and cleaning works as per size of the pipelines. The pigs and accessories shall be supplied as per specification detailed in clause 7.0 of this section.

4.1.2 Mobilisation and Setting out time which shall include shifting of manpower, equipment, tools & tackles to the specific worksite, familiarization with the pipeline route and installation of pig tracking points using strap on magnetic type pig signaller at designated locations covering complete stretch of the pipeline to be pig, checking operability of the pig valves and by-pass systems etc., familiarize with arrangements made by the Company for diverting the flow in the Indirect Heater points(if applicable) and launcher and receivers ends at well head point and inside production installations.

4.1.3 Cleaning Pigging work in each line which shall consist of 2 (two) pig runs as follows:

4.1.3.a There shall be 2(two) pig runs in each line: 1st (First) pig run shall be done with HD Foam pig and 2nd (Second) /final pig run shall be done with a solid cast poly pigs (Bi-Di) capable of negotiating minimum 1.5D bend radius. The solid cast poly pigs (Bi-Di) and HD Foam Pigs shall have inserted permanent magnet so as to enable tracking of the pig at designated locations with strap-on type magnetic pig signaller mounted on the pipeline.

4.1.3.b If the Contractor feels that an initial proof run of pig is required for gaining confidence the same may be done by the Contractor with a soluble pig or HD pig with reduced diameter or solid cast bi-di pig with reduced diameter at their own cost.

4.1.3.c The pigging operation shall be carried out as per Standard Operating Procedure (SoP) referred to in clause 4.7 and pig tracking shall be done as per Pig Tracking Procedure referred to in clause 4.8.

4.1.4 Starting and end points of pigging operation of each pipeline shall be the pig launcher and receiver valves respectively. Distance run by the pig in one run shall be calculated from the pig launcher and receiver valves of the pipeline. Lengths of the pipelines are given in clause 1.0 of this section.

4.2 Completion of the Pigging Operation: Pigging of a pipeline shall be considered as COMPLETE upon achieving 2nd /Final run of pig from end to end i.e. from launching valve to receiving valve in one through run. Payment shall be done for COMPLETE pig run in a pipeline in terms of length of pipeline as stated in clause 1.0. The details are explained in clause 4.3.

4.3 As stated in clause 2.0 and 3.0 of this section these pipelines falls under category of small diameter non-piggable pipelines and hence no pigging was done. The following situations may arise during the pigging operation: -

4.3.a During 1st pig run with HD foam pig. The following situations may arise:

i. The pig stops inside the line due to unforeseen obstruction: The Contractor shall detect the location of the pig and the Company shall retrieve the pig by cutting open the pipe. On after recovery of struck pig and restoration of the pipeline again the 1st pig run shall be resumed from the starting launching point. This shall be continued till the 1st pig run is complete from end to end i.e. launching valve to receiving valve as stated in 4.2 above.

There may be multiple runs of the HD foam pig to complete 01 (one) successful 1st run pig operation, but payment will be done as per (ref clause 4.2).

ii. If the 2nd pig gets stuck-up and the Contractor fails to detect location of the pig the service is liable to be declared as failure at the discretion of the Company and shall not qualify for payment except for the used supplied items.

4.3.b During 2nd pig run with 'solid cast bi-di poly pig' the following situations may arise:

i. The pig stops inside the line due to unforeseen obstruction: - The Contractor shall detect the location of the pig and the Company shall retrieve the pig:

- Firstly by reversing the flow so as to drive the pig back to the launching end and during the operation the Contractor shall track movement of the pig.

- In case of failure to drive the pig back to launching end, the Company shall retrieve the pig by cutting open the pipe and restore the pipeline. On after recovery of struck pig and restoration of the pipeline again the 2nd pig run shall be resumed from the launching point. This shall be continued till the 2nd pig run is complete from end to end i.e. launching valve to receiving valve as stated in 4.2 above.

There may be multiple runs of the 'solid cast bi-di poly pig' to complete 1 (one) successful 2nd run pig operation, but payment will be done as per (ref clause 4.2).

ii. If the 2nd pig gets stuck-up and the Contractor fails to detect location of the pig the service shall be liable to be declared as failure at the discretion of the Company and shall not qualify for payment except for the used supplied items.

