1	CEMG-DRILLING	Hiring of Under Reamer Services for Well Sindhuja#1 in Block CY-OSN-2009/2	74.64	6110229 DATED 05.09.2016	M/S. SCHLUMBER GER ASIA SERVICES LTD.	E&D/C&P/138/16 dated 26.08.2016	Agreed .	Severe hole instability problems was encountered while drilling the 12.1/4" hole section in well Sindhuja#1 resulting in frequent hole cave-in and pack off. A meeting was held with the partner M/s ONGCL on 17th August'2016 to discuss the above problem. After due deliberations it was decided to have a contingency provision to lower the 11 3/4" liner to secure the well and thus the initial well design had to be changed which required different kinds of tools and equipment. For lowering the 11.3/4" liner, the 12.1/4" hole is required to be enlarged to 14.3/4" by using an under reamer. The services of such under reamers were not within the scope of the existing contracts, as this was not as per original well design. Considering the urgent requirement of these under reamers and services and to avoid huge standby day rate of Rig and Bundled service, the bundled services contractor for this well, M/s Schlumberger Asia Services Ltd.(SASL) was awarded the contract on nomination basis.
