SCOPE OF WORK (SOW)

1.0 PURPOSE OF SEISMIC SURVEY OPERATIONS: Seismic Survey Operations includes survey operations, seismic data recording operation with allied services and Uphole & LVL surveys.

1.1. The purpose of survey operations is to lay out seismic profile on the ground as per the plan map. In this process, shot points and receiver points are marked on the ground at regular interval in respect of each profile using Total Stations/RTK for acquisition of 2D seismic data. Co-ordinates and elevation of all shots and receiver points are collected for the purpose of processing of the acquired seismic data. GPS/Total Station survey is carried out for connecting the shot/receiver points and crossing/reference points for preparation of the final map. Survey operations are the essential pre-requisites of data acquisition and data processing work and are carried out in phased manner. Acquisition of survey data for a seismic profile is over when above-mentioned chain of activities is completed. Maintaining proper shot-hole depth, proper planting of geophone/sensor have direct bearing on quality of data acquired and consequently on the processing and interpretation of seismic data.

1.2. The purpose of recording operation is to acquire the seismic data along seismic profile and to store on magnetic tapes/cartridges for processing the acquired data on computer for subsequent interpretation of these data. The quality and quantum of recording seismic data solely depends upon various jobs under recording operations

1.3. Separate Uphole crews are engaged for collecting data pertaining to static

corrections to be applied while processing the data.

Group Interval	: 10-30 mtrs.
Shot Interval	: 20-100 mtrs.
Minimum Offset	: 10-200 mts.
Maximum Offset	: 4000-6000 mts.
Offset Distribution	: Uniform
Type of Spread	: End-On/Split-Spread
Shot Hole Depth	: Up to 20 meter

Note:

I. Final acquisition parameters like charge size and shot hole pattern may be decided after the necessary experimental work in the field.

1. If the Bidder/Contractor has committed a transgression through a violation of Section 2 such as to put his reliability or credibility into question, the Principal is entitled also to exclude the Bidder/Contractor from future contract award processes. 1. The Bidder declares that no previous transgression occurred in the last 3 years with any other Company in any country conforming to the TI approach or with any other Public Sector Enterprise in India that could justify his exclusion from the tender process.