4.3.c As stated in clause 4.1.3.b, if the Contractor decides for an initial proof run of pig with a soluble pig or HD pig the following situations may occur:

i. The pig may get damaged/disintegrate inside the pipeline and fail to reach the receiving end or recover.

ii. The Contractor shall be responsible for tracking the pig travel identify the location of the stuck pig.

4.3 d. In the event of the 2nd pig getting stuck-up repeatedly (reference 4.3.b.i) and failure to complete an end to end i.e. launching valve to receiving valve as stated in 4.2 the Company may call off pigging operation in the pipeline. In such a situation payment will be done only for the used supplied items.

4.4 The contractor shall mount the strap-on type pig locators on pipeline as per SOQ. Beside that contractor shall have at least two numbers extra pig locators for tracking the pig so as to locate a pig stuck-up between two strap-on locators.

1. If the Bidder/Contractor has committed a transgression through a violation of Section 2 such as to put his reliability or credibility into question, the Principal is entitled also to exclude the Bidder/Contractor from future contract award processes. The imposition and duration of the exclusion will be determined by the severity of the transgression. The severity will be determined by the circumstances of the case, in particular the number of transgressions, the position of the transgressions within the company hierarchy of the Bidder and the amount of the damage. The exclusion will be imposed for a minimum of 6 months and maximum of 3 years.

2. The Bidder accepts and undertakes to respect and uphold the Principal's Absolute right to resort to and impose such exclusion and further accepts and undertakes not to challenge or question such exclusion on any ground, including the lack of any hearing before the decision to resort to such exclusion is taken. 3. The bidder agrees and undertakes to pay the said amounts without protest or demur subject only to condition that if the Bidder/Contractor can prove and establish that the exclusion of the Bidder from the tender process or the termination of the contract after the contract award has caused no damage or less damage than the amount or the liquidated damages, the Bidder/Contractor shall compensate the Principal only to the extent of the damage in the amount proved.

Section 5 - Previous transgression

1. The Bidder declares that no previous transgression occurred in the last 3 years with any other Company in any country conforming to the TI approach or with any other Public Sector Enterprise in India that could justify his exclusion from the tender process.

Section: 8 - External Independent Monitor/Monitors

1. The Principal appoints competent and credible external independent Monitor for this Pact. The task of the Monitor is to review independently and objectively, whether and to what extent the parties comply with the obligations under this agreement.

2. The Monitor is not subject to instructions by the representatives of the parties and performs his functions neutrally and independently. He reports to the Chairperson of the Board of the Principal.

3. The Contractor accepts that the Monitor has the right to access without restriction to all Project documentation of the Principal including that provided by the Contractor. The Contractor will also grant the Monitor, upon his request and demonstration of a valid interest, unrestricted and unconditional access to his project documentation. The same is applicable to Subcontractors. The Monitor is under contractual obligation to treat the information and documents of the Bidder/Contractor/Subcontractor with confidentiality.

4. The Principal will provide to the Monitor sufficient information about all meetings among the parties related to the Project provided such meetings could have an impact on the contractual relations between the Principal and the Contractor. The parties offer to the Monitor the option to participate in such meetings.

5. As soon as the Monitor notices, or believes to notice, a violation of this agreement, he will so inform the Management of the Principal and request the Management to discontinue or heal the violation, or to take other relevant action. The monitor can in this regard submit non-binding recommendations. Beyond this, the Monitor has no right to demand from the parties that they act in a specific manner, refrain from action or tolerate action. However, the Independent External Monitor shall give an opportunity to the bidder/contractor to present its case before making its recommendations to the Principal.

Section: 9 - Pact Duration

This Pact begins when both parties have legally signed it. It expires for the Contractor 12 months after the last payment under the respective contract, and for all other Bidders 6 months after the contract has been awarded.

If any claim is made/lodged during this time, the same shall be binding and continue to be valid despite the lapse of this pact as specified above, unless it is discharged/determined by Chairperson of the Principal.

Section: 10 - Other provisions

1. This agreement is subject to Indian Law. Place of performance and jurisdiction is the Registered Office of the Principal, i.e. New Delhi. The Arbitration clause provided in the main tender document/contract shall not be applicable for any issue/dispute arising under Integrity Pact.
