1	G & R	Workstation & UPS for Reserve Estimation Software & Geoscientic Modelling Software	28.00	7907676/SDI dtd. 11.01.2016	M/s SCHLUMBERGER SOLUTIONS PVT.LTD., Gurgaon			<p>GFD &amp; RA section is primarily engaged in evaluation of Company's reserves of oil &amp; gas and development of gas fields, particularly in North East India. Considering the new gas supply commitment to M/s. BCPL, the section is presently actively engaged in carrying out geoscientific studies of different gas fields / reservoirs and in monitoring OIL's gas production sustainability. All the modelling/project works (in-house &amp; consultancy studies) are being carried out using PETREL (RE) with ECLIPSE simulator and hence for better data compatibility &amp; seamless functionality it was proposed to procure the same application software for reserve estimation. Also PETREL is being used extensively in OIL from exploration to dynamic simulation and as such it was also proposed to procure the same Geoscientific Modelling Software for better data compatibility &amp; seamless integration. Accordingly, G&amp;R department is now in the process of procuring PETREL (G&amp;G) software for GFD &amp; RA section as proposed.</p> <p>The procurement of workstation with adequate hardware components meeting all the necessary specifications is vital for smooth functioning of the above software. As the Reserve Estimation Software and Geoscientic Modelling Software is a proprietary item of M/s. Schlumberger, it was felt prudent to procure the required hardware components also from M/s. Schlumberger on Nomination basis which will not only reduce application downtime but also ensure necessary maintenance and upgrades concomitant to the software.</p>

**Certification:-**

All works/Purchase/Consultancy and other contracts, in progress, as per prescribed monetary limit and approved under Srl. No. 34 I(A) of DOP have been reported in this QPR.
