130	Field visit for one professor for one site.	EA	10		
TOTAL ESTIMATED CONTRACT COST					

Note:

- (i) Bidders are requested to quote for all the items mentioned above. Bids will be evaluated considering the entire requirement as above. The Rates/amounts indicated hereof are inclusive of all applicable taxes.
- (ii) Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total price (that is obtained by multiplying the unit price and quantity) the unit price shall prevail and the total price shall be corrected accordingly. If there is a discrepancy between words, and figures, the amount in words will prevail. If any Bidder does not accept the correction of the errors, their Bid will be rejected.

17.0 SCOPE OF WORK -

The works under this agreement is as per the schedule given in Part-II.

18. PROCEDURE FOR EXECUTION OF WORK -

(a) Percussion Boring as per IS code 1892-1973

This method consists of breaking up of the formation by repeated blows from a bit or a chisel. Water should be added to the hole at the time of boring, and the debris bailed out at intervals.

The bit may be suspended by a cable or rods from a walking beam or spudding device.

(b) Procedure for taking samples:-

(i) Disturbed soil sample:- Disturbed samples of soils may be obtained in the course of excavation and boring. The taking of disturbed samples of clay may result in the remoulding of the material and may render it unsuitable for shear strength measurements unless it is required for til. Such samples are suitable for mechanical analysis and tests for index properties. These samples may not be truly representative, especially when taken from below the ground-water level. This is more so in the case of gravels containing a portion of fine sand, since the

finer fractions tend to be washed off the sampler by the water.

For procuring true samples, where possible, the ground-water level may be lowered by means of pumping from filter wells before procuring-samples, or special type of samplers used.

(ii) Un-disturbed soil sample:- Samples shall be obtained in such a manner that moisture content and structure do not get altered. That may be attained by careful protection and packing and by the use of a correctly designed sampler. (Details are in clause No 6.2 of IS Code 1892-1973).

(c) IS code to be followed for carrying out the laboratory tests:-

- (i) Atterbarg limit - IS Code 2720 (Part 5)-1985
- (ii) Grain size analysis and hydrometer - IS 2720-(Part 4) -1985
- (iii) Triaxial shear test - IS 2720-(Part 11) -1993
- (iv) Consolidation test - IS 2720-(Part 15) -1965
- (v) Swelling index and swelling potential of soil - IS 2720-(Part 40) -1977

(d) The Contractor/ Consultant must keep daily contact with Engineer in charge to receive instructions regarding work. The Engineer in charge shall be free to take action against the Contractor as per terms of this contract.

(e) For efficient workmanship, the Contractor/ Consultant will engage adequate labour force and supervisory staff. The relevant specifications will be adhered to in all details. If standard of work is not achieved, the Engineer in charge will be free to reduce the rates as per clause 3 (a) of Part-I of Contract.

(f) The Contractor must maintain adequate and right type of tools required for efficient discharge of responsibility.

19. Payment terms:-

(i) First running bill will be released only after submission of soil investigation report (duly signed signed by the Competent Authority) for a particular location. Soil investigation report should incorporate the type of foundation to be considered i.e. pile foundation, individual raft foundation etc. If the foundation is recommended for piling, then the soil report should include pile bearing capacity.

(ii) Consultant has to start designing of drilling rig foundation only after receipt of intimation from the Engineer -in-Charge along-with all loading pattern and load diagrams.

(iii) Second running bill will be released after submission of rig foundation design, working drawing and design calculation. The design should be verified and drawing should be signed by a Professor in Structural Engineering Department of Govt. Engineering College or any retired Govt. Professor.

20. DEFAULT BY THE CONTRACTOR/ CONSULTANT

Should the Contractor fail to carry out the part of the work involved in this agreement in way of-

- (a) Not maintaining the desired progress of work.
- (b) Neglecting to carry out certain aspect of the work.
- (c) Carrying out work at a specification lower than the intended.
- (d) Supplying inferior grade of material.

- (e) Carrying out work without instructions.
- (f) Not carrying out safety measure
- (g) Not carrying out work as per instructions.
- (h) Other defects as pointed out to the party.

Then, the engineer shall be free to take action against him as provided for under the contract.

21 MEASUREMENT

21.1 The payment will be made as per the actual measurement of work at site for the items executed under Part - II of this contract.

The job shall be done as per Andhra Pradesh Common SOR & CPWD specifications. The specification and the method of measurements described herein are applicable for all the items of works involved in the site.

22. HSE POINTS

The SOP should clearly state the risk arising to me ,machineries & material from the mining operation / operations to be done by the contractor and how it is to be managed.

(v) The Consultant/ contractor shall provide a copy of the SOP to the person designated by the mine owner who shall be supervising the contractor's work.

(vi) Consultant/ Contractor has to ensure that all work is carried out in accordance with the Statute and SOP and for the purpose he may deploy adequate qualified and competent personnel for the purpose of carrying out the

job in a safe manner. For work of a specified scope/nature, he should develop and provide to the mine owner a site specific code of practice in line .

(vii) It will be entirely the responsibility of the Consultant/ Contractor/his Supervisor/representative to ensure strict adherence to all HSE measures and statutory rules during operation in OIL's installations and safety of workers engaged by him. The crew members will not refuse to follow any instruction given by company's Installation Manager / Safety Officer / Engineer / Official / Supervisor/Junior Engineer for safe operation.

(viii) Any compensation arising out of the job carried out by the Consultant/ Contractor whether related to pollution, Safety or Health will be paid by the contractor only.

(ix) Any compensation arising due to accident of the Consultant's/ Contractor's personnel while carrying out the job, will be payable by the contractor.

(x) The Consultant/ contractor shall have to report all incidents to the Installation Manager / departmental representative of the concerned department of OIL.

(xi) The Consultant/ contractor has to keep a register of the persons employed by him/her. The Consultant's/ contractor's supervisor shall take and maintain attendance of his men every day for the work, punctually.

(xii) If the company arranges any safety class / training for the working personnel at site (company employee, contractor worker, etc) the Consultant/ contractor will not have any objection to any such training.

(xiii) To arrange daily tool box meeting and regular site safety meetings and maintain records.

(xiv) Records of daily attendance, accident report etc. are to be maintained in Form B, E, J (as per Mines Rules 1955) by the contractor .

(xv) A Consultant/ contractor employee must, while at work, take reasonable care for the health and safety of people who are at the employee's place of work and who may be affected by the employee's act or omissions at work.

(xvi) A Consultant/ contractor employee must, while at work, cooperate with his or her employer or other persons so far as is necessary to enable compliance with any requirement under the act or the regulations that is imposed in the interest of health, safety and welfare of the employee or any other person.

(xvii) Consultant's/ Contractor's arrangements for health and safety management shall be consistent with those for the mine owner.

(xviii) In case Consultant/ Contractor is found non-compliant of HSE laws as required company will have the right for directing the contractor to take action to comply with the requirements, and for further non-compliance, the contractor will be penalized prevailing relevant Acts/Rules/Regulations.

(xix) When there is a significant risk to health ,environment or safety of a person or place arising because of a non-compliance of HSE measures company will have the right to direct the contractor to cease work until the non-compliance is corrected.

(xx) The Consultant/ contractor should prevent the frequent change of his contractual employees as far as practicable.

(xxi)The contractor should frame a mutually agreed bridging document between OIL & the contractor with roles and responsibilities clearly defined.
